

高通過率的NetSec-Pro證照和資格考試中的主要材料供應商和可靠的NetSec-Pro最新試題

此外，這些KaoGuTi NetSec-Pro考試題庫的部分內容現在是免費的：<https://drive.google.com/open?id=1IV10GRowVsOzPnpbkEbS77zJxyzjaOoO>

不要再因為準備一個考試浪費太多的時間了。快點購買KaoGuTi的NetSec-Pro考古題吧。有了這個考古題，你將更好地知道該怎麼準備考試才更有效率。這是一個可以讓你輕鬆就通過考試的難得的工具，錯過這個機會你將會後悔。所以，不要猶豫趕緊行動吧。

Palo Alto Networks NetSec-Pro 考試大綱：

主題	簡介
主題 1	Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.
主題 2	Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.
主題 3	NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.

主題 4	• Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

NetSec-Pro 最新試題 - NetSec-Pro 考試

作為 IT 業界的頂級公司，Palo Alto Networks 通過其認證確定了產品專家的標準，可以說 Palo Alto Networks 在業界的聲望和 Palo Alto Networks 產品的市場佔有率提升了其認證工程師的含金量，一個 Palo Alto Networks 認證工程師獲取在優秀企業工作的機會比普通工程師大 60%—80%，平均薪水高出 30%-50%。世界 500 強企業中，有超過 2/3 的企業選擇了 Palo Alto Networks 電子商務軟體產品作為其核心的運用。因此，獲得 NetSec-Pro 的證照，即使在強手林立的競爭環境中，你同樣能夠脫穎而出。

最新的 Network Security Administrator NetSec-Pro 免費考試真題 (Q17-Q22):

問題 #17

How many places will a firewall administrator need to create and configure a custom data loss prevention (DLP) profile across Prisma Access and the NGFW?

- A. Four
- **B. One**
- C. Two
- D. Three

答案: B

解題說明:

Palo Alto Networks' Enterprise DLP uses a centralized DLP profile that can be applied consistently across both Prisma Access and NGFWs using Strata Cloud Manager (SCM). This eliminates the need for duplicating efforts across multiple locations.

"Enterprise DLP profiles are created and managed centrally through the Cloud Management Interface and can be used seamlessly across NGFW and Prisma Access deployments." (Source: Enterprise DLP Overview)

問題 #18

Which subscription sends non-file format-based traffic that matches Data Filtering Profile criteria to a cloud service to render a verdict?

- A. Advanced WildFire
- B. Advanced URL Filtering
- C. SaaS Security Inline
- **D. Enterprise DLP**

答案: D

解題說明:

Enterprise DLP uses cloud analysis to inspect and classify sensitive data in non-file-based formats (e.g., in-line data streams, SaaS communications).

"Enterprise DLP inspects data in non-file-based traffic flows, forwarding suspicious data patterns to the cloud for classification and verdicts." (Source: Enterprise DLP Overview) The other services focus on file-based scanning (WildFire), URL access control (Advanced URL Filtering), or inline SaaS application controls (SaaS Security Inline).

問題 #19

When a firewall acts as an application-level gateway (ALG), what does it require in order to establish a connection?

- A. Session Initiation Protocol (SIP)
- **B. Payload**
- C. Pinholes
- D. Dynamic IP and Port (DIPP)

答案: B

解題說明:

An ALG is designed to inspect and modify the payload of application-layer protocols (like SIP, FTP, etc.) to manage dynamic port allocations and session information.

"Application Layer Gateways (ALGs) inspect the payload of certain protocols to dynamically manage sessions that use dynamic port assignments. By modifying payloads, the ALG ensures that NAT and security policies are correctly applied." (Source: ALG Support)

問題 #20

Which NGFW function can be used to enhance visibility, protect, block, and log the use of Post- quantum Cryptography (PQC)?

- A. Decryption profile
- B. Security policy
- **C. Decryption policy**
- D. DNS Security profile

答案: C

解題說明:

A decryption policy allows the firewall to inspect encrypted traffic and apply security controls to Post- quantum Cryptography (PQC) usage, as PQC algorithms are typically implemented within encrypted sessions.

"Decryption policies enable the firewall to see and control encrypted traffic. This visibility and control extend to new cryptographic algorithms, including PQC, to ensure that security measures are applied consistently." (Source: Palo Alto Networks Decryption Overview) By decrypting sessions, you ensure that even PQC traffic can be inspected, logged, and subject to security profiles for visibility and policy enforcement.

問題 #21

Which component of NGFW is supported in active/passive design but not in active/active design?

- A. Using a DHCP client
- B. Route-based redundancy
- C. Configuring ARP load-sharing on Layer 3
- **D. Single floating IP address**

答案: D

解題說明:

Single floating IP address (also known as a floating IP or shared IP) is supported only in an active/passive HA pair. In active/active HA, both firewalls are forwarding traffic simultaneously and thus do not share a single floating IP.

"In active/passive HA, a single floating IP address is used for seamless failover. Active/active HA requires separate IP addresses and does not support a single floating IP." (Source: Active/Passive vs. Active/Active HA) This simplifies failover in active/passive deployments by using a single shared IP that moves to the active peer upon failover.

問題 #22

.....

Palo Alto Networks NetSec-Pro 認證考試已經成為了IT行業中很熱門的一個考試，但是為了通過考試需要花很多時間和精力掌握好相關專業知識。在這個時間很寶貴的時代，時間就是金錢。KaoGuTi為Palo Alto Networks NetSec-Pro

認證考試提供的培訓方案只需要20個小時左右的時間就能幫你鞏固好相關專業知識，讓你為第一次參加的Palo Alto Networks NetSec-Pro 認證考試做好充分的準備。
