APMG-International ISO-IEC-27001-Foundation PDF Guide | ISO-IEC-27001-Foundation Latest Demo

The quality of our ISO-IEC-27001-Foundation exam questions is of course in line with the standards of various countries. At the same time, our global market is also convenient for us to collect information. You will find that the update of ISO-IEC-27001-Foundation learning quiz is very fast. You don't have to buy all sorts of information in order to learn more. ISO-IEC-27001-Foundation training materials can meet all your needs. What are you waiting for? Just rush to buy them!

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The level of quality to which the ISMS must adhere
- B. The regular activities necessary to maintain and improve the ISMS
- C. The dependencies between activities performed by the organization
- D. The lessons learned from the information security experiences of other organizations

Answer: C

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of:

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

NEW QUESTION # 23

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [?] these actions.

- A. improve the effectiveness of
- B. apply competent resources to
- C. evaluate the effectiveness of
- D. communicate

Answer: C

Explanation:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

* integrate and implement the actions into its ISMS processes; and

* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

NEW QUESTION # 24

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Communication
- **B. Awareness**
- C. Nonconformity and corrective action
- D. Competence

Answer: B

Explanation:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

NEW QUESTION # 25

Identify the missing word(s) in the following sentence.

"Information security, cybersecurity and privacy protection - [?]" is the title of ISO/IEC 27005.

- A. Guidelines for information security management systems auditing
- B. Information security management systems - Requirements
- **C. Guidance on managing information security risks**
- D. Information security controls

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:

ISO/IEC 27005:2022 is titled:

"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).

Thus, the correct answer is C: Guidance on managing information security risks.

NEW QUESTION # 26

In an audit, what is the definition of an observation?

- A. A non-fulfilment of a requirement of ISO/IEC 27001
- B. An issue raised by an interested party
- C. An issue excluded from the scope of the standard
- **D. A conformity to the standard where there is an opportunity for improvement**

Answer: D

Explanation:

ISO/IEC 27001 mandates internal audits (Clause 9.2) and continual improvement (Clause 10.1) but does not define the specific audit term "observation." However, the audit framework in 9.2 requires an audit programme and impartial auditors, and management review inputs include "feedback on the information security performance including trends in... audit results" and "opportunities for continual improvement"

"The companion implementation guidance (ISO/IEC 27002) reinforces the concept of opportunities for improvement in the review of policies: "The reviews should include assessing opportunities for improvement and the need for changes to the approach to information security..." In practical ISO audit usage (aligned with ISO 19011 guidance referenced in the Study Guide), an observation is a recorded conformity where improvement is advisable—commonly termed an Opportunity for Improvement (OFI). The Study Guide's internal audit section emphasizes running an audit programme to identify "potential areas of weakness or non-compliance," supporting the notion of recording improvement opportunities alongside nonconformities. Therefore, within ISO/IEC 27001 audit practice, the best-fit definition is B: a conformity where there is an opportunity for improvement.
