Microsoft AZ-140 Certification Exam is designed for IT professionals who are responsible for configuring and managing Microsoft Azure Virtual Desktop (formerly known as Windows Virtual Desktop) environments. AZ-140 exam is intended to validate the candidate's knowledge and skills in configuring, deploying, and managing Azure Virtual Desktop environments. It also tests the candidate's understanding of the Azure Virtual Desktop architecture, security features, and management tools.

## Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q74-Q79):

### NEW QUESTION # 74

You have an Azure Virtual Desktop host pool that contains 10 session hosts.

You plan to configure each session host to use an FSLogix profile container that will exclude specific folders in the user profile. You need to perform the following configurations:

- \* Create a configuration file to list the excluded profile folders.
- \* Identify which registry setting will distribute the file to each session host automatically.

What should you name the configuration file, and which registry setting should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**Explanation**

Graphical user interface, text, application Description automatically generated

### **NEW QUESTION # 75**

Which users can create Pool4, and which users can join session hosts to the domain? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**Explanation**

### **NEW QUESTION # 76**

You have an Azure Virtual Desktop deployment.

You have a RemoteApp named App1.

You discover that from the Save As dialog box of App1, users can run executable applications other than App1 on the session hosts.

You need to ensure that the users can run only published applications on the session hosts.

What should you do?

- A. Configure an AppLocker policy on the session hosts.
- B. Modify the RDP Properties of the host pool.
- C. Modify the Access control (IAM) settings of the host pool
- D. Configure a conditional access policy in Azure Active Directory (Azure AD).

**Answer: A**

Explanation:

Prevent unwanted software from running on session hosts. You can enable App Locker for additional security on session hosts, ensuring that only the apps you allow can run on the host.

### **NEW QUESTION # 77**

You have an Azure subscription that contains a virtual machine named VM1. VM1 runs a customized version of Windows 10 Enterprise.

You generalize the operating system on VM1 and shut down the virtual machine.

You need to deploy additional virtual machines based on an image of VM1 by using the Azure portal.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Answer:**

Explanation:

**Explanation**

A picture containing graphical user interface Description automatically generated

## NEW QUESTION # 78

You are planning the deployment of Pool4.

What will be the maximum number of users that can connect to Pool4, and how many session hosts are needed to support five concurrent user sessions? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer:

### Explanation:
