Almost everyone is trying to get VMware Cloud Foundation 5.2 Administrator (2V0-11.25) certification to update their CV or get the desired job. Nowadays, everyone is interested in taking the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam because it has multiple benefits for the future. Every candidate faces just one problem, and that is not getting updated VMware Cloud Foundation 5.2 Administrator (2V0-11.25) practice questions.

We promise during the process of installment and payment of our 2V0-11.25 prep torrent, the security of your computer or cellphone can be guaranteed, which means that you will be not afraid of virus intrusion and personal information leakage. Besides we have the right to protect your email address and not release your details to the 3rd parties.

## 100% Pass Quiz 2026 2V0-11.25: VMware Cloud Foundation 5.2 Administrator Newest Exam Score

In the process of using 2V0-11.25 study question if the clients encounter the difficulties, the obstacles and the doubts they could contact our online customer service staff in the whole day. Our service team will update the 2V0-11.25 certification file periodically and provide one-year free update. Have known these advantages you may be curious to further understand the detailed information about our 2V0-11.25 training braindump and we list the detailed characteristics and functions of our 2V0-11.25 exam questions on the web for you to know.

### VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network</li> <li>storage design.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.</li> </ul>

## VMware Cloud Foundation 5.2 Administrator Sample Questions (Q77-Q82):

### NEW QUESTION # 77

To help troubleshoot an issue with the vSphere Supervisor, an administrator must log into the Supervisor Control Plane VMs. Which three actions should the administrator take to meet the objective? (Choose three.)

- A. Log into the Supervisor Control Plane VM using the root user and <password>.
- B. Obtain the <password> by running `/usr/lib/vmware-wcp/decryptK8Pwd.py`.
- C. Log into the SDDC Manager appliance using SSH.
- D. Log into the Supervisor Control Plane VM using the admin user and <password>.
- E. Log into the vCenter Server Appliance using SSH.
- F. Update the <password> by running `/usr/lib/vmware/auth/bin/chpw admin`.

**Answer: B,C,E**

Explanation:

<https://knowledge.broadcom.com/external/article/323407/troubleshooting-vsphere-with-tanzu-tkgs.html> First SSH into vCenter and run `/usr/lib/vmware-wcp/decryptK8Pwd.py`

### NEW QUESTION # 78

An organization has experienced performance issues and requires a detailed analysis of infrastructure performance, capacity, utilization, and compliance using VMware Aria components.

What three steps should be followed to generate and analyze these reports? (Choose three.)

- A. Export the reports for further analysis and compliance verification
- B. Access Aria Operations and navigate to the Reports section
- C. Create custom dashboards to monitor performance metrics
- D. Run predefined reports on capacity and utilization
- E. Use Aria Operations for Logs to correlate log data with performance

**Answer: C,D,E**

Explanation:

Creating custom dashboards in Aria Operations allows administrators to visualize and monitor performance metrics specific to the organization's needs, making it easier to analyze the infrastructure.

Using Aria Operations for Logs helps correlate log data with performance issues, enabling a deeper analysis and understanding of the root causes of performance problems.

Running predefined reports on capacity and utilization provides valuable insights into how resources are being consumed, helping identify areas that need optimization or adjustment.

#### NEW QUESTION # 79

A specific VM is unable to communicate with other VMs in the same network. An administrator needs to identify and resolve the network connectivity issue.

What three steps should the administrator follow? (Choose three.)

- A. Check the network adapter settings in vCenter Server
- B. Verify that the VM is connected to the correct port group
- C. Verify the port group settings and VLAN configuration
- D. Restart the VM to reset its network connections
- E. Use the ESXi command line to check the status of the VM Kernel adapter

**Answer: A,B,C**

Explanation:

Port group settings and VLAN configurations need to be correct for VMs to communicate with each other on the same network. Ensuring they are properly configured is essential.

It's important to check that the VM is connected to the correct port group that matches the network configuration of the other VMs. The network adapter settings in vCenter Server should be reviewed to ensure there are no misconfigurations that could prevent network communication.

#### NEW QUESTION # 80

What is the primary purpose of configuring a Virtual Distributed Switch (VDS) in a vSphere environment?

- A. To enable VM snapshots across multiple datastores.
- B. To automate the deployment of virtual machines.
- C. To provide centralized management of network configurations across multiple ESXi hosts.
- D. To manage storage policies for datastores.

**Answer: C**

Explanation:

A Virtual Distributed Switch (VDS) in a vSphere environment enables centralized management of network configurations across multiple ESXi hosts. It simplifies network administration by allowing the administrator to configure network settings, such as VLANs, port groups, and policies, for multiple hosts at once, ensuring consistency and scalability.

#### NEW QUESTION # 81

A company plans to enhance its DevOps practices by implementing Kubernetes as part of a VMware Cloud Foundation (VCF) environment.

Which three steps must an administrator perform to achieve this integration? (Choose three.)
