

# Trustable New C-ADBTP-2601 Real Exam | 100% Free New C-ADBTP-2601 Exam Format

Considering current situation, we made a survey and find that most of the customers are worried about their privacy disclosure. Here our C-ADBTP-2601 exam prep has commitment to protect every customer' personal information. About customers' privacy, we firmly safeguard their rights and oppose any illegal criminal activity with our C-ADBTP-2601 Exam Prep. We promise to keep your privacy secure with effective protection measures if you choose our C-ADBTP-2601 exam question. Given that there is any trouble with you, please do not hesitate to leave us a message or send us an email; we sincere hope that our C-ADBTP-2601 test torrent can live up to your expectation.

What are you waiting for? Opportunity knocks but once. You can get SAP C-ADBTP-2601 complete as long as you enter GuideTorrent website. You find the best C-ADBTP-2601 Exam Training materials, with our exam questions and answers, you will pass the exam.

>> New C-ADBTP-2601 Real Exam <<

## New C-ADBTP-2601 Exam Format | C-ADBTP-2601 Dumps Collection

We own three versions of the C-ADBTP-2601 exam torrent for you to choose. They conclude PDF version, PC version and APP online version. You can choose the most convenient version of the C-ADBTP-2601 quiz torrent. The three versions of the C-ADBTP-2601 test prep boost different strengths and you can find the most appropriate choice. For example, the PDF version is convenient for download and printing and is easy and convenient for review and learning. It can be printed into papers and is convenient to make notes. You can learn the C-ADBTP-2601 Test Prep at any time or place and repeatedly practice. The version has no limit for the amount of the persons and times. The PC version of C-ADBTP-2601 quiz torrent is suitable for the computer with Windows system. It can simulate real operation exam atmosphere and simulate exams.

## SAP Administrating SAP Business Technology Platform(C\_ADBTP\_2601) Sample Questions (Q10-Q15):

### NEW QUESTION # 10

#### SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.  
In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

**Answer:**

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

## **NEW QUESTION # 11**

### **SIMULATION**

Establish Shared Services

Task 1: Create a Shared Services Directory and Subaccounts

In your SAP BTP cockpit, create the directory Shared Services (Description: Shared Accounts) with your global account as the parent.

In the Shared Services directory, create the subaccount SH Dev (Description: Shared Services Development) with subdomain btpops#####-sh-dev in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.

In the Shared Services directory, create the subaccount SH Ops (Description: Shared Services Operations) with subdomain btpops#####-sh-ops in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.

### **Answer:**

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Make sure you are working in the correct global account before creating anything.

Why this matters:

The new directory and both subaccounts must be created inside the correct global account hierarchy.

Part A - Create the Shared Services Directory

Step 1 - Open Directories

What to do

In the SAP BTP Cockpit, open your Global Account.

In the left navigation menu, click Directories.

□ Explanation:

This is where you create and manage directory structures under the global account.

What to verify

You should now see the list of existing directories.

Step 2 - Create the Directory Shared Services

What to do

Click Create or Create Directory.

Enter the following values:

Name: Shared Services

Description: Shared Accounts

Parent: your Global Account

Click Create.

□ Explanation:

This creates a new top-level directory directly under the global account.

It will be used to hold the shared-services subaccounts.

What to verify

You should now see:

Shared Services

under the global account.

Part B - Create the SH Dev Subaccount

Step 3 - Open the Shared Services Directory

What to do

In the directory list, select Shared Services.

Explanation:

Both required subaccounts must be created inside this directory.

What to verify

You should now be inside the Shared Services directory.

Step 4 - Open Subaccounts

What to do

Inside Shared Services, open Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

Step 5 - Create SH Dev

What to do

Enter the following:

Display Name / Name: SH Dev

Description: Shared Services Development

Subdomain: btpops#####-sh-dev

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the shared services development subaccount in the required AWS Frankfurt region.

What to verify

After creation, you should see:

SH Dev

inside the Shared Services directory.

□ Part C - Create the SH Ops Subaccount

Step 6 - Start a New Subaccount

What to do

Still inside Shared Services, click Create → Subaccount again.

Explanation:

This opens the form for the second required subaccount.

Step 7 - Create SH Ops

What to do

Enter the following:

Display Name / Name: SH Ops

Description: Shared Services Operations

Subdomain: btpops#####-sh-ops

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the shared services operations subaccount in the same required region.

What to verify

After creation, you should see:

SH Ops

inside the Shared Services directory.

Final Expected Result for Task 1

You should now have:

Directory

Shared Services

Description: Shared Accounts

Parent: Global Account

Subaccounts inside Shared Services

SH Dev

Description: Shared Services Development

Subdomain: btpops#####-sh-dev

Region: AWS → Europe (Frankfurt) cf-eu10

SH Ops

Description: Shared Services Operations

Subdomain: btpops#####-sh-ops

Region: AWS → Europe (Frankfurt) cf-eu10

Common Mistakes to Avoid

1. Creating the directory in the wrong place

Shared Services must be created with:

parent = Global Account

2. Creating the subaccounts outside the directory

Both subaccounts must be created inside:

Shared Services

3. Wrong subdomain values

Use exactly:

btpops#####-sh-dev

btpops#####-sh-ops

Only replace ##### with your global account number.

4. Wrong region

Both subaccounts must use:

Amazon Web Services (AWS)

Europe (Frankfurt)

cf-eu10

5. Mixing up SH Dev and SH Ops

Be careful:

SH Dev = Shared Services Development

SH Ops = Shared Services Operations

**NEW QUESTION # 12**

SIMULATION

## Create Directories and Subaccounts

In a global account for SAP Business Technology Platform (BTP), create a hierarchy of subaccounts using directories.

### Task 1: Create Directories

In your SAP BTP cockpit, create the directory Americas (Description: Americas Accounts) with your global account as the parent.

Create the directory Eurasia (Description: Eurasia Accounts) with your global account as the parent.

Create the directory Partner (Description: Partner Accounts) with the Americas directory as the parent. Add the label access with value external.

Create the directory Human Resources (Description: Human Resources Accounts) with the Eurasia directory as the parent. Add the label access with value internal.

### Answer:

#### Explanation:

See the Explanation below for complete solution

#### Explanation:

##### Task 1: Create Directories

You need to create these directories:

Americas

Eurasia

Partner under Americas with label access=external

Human Resources under Eurasia with label access=internal

#### Before You Start

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

#### Step 1 - Create Directory Americas

##### What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

##### Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

##### What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

#### Step 2 - Create Directory Eurasia

##### What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:

Name: Eurasia

Description: Eurasia Accounts

Parent: your Global Account

Click Create.

##### Explanation:

This creates another top-level directory, parallel to Americas.

##### What to verify

You should now see both:

Americas

Eurasia

under the global account.

### Step 3 - Create Directory Partner under Americas

#### What to do

In the Directories area, select Americas.

Click Create Directory.

Enter:

Name: Partner

Description: Partner Accounts

Parent: Americas

Locate the Labels section.

Add a new label:

Key: access

Value: external

Click Create.

□

#### Explanation:

This creates Partner as a child directory under Americas.

The label is required and must be entered exactly:

access = external

This label helps classify the directory.

What to verify

Under Americas, you should now see:

Partner

and the directory should contain the label:

access=external

### Step 4 - Create Directory Human Resources under Eurasia

#### What to do

Go back to the Directories list.

Select Eurasia.

Click Create Directory.

Enter:

Name: Human Resources

Description: Human Resources Accounts

Parent: Eurasia

In the Labels section, add:

Key: access

Value: internal

Click Create.

□

#### Explanation:

This creates Human Resources as a child directory under Eurasia.

The required label is:

access = internal

What to verify

Under Eurasia, you should now see:

Human Resources

and the label should be:

access=internal

#### Final Expected Directory Structure

After completing Task 1, your structure must be exactly like this:

Global Account

Americas

Partner

Label: access=external

Eurasia

Human Resources

Label: access=internal

□

#### Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external  
Human Resources has label access=internal  
All names and descriptions are entered exactly as required  
Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia

Partner

Human Resources

4. Creating all directories directly under the global account

Only Americas and Eurasia are direct children of the global account.

Partner and Human Resources must be child directories.

## NEW QUESTION # 13

### SIMULATION

Task 2: Create Subaccounts in a Directory

In the Partner directory, create the subaccount AM PA Dev Test (Description: Partner Development and Testing) with subdomain btpops#####-am-pa-dev-test in the region Microsoft Azure → US West (WA) cf-us20.

In the Partner directory, create the subaccount AM PA Prod (Description: Partner Production) with subdomain btpops#####-am-pa-prod using AM PA Dev Test as source subaccount. Set the subaccount as used in production.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Task 2 - Create Subaccounts in a Directory

You must create these two subaccounts inside the Partner directory:

AM PA Dev Test

AM PA Prod

Important:

Replace ##### with your global account number

Enter all names and subdomains exactly

Be careful with hyphens and spaces

AM PA Prod must be marked as used in production

Before You Start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both subaccounts in this task must be created inside the Partner directory. If you create them under the global account or another directory, the task will be wrong.

Step 1 - Open the Partner Directory

What to do

In the left menu, click Directories.

In the directory list, select Partner.

Explanation:

The Partner directory is the container where both required subaccounts must be created.

What to verify

You should now be inside the Partner directory page.

Step 2 - Start Creating the First Subaccount

What to do

Inside the Partner directory, go to Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

What to verify

You should now see the form for creating a new subaccount.

Step 3 - Enter Data for AM PA Dev Test

What to do

Enter the following values:

Display Name / Name: AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Then choose the region:

Cloud Provider: Microsoft Azure

Region: US West (WA)

Environment / Technical Region: cf-us20

After checking all values, click Create.

□ Explanation:

This creates the development and testing subaccount for the Partner directory.

The important points are:

the subaccount name must match exactly

the subdomain must include your account number in place of #####

the region must be Microsoft Azure → US West (WA) cf-us20

What to verify

After creation, you should see the new subaccount:

AM PA Dev Test

inside the Partner directory.

Step 4 - Confirm the First Subaccount Exists

What to do

Check the subaccounts list under Partner.

Explanation:

Before creating the production subaccount, confirm that AM PA Dev Test was created successfully, because it will be used as the source subaccount for the next step.

What to verify

You should see:

AM PA Dev Test

If it is not there, do not continue until it is created correctly.

□ Step 5 - Start Creating the Second Subaccount

What to do

Still inside the Partner directory, click Create → Subaccount again.

Explanation:

This opens a new subaccount creation form for the production subaccount.

Step 6 - Enter Data for AM PA Prod

What to do

Enter the following values:

Display Name / Name: AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Then set:

Source Subaccount: AM PA Dev Test

Enable the production setting:

Used in Production: Yes

Then click Create.

□ Explanation:

This creates the production subaccount by using AM PA Dev Test as the source subaccount.

Using a source subaccount means SAP BTP copies base settings from the selected source, which helps keep configuration aligned.

The production indicator is mandatory here because this is the production subaccount.

What to verify

After creation, you should see:

AM PA Prod

inside the Partner directory, and it should be marked as a production subaccount.

Final Expected Result for Task 2

Inside the Partner directory, you must have these two subaccounts:

1. AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Region: Microsoft Azure → US West (WA) cf-us20

2. AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Source Subaccount: AM PA Dev Test

Used in Production: Yes

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong place

Both subaccounts must be created in:

Partner directory

Not in:

Global Account

Americas

Eurasia

Human Resources

2. Wrong subdomain format

Use exactly:

btpops#####-am-pa-dev-test

btpops#####-am-pa-prod

Replace only ##### with your global account number.

Do not:

remove hyphens

add spaces

misspell dev-test or pa-prod

3. Wrong region for AM PA Dev Test

It must be:

Microsoft Azure

US West (WA)

cf-us20

4. Forgetting the source subaccount for AM PA Prod

You must select:

AM PA Dev Test

as the source subaccount.

5. Forgetting the production flag

For AM PA Prod, make sure:

Used in Production is enabled

## NEW QUESTION # 14

.....

You don't need to enroll yourself in expensive C-ADBTP-2601 exam training classes. With the Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) (C-ADBTP-2601) valid dumps, you can easily prepare well for the actual SAP C-ADBTP-2601 Exam at home. Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) (C-ADBTP-2601) practice test software is compatible with windows and the web-based software will work on many operating systems.

**New C-ADBTP-2601 Exam Format:** <https://www.guidetorrent.com/C-ADBTP-2601-pdf-free-download.html>

Our practice test software is one of the best tools that you can use for the preparation of the SAP Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) C-ADBTP-2601 exam, Prepare for C-ADBTP-2601 exam with latest SAP s I C-ADBTP-2601 dumps exam questions update free try, SAP New C-ADBTP-2601 Real Exam It is easy to get bogged down by all the material you need to learn and lose sight of your goal, Additionally, you can set limit time to practice your C-ADBTP-2601 dumps pdf.

This allows you, the programmer, to define where play can take place, C-ADBTP-2601 One can be sure that the future will bring many more surprises to delight the graduate student just beginning his or her studies.

## 100% Pass Quiz Authoritative SAP - New C-ADBTP-2601 Real Exam
