If we redouble our efforts, our dreams will change into reality. Although we might come across many difficulties during pursuing our dreams, we should never give up. If you still have dreams, our C1000-173 study materials will help you realize your dreams. Where is a will, there is a way. And our C1000-173 Exam Questions are the exact way which can help you pass the exam and get the certification with ease. Just have a try on our C1000-173 practice guide, then you will know you can succeed.

ExamTorrent never sells the useless C1000-173 certification C1000-173 exam dumps out. You will receive our C1000-173 exam dumps in time and get IBM Certified Architect Certified easily. Try C1000-173 Exam free demo before you decide to buy it in ExamTorrent. After you buy ExamTorrent certification C1000-173 exam dumps, you will get free update for ONE YEAR!

Pass Guaranteed 2026 High Hit-Rate IBM C1000-173 Study Materials Review

Are you aware of the importance of the C1000-173 certification? If your answer is not, you may place yourself at the risk of being eliminated by the labor market. As we know, the C1000-173 certification is the main reflection of your ability. If you want to

maintain your job or get a better job for making a living for your family, it is urgent for you to try your best to get the C1000-173 Certification. We are glad to help you get the certification with our best C1000-173 study materials successfully.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 2	<ul style="list-style-type: none"> Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.
Topic 3	<ul style="list-style-type: none"> Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.
Topic 4	<ul style="list-style-type: none"> Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 5	<ul style="list-style-type: none"> Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q106-Q111):

NEW QUESTION # 106

Which statement is true about Cloud Pak for Data SIEM integration?

- A. The Cloud Pak for Data Audit Logging Service uses Fluentd input streams to forward and export audit records.
- B. Auditing logging is supported by all Cloud Pak for Data components and services.
- C. The Cloud Pak for Data Audit Logging Service explicitly supports the SIEM solutions: Splunk, QRadar, and Log360.
- D. If a connection to multiple SIEM systems has been established, the same method must be used to connect to each SIEM system.

Answer: A

Explanation:

Cloud Pak for Data provides audit logging capabilities via the Audit Logging Service, which uses Fluentd to collect, process, and forward log data to external SIEM solutions. Fluentd input streams are configured to export audit records in real time. While Splunk and QRadar are common integrations, Log360 is not explicitly listed in the official supported list. Each SIEM connection can be

configured independently, and while audit logging is widely supported, it may not be enabled by default for every single service- therefore only option B is correct.

NEW QUESTION # 107

What is a key feature of online storage options for IBM Cloud Pak for Data?

- A. Lower performance compared to offline storage
- B. Used primarily for archived data
- C. High availability and quick access to data
- D. Data is not accessible instantly

Answer: C

NEW QUESTION # 108

What makes a multi-engine architecture advantageous in watsonx.data?

- A. Enhanced query optimization across different engines
- B. Increased system complexity
- C. Reduced data security
- D. Limited data processing capabilities

Answer: A

NEW QUESTION # 109

Which data processing engine is used for Data Privacy Masking flows?

- A. dbt
- B. Spark
- C. Presto
- D. DataStage

Answer: B

Explanation:

Data Privacy Masking flows in IBM Cloud Pak for Data utilize Apache Spark as the underlying data processing engine. Spark enables large-scale, distributed data masking operations for structured data, supporting high-performance transformations and compliance with privacy regulations. While DataStage can perform similar operations, the default and recommended engine for Data Privacy flows in CP4D is Spark. dbt and Presto are not used for this masking functionality.

NEW QUESTION # 110

Which two features are valid only when deploying Cloud Pak for Data on-premises?

- A. Compute resources are automatically scaled.
- B. Persistent storage is always used.
- C. The number of OpenShift nodes is configured by the administrator.
- D. Services are automatically updated.
- E. Network security is managed by IBM.

Answer: B,C

Explanation:

In on-premises deployments of IBM Cloud Pak for Data:

Administrators have full control over the number of OpenShift nodes, unlike cloud-managed environments where node scaling may be automatic or abstracted. Persistent storage is always required and configured by the infrastructure team to meet service requirements and ensure data availability.

Auto-scaling of compute and automatic updates of services are not handled by IBM in on-prem setups. Network security

responsibilities also lie with the deploying organization, not IBM, in an on-premises model.

NEW QUESTION # 111

.....

As you see, all of the three versions of our C1000-173 exam dumps are helpful for you to get the C1000-173 certification. So there is another choice for you to purchase the comprehensive version which contains all the three formats. And no matter which format of C1000-173 study engine you choose, we will give you 24/7 online service and one year's free updates. Moreover, we can assure you a 99% percent pass rate.
