350-701 Valid Test Simulator, 350-701 Answers Real Questions

The clients can consult our online customer service before and after they buy our Implementing and Operating Cisco Security Core Technologies guide dump. We provide considerate customer service to the clients. Before the clients buy our 350-701 cram training materials they can consult our online customer service personnel about the products' version and price and then decide whether to buy them or not. After the clients buy the 350-701 study tool they can consult our online customer service about how to use them and the problems which occur during the process of using. If the clients fail in the test and require the refund our online customer service will reply their requests quickly and deal with the refund procedures promptly. In short, our online customer service will reply all of the clients' questions about the 350-701 cram training materials timely and efficiently.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q274-Q279):

NEW QUESTION # 274

Why should organizations migrate to an MFA strategy for authentication?

- A. MFA methods of authentication are never compromised.
- B. Biometrics authentication leads to the need for MFA due to its ability to be hacked easily.
- C. MFA does not require any piece of evidence for an authentication mechanism.
- **D. Single methods of authentication can be compromised more easily than MFA.**

Answer: D

Explanation:

single methods of authentication can be compromised more easily than MFA. MFA, or multi-factor authentication, is a security process that requires users to provide two or more factors to verify their identity and access resources. MFA reduces the risk of unauthorized access by making it harder for attackers to compromise all the factors needed, especially if they are different in nature, such as something you know (password), something you have (token), and something you are (biometric).

To understand the concept of MFA and why it is important for authentication security, you can refer to the following sections of the source book:

- * Section 1.1.1: Describe the concepts of identity and access management
- * Section 1.1.1.1: Describe the concepts of identity principles
- * Section 1.1.1.2: Describe the concepts of authentication
- * Section 1.1.1.3: Describe the concepts of authorization
- * Section 1.1.1.4: Describe the concepts of accounting
- * Section 1.1.1.5: Describe the concepts of identity stores
- * Section 1.1.1.6: Describe the concepts of MFA

References:

- * Implementing and Operating Cisco Security Core Technologies (SCOR) v1.0

- * How to implement Multi-Factor Authentication (MFA) | Microsoft Security Blog

NEW QUESTION # 275

Where are individual sites specified to be blacklisted in Cisco Umbrella?

- A. content categories
- B. application settings
- C. destination lists
- D. security settings

Answer: C

Explanation:

A destination list is a list of internet destinations that can be blocked or allowed based on the administrative preferences for the policies applied to the identities within your organization. A destination is an IP address (IPv4), URL, or fully qualified domain name. You can add a destination list to Umbrella at any time; however, a destination list does not come into use until it is added to a policy.

NEW QUESTION # 276

Which two Cisco ISE components must be configured for BYOD? (Choose two.)

- A. central WebAuth
- B. guest
- C. dual
- D. local WebAuth
- E. null WebAuth

Answer: A,B

Explanation:

Cisco ISE supports two types of WebAuth for BYOD: central WebAuth and local WebAuth. Central WebAuth is the default method and it uses the ISE portal to authenticate the users and redirect them to the BYOD portal. Local WebAuth is an alternative method that uses the network access device (NAD) portal to authenticate the users and then redirects them to the ISE BYOD portal. Both methods require the configuration of a guest component on ISE, which is used to create the BYOD portal and the guest user accounts. The guest component also provides the self-service onboarding and registration features for the BYOD users. The dual component is not related to BYOD, but rather to the dual-SSID method, which uses two separate SSIDs for provisioning and access. The null WebAuth component is not a valid option for BYOD. References = Some possible references are:

- * Cisco ISE BYOD Prescriptive Deployment Guide
- * Configure Single SSID Wireless BYOD on Windows and ISE
- * Cisco ISE for BYOD and Secure Unified Access, 2nd Edition

NEW QUESTION # 277

Refer to the exhibit.

What are two indications of the Cisco Firepower Services Module configuration? (Choose two.)

- A. Traffic is blocked if the module fails.
- B. The module fails to receive redirected traffic
- C. Traffic continues to flow if the module fails.
- D. The module is operating in IDS mode.
- E. The module is operating in IPS mode.

Answer: C,D

NEW QUESTION # 278

Which two application layer preprocessors are used by Firepower Next Generation Intrusion Prevention System? (Choose two.)

- A. modbus
- B. packet decoder
- C. inline normalization
- D. SSL
- E. SIP

Answer: B,C

NEW QUESTION # 279

.....

The clients at home and abroad can both purchase our 350-701 study tool online. Our brand enjoys world-wide fame and influences so many clients at home and abroad choose to buy our Implementing and Operating Cisco Security Core Technologies guide dump. Our company provides convenient service to the clients all around the world so that the clients all around the world can use our 350-701 study materials efficiently. Our company boosts an entire sale system which provides the links to the clients all around the world so that the clients can receive our products timely. Once the clients order our 350-701 cram training materials we will send the products quickly by mails. The clients abroad only need to fill in correct mails and then they get our products conveniently. Our 350-701 cram training materials provide the version with the language domestically and the version with the foreign countries' language so that the clients at home and abroad can use our 350-701 study tool conveniently.
