

# Adobe AD0-E725 Test Objectives Pdf, Exam AD0-E725 Guide Materials

Our website provides the most up-to-date and accurate AD0-E725 dumps torrent which are the best for passing certification test. It will help you to accelerate your knowledge and improve your professional ability by using our AD0-E725 VCE Dumps. We are so proud of helping our candidates go through AD0-E725 real exam in their first attempt quickly. The pass rate of our products increased last year because of its reliability.

## Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I/O events and webhooks to create automated and connected business processes.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.</li></ul>

## Exam AD0-E725 Guide Materials & Valid Study AD0-E725 Questions

Everything needs a right way. The good method can bring the result with half the effort, the same different exam also needs the good test method. Our AD0-E725 study materials in every year are summarized based on the test purpose, every answer is a template, there are subjective and objective exams of two parts, we have in the corresponding modules for different topic of deliberate practice. To this end, our AD0-E725 Study Materials in the qualification exam summarize some problem-solving skills, and induce some generic templates.

### Adobe Commerce Developer Expert Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

A recent client-reported bug is fixed by the Adobe Commerce community. The Adobe engineering team has not yet released the patch or committed the bug fix to GitHub. A Developer acquires the custom patch and releases it to their Adobe Commerce environments.

What are the recommended steps the Developer should follow to implement the custom patch for the bug fix?

- A. **Install the cweagans/composer-patches module and edit the composer.json file to apply the custom patch.**
- B. Install only official patches supplied by them to maintain upgradability.
- C. Update the quality-patches module and list the required patch in the magento-ce-patch.yaml file.

**Answer: A**

#### NEW QUESTION # 40

A Developer discovers that inline scripts are no longer working. This issue occurred after upgrading to the latest version of Adobe Commerce. When checking the console, the errors indicate that the scripts are not allowed to execute.

The following is an example script:

```
<div id="action-div" onclick="someComponent('title')>Action</div>
```

How should the Developer adapt the script to run properly according to security practices?

- A. **<?php echo \$secureRenderer->renderEventListenerAsTag('onclick', 'someComponent('title')', '#action- div); ?>**
- B. **<?php echo \$escaper->renderSecureTag('<div id="action-div" onclick="someComponent('title')">Action</div>'); ?>**
- C. **<?php echo \$block->renderAllowedElement('<div id="action-div" onclick="someComponent('title')">Action</div>'); ?>**

**Answer: A**

Explanation:

Since Magento 2.3.5, inline JavaScript is restricted by default due to stricter Content Security Policy (CSP) enforcement.

Developers must use the SecureHtmlRenderer class to safely render inline event listeners.

Option C correctly uses \$secureRenderer->renderEventListenerAsTag() to safely attach the onclick event listener to #action-div.

Options A and B are invalid or unsupported for this purpose.

Reference:

Adobe Commerce DevDocs - Secure HTML rendering

#### NEW QUESTION # 41

A Developer applies multiple quality patches to an Adobe Commerce Cloud store. After deployment, the Developer discovers that one of the patches is causing issues.

What is the correct procedure to safely remove or revert the problematic quality patch?

- A. **Execute command in magento-cloud.php /vendor/bin/ecc-patches:revert <patch-id>.**
- B. Delete the quality patch from the file magento.app.yaml.
- C. Delete the quality patch from the file magento.env.yaml.

**Answer: A**

**NEW QUESTION # 42**

A Developer needs to set up a message queue topic in Adobe Commerce to asynchronously handle order processing. Which XML file should the Developer use to configure this?

- A. queue\_topology.xml
- B. queue\_consumer.xml
- **C. communication.xml**

**Answer: C**

Explanation:

The communication.xml file is used to define message queue topics and link publishers with subscribers. This is required when setting up asynchronous handling for events such as order processing.

B (queue\_topology.xml): Defines queue and exchange structure.

C (queue\_consumer.xml): Defines consumers for queues but does not declare topics.

A is correct: communication.xml is the right file for defining topics.

Reference:

Adobe Commerce DevDocs - communication.xml reference

In Adobe Commerce's Message Queue Framework (MQF), several XML configuration files are used, each with a specific purpose:

communication.xml # Defines message queue topics and the messages they carry.

Topics represent logical channels that connect publishers and consumers.

Example: An order placement event may publish a message to a topic like order\_processing.

queue\_topology.xml # Defines the relationship between topics and queues.

Maps a topic to one or more queues.

Specifies routing and exchange bindings.

queue\_consumer.xml # Defines consumers that process messages from queues.

Each consumer is a PHP class responsible for handling a message pulled from a queue.

Since the question specifically asks about setting up a topic (not the routing or consumer), the correct configuration file is communication.xml.

Official Documentation Extracts:

"The communication.xml file defines the messages and topics in the message queue framework." - Adobe Commerce DevDocs:

Message queues configuration

"Use queue\_topology.xml to bind topics to queues and define exchanges." - Message Queues: Topology configuration

"Consumers are defined in queue\_consumer.xml. A consumer listens to a queue and processes incoming messages." - Message Queues: Consumer configuration

**NEW QUESTION # 43**

A client receives an alert stating that storage on their production environment is nearly full. They are using Pro architecture and are concerned about storage capacity. A Developer is asked to increase the disk size.

How should this problem be solved?

- A. Modify the magento.app.yaml file.
- **B. Open a ticket with Adobe support.**
- C. Extend their Adobe license.

**Answer: B**

Explanation:

In Adobe Commerce Cloud Pro environments, disk allocation is provisioned at the infrastructure level and cannot be changed directly by developers. Increasing disk size requires assistance from Adobe's Cloud Ops team via a support ticket.

A (license extension) is unrelated to storage.

B (magento.app.yaml) configures services and resources but cannot increase allocated disk space.

C is correct: Adobe support ticket is required.
