## AIGP Latest Dumps Sheet, AIGP Online Training Materials

There is no another great way to pass the IAPP AIGP exam in the first attempt only by doing a selective study with valid AIGP braindumps. If you already have a job and you are searching for the best way to improve your current AIGP test situation, then you should consider the AIGP Exam Dumps. By using our updated AIGP products, you will be able to get reliable and relative AIGP exam prep questions, so you can pass the exam easily. You can get one-year free AIGP exam updates from the date of purchase.

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q95-Q100):

### NEW QUESTION # 95

#### MULTI-SELECT

Please select 3 of the 5 options below. No partial credit will be given.  
Training an AI model is time-consuming because of?

- A. The maturity of AI governance.
- B. The volume of training data.
- C. The number of stakeholders.
- D. The quality of the training data.
- E. The complexity of the AI model.

**Answer: B,D,E**

Explanation:

Training an AI model is time-consuming primarily due to model complexity, large data volumes, and the need for high-quality, well-prepared data.

From the AI Governance in Practice Report 2024:

"Most AI requires sizeable amounts of high-quality data... to ensure desired and accurate output." (p. 15)

"The accuracy of AI model outputs depends significantly on the quality of their inputs." (p. 24)

"Complex AI systems... with many parameters... result in long development and training phases." (p. 32)

\* B. Maturity of governance affects oversight, not training time.

\* D. Number of stakeholders affects alignment, not direct training duration.

### NEW QUESTION # 96

If it is possible to provide a rationale for a specific output of an AI system, that system can best be described as?

- A. Explainable.
- B. Reliable.
- C. Accountable.
- D. Transparent.

**Answer: A**

Explanation:

If it is possible to provide a rationale for a specific output of an AI system, that system can best be described as explainable.

Explainability in AI refers to the ability to interpret and understand the decision-making process of the AI system. This involves being able to articulate the factors and logic that led to a particular output or decision. Explainability is critical for building trust, enabling users to understand and validate the AI system's actions, and ensuring compliance with ethical and regulatory standards. It also facilitates debugging and improving the system by providing insights into its behavior.

### NEW QUESTION # 97

After completing model testing and validation, which of the following is the most important step that an organization takes prior to deploying the model into production?

- A. Identify known edge cases to monitor post-deployment.
- B. Document maintenance teams and processes.
- C. Perform a readiness assessment.
- D. Define a model-validation methodology.

**Answer: C**

Explanation:

After completing model testing and validation, the most important step prior to deploying the model into production is to perform a readiness assessment. This assessment ensures that the model is fully prepared for deployment, addressing any potential issues related to infrastructure, performance, security, and compliance. It verifies that the model meets all necessary criteria for a successful launch. Other steps, such as defining a model-validation methodology, documenting maintenance teams and processes, and identifying known edge cases, are also important but come secondary to confirming overall readiness. Reference: AIGP Body of Knowledge on Deployment Readiness.

### NEW QUESTION # 98

Scenario:

A public sector agency is reviewing proposed AI use cases for improving services. It wants to prioritize implementations that deliver value but minimize unintended negative consequences.

When evaluating which AI use cases to implement, an organization should consider all of the following EXCEPT:

- A. Potential positive and negative impacts of the system
- B. Related TEVV (test, evaluate, verify, validate) and system metrics
- C. The users and their expectations
- D. Equitable access to the AI tool

**Answer: B**

Explanation:

The correct answer is A. While TEVV is important in later lifecycle phases, it is not the primary consideration when evaluating and prioritizing use cases.

From the AIGP Body of Knowledge - Use Case Assessment Module:

"Use case evaluation focuses on value, impact, fairness, and accessibility-technical testing considerations come later." ILT Guide confirms:

"Organizations should first assess whether the AI system provides equitable outcomes and aligns with stakeholder expectations. TEVV is part of implementation, not initial prioritization." Thus, A is not a top-level consideration during use case selection.

### NEW QUESTION # 99

What is the main purpose of accountability structures under the Govern function of the NIST AI Risk Management Framework?

- A. To establish diverse, equitable and inclusive processes.
- B. To determine responsibility for allocating budgetary resources.
- C. To enable and encourage participation by external stakeholders.
- **D. To empower and train appropriate cross-functional teams.**

**Answer: D**

Explanation:

The NIST AI Risk Management Framework's Govern function emphasizes the importance of establishing accountability structures that empower and train cross-functional teams. This is crucial because cross-functional teams bring diverse perspectives and expertise, which are essential for effective AI governance and risk management. Training these teams ensures that they are well-equipped to handle their responsibilities and can make informed decisions that align with the organization's AI principles and ethical standards. Reference: NIST AI Risk Management Framework documentation, Govern function section.

### NEW QUESTION # 100

.....

You can also accelerate your career with the IAPP AIGP certification if you study with our AIGP actual exam questions. We are certain that with these IAPP AIGP real exam questions you will easily prepare and clear the IAPP AIGP test in a short time. The only goal of TrainingQuiz is to help you boost the IAPP AIGP test preparation in a short time. To meet this objective, we offer updated and actual IAPP Certified Artificial Intelligence Governance Professional Expert AIGP Exam Questions in three easy-to-use formats. These formats are IAPP PDF Questions file, desktop IAPP AIGP practice test software, and IAPP AIGP web-based practice exam. All these three formats of our updated IAPP AIGP exam product have valid, actual, updated, and error-free AIGP test questions. You can quickly get fully prepared for the test in a short time by using our AIGP pdf questions.
