SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q33-Q38):

NEW QUESTION # 33

A migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates it failed. What actions do you take to make the failed template(s) available in production?

- A. Import the template in production
- B. Request SAP intervention
- C. The template must always be rebuilt in production
- **D. Import the missing data in production and then import the template in production**

Answer: D

Explanation:

When template migration fails in Greenfield deployment, it often means required master data like Flex Master Data or enumerations are missing in Production. The recommended resolution is to manually load the missing master data into Production first, then manually import the failed templates via the Production import tools. Requesting SAP intervention is unnecessary as this is a customer-side activity.

Importing templates without missing data causes repeated failures, and rebuilding templates is not always required if proper data exists.

NEW QUESTION # 34

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- **A. SupplierContact - contacts for the suppliers**
- B. AMLExtension - AML customizations such as custom fields
- C. DynamicForm - custom form templates (dForms)
- D. Template - project templates such as Contract templates

Answer: A

Explanation:

The Intelligent Configuration Manager (ICM) migrates configuration types such as DynamicForms (dForms), AML Extensions (custom fields and enumerations), and Templates (contract or project templates). However, SupplierContact data, which is master or transactional data, is not migrated through ICM because ICM focuses on configuration migration, not operational or transactional data. Supplier contact information is managed separately and must be migrated using appropriate master data processes.

NEW QUESTION # 35

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? Note: There are 2 correct answers to this question.

- A. Units of Measure
- B. User to Group Mapping
- C. Enumerations
- D. Relation and Relation Entries

Answer: C,D

NEW QUESTION # 36

Which data elements are shared in a Suite-Integrated Environment? Note: There are 3 correct answers to this question.

- A. Exception Types
- B. Suppliers
- C. Supplier Catalogs
- D. User Group mapping
- E. Users

Answer: A,B,E

NEW QUESTION # 37

Which of the following can be used to define relation types and establish a custom relationship? Note: There are 2 correct answers to this question.

- A. A custom Enumeration such as Contracts_Contract Type
- B. A custom Flex Master Data Template such as vrealm 1936fmd_58984.Hospital
- C. A custom Form Template such as vrealm 1936.formDoc_18697.Lessons Learned
- D. A standard class such as ariiba.basic.core.CommodityCode

Answer: B,C

NEW QUESTION # 38

.....
