

Exam CWNA-109 Voucher & Exam CWNA-109 Preparation

DOWNLOAD the newest VCETorrent CWNA-109 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1zoTkYbyJZIRSnWYE_LW3UGzuvHqzCw

Passing the CWNA-109 certification can prove that and help you realize your goal and if you buy our CWNA-109 quiz prep you will pass the exam successfully. Our product is compiled by experts and approved by professionals with years of experiences. You can download and try out our kTest CWNA-109 Quiz torrent freely before your purchase. Our purchase procedures are safe and our products are surely safe without any virus. After you purchase our CWNA-109 exam guide is you can download the test bank you have bought immediately.

CWNP CWNA-109 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Radio Frequency (RF) Technologies: This topic explains the basic features and behavior of RF. It also discusses applying the basic concepts of RF mathematics and measurement. Lastly, the topic covers RF signal characteristics and the functionality of RF antennas.
Topic 2	<ul style="list-style-type: none">WLAN Protocols and Devices: It focuses on terminology related to the 802.11 MAC and PHY, the purpose of the three main 802.11 frame types, MAC frame format, and 802.11 channel access methods.
Topic 3	<ul style="list-style-type: none">WLAN Network Architecture and Design Concepts: This topic deals with describing and implementing Power over Ethernet (PoE). Furthermore, the topic covers different wireless LAN architectures, coverage requirements, roaming considerations, and common proprietary features in wireless networks.
Topic 4	<ul style="list-style-type: none">WLAN Network Security: It addresses the concepts of weak security options, security mechanisms for enterprise WLANs, and security options and tools used in wireless networks.

- WLAN Regulations and Standards: The topic discusses the roles of WLAN and networking industry organizations. It also addresses the concepts of various Physical Layer (PHY) solutions, spread spectrum technologies, and 802.11 WLAN functional concepts.

Exam CWNA-109 Preparation & Latest CWNA-109 Exam Price

Living in such a world where competitiveness is a necessity that can distinguish you from others, every one of us is trying our best to improve ourselves in every way. It has been widely recognized that the CWNA-109 exam can better equip us with a newly gained personal skill, which is crucial to individual self-improvement in today's computer era. With the certified advantage admitted by the test CWNP certification, you will have the competitive edge to get a favorable job in the global market. Here our CWNA-109 Study Materials are tailor-designed for you.

CWNP Wireless Network Administrator (CWNA) Sample Questions (Q55-Q60):

NEW QUESTION # 55

You are using a site survey tool for post-implementation validation. You have installed the appropriate adapter driver and imported a floor plan. Now, you want to take the next step in proper tool use. What must you do before gathering survey data after the floor plan is imported?

- A. Calibrate the floor plan
- B. Nothing, you can simply start capturing signal readings
- C. Install iPerf
- D. Install WinPCAP

Answer: A

Explanation:

Calibrating the floor plan is what you must do before gathering survey data after the floor plan is imported when using a site survey tool for post-implementation validation. A site survey tool is a software application that can run on a laptop, tablet, smartphone, or other device that has a Wi-Fi adapter and a GPS receiver. A site survey tool can scan the wireless environment and collect information about the detected access points and client stations, such as their SSID, BSSID, channel, signal strength, security, and data rate. A site survey tool can also measure and display various metrics of network performance, such as throughput, jitter, packet loss, delay, and SNR. A site survey tool can also use a floor plan to visualize the wireless coverage and quality in different locations on a map. A floor plan is an image file that shows the layout and dimensions of a building or an area where the WLAN is deployed. A floor plan can be imported from various sources, such as a CAD file, a PDF file, an image file, or a Google Maps screenshot. After importing a floor plan into a site survey tool, it is necessary to calibrate the floor plan before gathering survey data. Calibrating the floor plan means adjusting the scale and orientation of the floor plan to match the actual size and direction of the area. Calibrating the floor plan can be done by using a reference point or a reference line that has a known distance or angle in the real world. Calibrating the floor plan ensures that the survey data is accurate and consistent with the physical environment. References: 1, Chapter 7, page 290; 2, Section 4.3

NEW QUESTION # 56

What security solution is deprecated in the 802.11 standard and should never be used in any modern WLAN deployment?

- A. Open System Authentication
- B. CCMP
- C. Shared Key Authentication
- D. AES

Answer: C

Explanation:

Shared Key Authentication is a security solution that was defined in the original 802.11 standard as an alternative to Open System

Authentication, which does not provide any security at all. Shared Key Authentication uses WEP (Wired Equivalent Privacy) to encrypt and authenticate data frames between the client station and the AP. However, WEP has been proven to be extremely vulnerable to various attacks that can easily crack the encryption key and compromise the network security. Therefore, Shared Key Authentication is deprecated in the 802.11 standard and should never be used in any modern WLAN deployment. NEW QUESTION # 57

Your manager asked you to locate a solution that allows for centralized monitoring of WLAN performance over time. He wants a single pane of glass for administration and monitoring of the solution. What do you recommend?

- A. Laptop-based protocol analyzers
- B. Laptop-based spectrum analyzers
- C. Overlay WLAN monitoring solution
- D. AP-based spectrum analysis

Answer: C

Explanation:

The solution that you recommend is an Overlay WLAN monitoring solution. An Overlay WLAN monitoring solution is a system that uses dedicated sensors or probes to monitor the WLAN performance over time. The sensors are deployed throughout the WLAN coverage area and collect data on various metrics such as signal strength, noise level, channel utilization, interference, throughput, latency, packet loss, and QoS. The sensors send the data to a centralized server or appliance that analyzes the data and provides a single pane of glass for administration and monitoring of the solution. An Overlay WLAN monitoring solution can help to detect and troubleshoot WLAN issues, optimize WLAN performance, and generate reports and alerts. NEW QUESTION # 58

Your consulting firm has recently been hired to complete a site survey for a company desiring an indoor coverage WLAN. Your engineers use predictive design software for the task, but the company insists on a pre-design site visit.

What task should be performed as part of the pre-design visit to prepare for a predictive design?

- A. Evaluate the building materials at the facility and confirm that the floor plan documents are consistent with the actual building
- B. Collect information about the company's security requirements and the current configuration of their RADIUS and user database servers
- C. Install at least one AP on each side of the exterior walls to test for co-channel interference through these walls
- D. Test several antenna types connected to the intended APS for use in the eventual deployment

Answer: A

Explanation:

A pre-design site visit in preparation for a predictive wireless LAN design is essential for gathering physical and environmental data about the site. The key tasks to be performed during such a visit include:

* Evaluating Building Materials: Different materials (concrete, glass, wood, etc.) have varying effects on RF signal propagation.

Understanding the materials present helps in accurately predicting how signals will behave within the environment.

* Floor Plan Verification: Ensuring that the floor plan documents are an accurate representation of the actual building layout is crucial. Discrepancies between the floor plans and the physical layout can lead to inaccuracies in the predictive design.

The other options, while potentially valuable in other contexts, are not directly related to preparing for a predictive design:

* Installing APs (option A) for testing co-channel interference is more aligned with an active site survey rather than a pre-design visit for a predictive design.

* Collecting information about security requirements (option B) is important but is not directly related to the physical aspects of the site that would impact a predictive design.

* Testing antenna types (option C) would typically be part of an active site survey or the actual deployment phase, not a pre-design visit for predictive modeling.

Therefore, option D is the correct answer, focusing on evaluating physical aspects crucial for accurate predictive modeling.

NEW QUESTION # 59

What 802.11 PHY uses available space in very low frequency ranges that is not in use at the time by broadcast video signals?

- A. DSSS
- **B. TVHT**
- C. SIG
- D. DMG

Answer: B

Explanation:

TVHT stands for Television Very High Throughput and it is a PHY defined by the 802.11af amendment. It uses the TV white space (TVWS) spectrum in the VHF and UHF bands between 54 and 790 MHz, which are not in use by broadcast video signals at the time. It can provide long-range and low-power connectivity for WLAN devices.

NEW QUESTION # 60

.....

Before the clients decide to buy our CWNA-109 test guide they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our CWNP Wireless Network Administrator (CWNA) study question, the quantity of the questions and the answers, the merits to use the products, the discounts, the sale guarantee and the clients' feedback after the sale. Secondly you could look at the free demos to see if the questions and the answers are valuable. You only need to fill in your mail address and you could download the demos immediately. So you could understand the quality of our CWNA-109 Certification file.
