Snowflake SnowPro Core Certification Exam Sample Questions (Q102-Q107):

NEW QUESTION # 102

Who can create and manage reader accounts? (Select TWO).

- A. A user with ACCOUNTADMIN role
- B. A user with ORGADMIN role
- C. A user with securityadmin role
- D. A user with SYSADMIN role
- E. A user with CREATE ACCOUNT privilege

Answer: A,B

Explanation:

In Snowflake, reader accounts are special types of accounts that allow data sharing with external consumers without them having

their own Snowflake account. The creation and management of reader accounts can be performed by users with the ACCOUNTADMIN role or the ORGADMIN role. The ACCOUNTADMIN role has comprehensive administrative privileges within a Snowflake account, including managing other accounts and roles. The ORGADMIN role, which is higher in hierarchy, oversees multiple accounts within an organization and can manage reader accounts across those accounts.

NEW QUESTION # 104

To use the overwrite option on insert, which privilege must be granted to the role?

- A. truncate
- B. DELETE
- C. UPDATE
- D. SELECT

Answer: B

Explanation:

To use the overwrite option on insert in Snowflake, the DELETE privilege must be granted to the role. This is because overwriting data during an insert operation implicitly involves deleting the existing data before inserting the new data.

* Understanding the Overwrite Option: The overwrite option (INSERT OVERWRITE) allows you to replace existing data in a table with new data. This operation is particularly useful for batch-loading scenarios where the entire dataset needs to be refreshed.

* Why DELETE Privilege is Required: Since the overwrite operation involves removing existing rows in the table, the executing role must have the DELETE privilege to carry out both the deletion of old data and the insertion of new data.

* Granting DELETE Privilege:

* To grant the DELETE privilege to a role, an account administrator can execute the following SQL command:

sqlCopy code

```
GRANT DELETE ON TABLE my_table TO ROLE my_role;
```

Reference: For additional details on inserting data with the overwrite option and the required privileges, consult the Snowflake documentation on data loading: <https://docs.snowflake.com/en/sql-reference/sql/insert>.
