SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q52-Q57):

NEW QUESTION # 52

How does SAP AI support sales and marketing automation?

Please choose the correct answer.

Response:

- A. By automating workforce planning
- **B. By providing AI-driven lead scoring and customer insights**
- C. By generating payroll reports
- D. By managing cloud infrastructure

Answer: B

NEW QUESTION # 53

If a company implements SAP's Business AI offerings comprehensively, all things being equal, which bottom-line benefits could they expect? Note: There are 2 correct answers to this question.

- A. Revenue increase: up to 1.4%
- B. Gross profit increase: up to 3.5%
- **C. Revenue increase: up to 3.5%**
- **D. Gross profit increase: up to 1.4%**

Answer: C,D

Explanation:

Implementing SAP Business AI comprehensively can lead to significant financial benefits. According to SAP's official documentation, businesses can expect:

* An estimated 1.4% increase in gross profits.

* An estimated 3.5% increase in revenue.

These figures are based on SAP's analysis of the impact of AI-driven efficiencies and enhancements across various business processes. For instance, a company with €10 billion in revenue could see an annual bottom-line benefit of €141 million and a revenue impact of €352 million.

NEW QUESTION # 54

Which SAP module focuses on workplace safety and environmental compliance? Please choose the correct answer.

- A. SAP Predictive Analytics
- B. SAP Financial Closing Cockpit
- C. SAP Business Network
- **D. SAP Environment, Health, and Safety (EHS)**

Answer: D

Explanation:

SAP Environment, Health, and Safety (EHS) is the dedicated module for managing workplace safety and environmental compliance, ensuring organizations meet regulatory and sustainability standards. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.

SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing workplace safety, environmental compliance, and sustainability initiatives. It helps organizations comply with global regulations, ensure safe working conditions, and track environmental performance." SAP EHS enables companies to "monitor workplace incidents, manage safety protocols, and report on environmental compliance," such as emissions and waste management, to meet regulatory requirements. For example, it supports "tracking and reporting environmental data" to ensure adherence to standards, aligning with SAP's sustainability-focused solutions.

The incorrect options are unrelated to workplace safety and environmental compliance. SAP Business Network focuses on supplier collaboration and procurement, not safety or compliance. SAP Financial Closing Cockpit is used for financial reporting, not environmental or safety management. SAP Predictive Analytics supports forecasting and trend analysis, not compliance. SAP EHS

is the clear choice for this purpose, as confirmed by its role in SAP's sustainability portfolio.

NEW QUESTION # 55

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Embedded AI
- B. Ecosystem of Innovation
- C. AI Foundation
- D. Large Foundation Models
- E. Predictive Analytics

Answer: A,B,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.

Exact extracts supporting this:

Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com

AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Implies ecosystem

Other options are incorrect because:

Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.

Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C_BCBAI_2502 materials.

NEW QUESTION # 56

Match the benefit from the dropdown list to the SAP LeanIX AI capabilities.

□

Answer:

Explanation:

□

NEW QUESTION # 57
