## Reliable Information-Technology-Management Test Experience, Pass Information-Technology-Management Exam

Getting an authoritative IT certification will make a great difference to your career like Information-Technology-Management exam tests. The difficulty and profession of real questions need much time and energy to prepare, which can be solved by our Information-Technology-Management dumps torrent. The latest training materials are tested by IT experts and certified trainers who studied Information-Technology-Management Exam Questions for many years. The high quality of our vce braindumps are the guarantee of high passing score.

## WGU Information Technology Management QGC1 Sample Questions (Q22-Q27):

### NEW QUESTION # 22

What is the purpose of the Internet Use portion of the IT ethics policy?

- A. To improve worker productivity
- B. To identify company branding for use in communications
- C. To specify which email messages may be read by others

- D. To specify what a user can and cannot do with company printers

**Answer: A**

Explanation:

\* Purpose of Internet Use Policy in IT Ethics:

\* An Internet Use Policy is a subset of an organization's IT ethics policy. It outlines acceptable use of the organization's internet resources by employees.

\* By defining clear guidelines, the policy aims to minimize time wasted on personal browsing and ensure internet use aligns with business goals.

\* Relation to Worker Productivity:

\* The policy is designed to prevent misuse of the internet (e.g., excessive social media use or visiting non-work-related websites), which can negatively impact productivity.

\* Encouraging responsible use fosters a professional environment and helps employees focus on work-related tasks.

\* Why Other Options Are Incorrect:

\* Option B: Email monitoring may be part of broader IT security policies but is not the focus of Internet Use policies.

\* Option C: Branding guidelines apply to communication policies, not internet usage policies.

\* Option D: Printer usage is covered under equipment policies, not internet use policies.

\* IT Ethics and Acceptable Use Policies, ISO 27002

### NEW QUESTION # 23

What are ecological results of the expanded use of technology? Choose 2 answers.

- **A. Increased carbon emissions**
- B. Lengthened life span of computer equipment
- C. More people purchasing computer equipment
- D. Decreased electronic waste
- **E. Increased energy consumption**

**Answer: A,E**

Explanation:

\* Increased Carbon Emissions:

\* Technology relies on electricity, often generated from fossil fuels, leading to higher carbon emissions.

\* The production, transportation, and disposal of electronic devices contribute to the carbon footprint.

\* Increased Energy Consumption:

\* Expanded use of technology leads to higher energy demands for operating servers, cooling data centers, and powering devices.

\* The rise of 24/7 technology operations has amplified global energy consumption.

\* Why Other Options Are Incorrect:

\* Option A: The lifespan of technology tends to shorten due to rapid advancements and planned obsolescence.

\* Option C: While more devices are purchased, this does not directly indicate an ecological result.

\* Option D: Electronic waste has increased, not decreased, due to growing technology adoption and lack of recycling initiatives.

### NEW QUESTION # 24

Which benefit does a prototype provide to a client?

- A. Static example of the finished product
- B. Blueprint of the entire project
- C. Detailed instructions for development
- **D. Demonstration of interaction with the interface**

**Answer: D**

### NEW QUESTION # 25

Which type of logical data structure uses graphics to illustrate relationships among data elements?

- A. Structured query language
- B. Relational database model
- **C. Data model**
- D. Integration

**Answer: C**

Explanation:

\* Understanding Data Models:

\* A data model is a logical data structure that uses visual representations (e.g., diagrams) to illustrate relationships among data elements.

\* It helps in organizing data and defining how various entities interact within a database system.

\* Application in the Scenario:

\* The use of graphics to illustrate data relationships aligns with the concept of a data model.

\* Examples include entity-relationship diagrams (ERDs) and conceptual models.

\* Why Other Options Are Incorrect:

\* Option A (Integration): Integration connects systems or data sources but does not represent data relationships graphically.

\* Option B (Structured Query Language): SQL is used for querying and managing databases, not visualizing data structures.

\* Option D (Relational database model): This defines a specific type of database architecture but does not inherently involve graphics.

### NEW QUESTION # 26

Which gate of the Rational Unified Process (RUP) should the organization execute before validating the system architecture?

- **A. Elaboration**
- B. Inception
- C. Transition
- D. Construction

**Answer: A**

Explanation:

The Rational Unified Process (RUP) is an iterative software development framework with four phases: Inception, Elaboration, Construction, and Transition. The Elaboration phase comes after Inception and is focused on analyzing requirements, validating the system architecture, and addressing major risks before full-scale development begins.

Option B (Transition): Final phase, focused on deploying the system to end users.

Option C (Construction): Development and coding of the system, after architecture is validated.

Option D (Inception): Early phase, focused on business case and scope definition.

Thus, the correct phase before validating the system architecture is Elaboration.
