Free PDF OmniStudio-Developer - Salesforce Certified OmniStudio Developer High Hit-Rate Pass Test

DumpsValid online digital Salesforce OmniStudio-Developer exam questions are the best way to prepare. Using our Salesforce OmniStudio-Developer exam dumps, you will not have to worry about whatever topics you need to master. To practice for a Salesforce OmniStudio-Developer Certification Exam in the software (free test), you should perform a self-assessment.

Salesforce Certified OmniStudio Developer Sample Questions (Q21-Q26):

NEW QUESTION # 21
Refer to the exhibit below. A developer has configured an integration Procedure element with Additional input.
Alternatively, how could the developer configure SEND/RESPONSE TRNSFORMATION to send exactly the same data?
Assume the developer has un-checked Send Only Additional input.

- A.
- B.
- C.
- D.

Answer: A

Explanation:
The Send JSON Path syntax for accessing an element from an Integration Procedure structure is BlockName.ElementName. In this case, the BlockName is BlockX and the ElementName is ActionZ. The colon (:) is used to separate the input and output parameters, not the block and element names. The order of the block and element names should follow the hierarchy of the structure, from top to bottom. The Additional input parameter is not needed in this case, as it is already included in the Send JSON Path.

NEW QUESTION # 22
Refer to the exhibit below. What JSON code correctly represents the step in the OmniScript Structure panel shown?

- A.
- B.
- C.

Answer: B

Explanation:
The JSON code correctly represents the step in the OmniScript Structure panel shown. The JSON code has the following properties:
The type is "Step", which indicates that this is a step element in the OmniScript.
The label is "Step 1", which matches the label shown in the panel.
The name is "Step1", which matches the name shown in the panel.
The elements property is an array that contains one element, which is a text field.
The text field element has the following properties:
The type is "Text", which indicates that this is a text field element.
The label is "Text Field 1", which matches the label shown in the panel.
The name is "TextField1", which matches the name shown in the panel.
The value property is an empty string, which indicates that this text field has no default value.

NEW QUESTION # 23
The OmniScript must retrieve device details stored in the Asset object and then call an external system to send troubleshooting commands via REST API to the device.
Which two OmniScript element should the developer use to configure this functionality?

- A. REST API Action
- B. Navigation Action
- C. DataRaptor Extract Action
- D. SOQL Action
- E. HTTP Action

Answer: C,E

Explanation:
According to the OmniScript Action Elements page, a DataRaptor Extract Action can be used to "get data from one or more Salesforce records" and an HTTP Action can be used to "get, save, or delete data through a web application programming interface

(API)".

NEW QUESTION # 24

A developer creates a FlexCard with five state elements. For of the states have a condition. To test the FlexCard, the developer previews it using sample data that causes two of the states to have true conditions.
In this scenario, how will the developer know which state will display?

- A. The first state with true conditions sequence closest to the top of the FlexCard canvas will display.
- B. The first state with true nested condition, regardless of sequence in the FlexCard canvas, will display
- C. The first state with a true AND condition, regardless of sequence in the FlexCard canvas, will display.
- D. The state sequenced first in the FlexCard canvas will display.

Answer: D

NEW QUESTION # 25

Refer to the exhibit.

The card layout uses an integration Procedure as a data source. The cards use the layout data source.
Which JSON data structure supports this card layout and follows best practices?
A)

B)

C)

- A. Option C
- B. Option A
- C. Option B

Answer: A

NEW QUESTION # 26
