

# 2026 Reliable Cisco Reliable 300-620 Exam Voucher

Exam Cisco 300-620 Learning - Latest 300-620 Exam Papers

P.S. Free & New 300-620 dumps are available on Google Drive shared by ExamTurnout: <https://drive.google.com/open?id=1jJaXSX3KZdTKTA-rTRm-QzDOX7EjYRaa>

People always tend to expect the great power of accumulation, thus the 300-620 study materials are not only helpful, but a learning process that also helps provide learners a solid base of knowledge. We have full confidence to ensure that you will have an enjoyable study experience with our 300-620 Study Materials, which are designed to ensure your interest and keep you from the exam more easily. You will have a better understanding after reading the following advantages:

**Cisco 300-620 Exam Topics:**

Topic	Weight	Objectives
ACI Management	25%	<ol style="list-style-type: none"> <li>1. Implement use of REST API on leaf</li> <li>2. Update existing and create services</li> <li>3. Implement configuration backup (manage-attaching support groups)</li> <li>4. Implement AAA and EEM</li> <li>5. Configure an interface</li> </ol>
Integration	15%	<ol style="list-style-type: none"> <li>1. Implement VMware vCenter OVS configuration</li> <li>2. Configure vMotion monitoring on VMs</li> <li>3. Implement service attach (attach as a vmmapi)</li> </ol>
ACI Fabric Forwarding	15%	<ol style="list-style-type: none"> <li>1. Describe endpoint learning</li> <li>2. Implement bridge domain configuration *** (abstract routing, Layer 2, unknown hardware entry, ARP flooding)</li> </ol>

Exam Code: 300-620 Exam Name: Implementing Cisco Application Centric Infrastructure

What's more, part of that Real4test 300-620 dumps now are free: <https://drive.google.com/open?id=1jJaXSX3KZdTKTA-rTRm-QzDOX7EjYRaa>

We offer you to take back your money, if you do not succeed in 300-620 exam. Such a guarantee in itself is concrete evidence on the unmatched quality of our 300-620 dumps. For the reason, they are approved not only by a large number of professionals who are busy in developing their careers but also by the industry experts. Get the right reward for your potential, believing in the easiest and to the point 300-620 Exam Questions that are meant to bring you a brilliant success in 300-620 exams.

Cisco 300-620 Certification Exam is an excellent way for IT professionals to demonstrate their knowledge and expertise in implementing Cisco Application Centric Infrastructure. Implementing Cisco Application Centric Infrastructure certification is highly valued by employers, and those who pass the exam can expect to see career advancement opportunities. With the right preparation and experience, candidates can confidently take the exam and earn their certification.

## Free 300-620 Exam - 300-620 Premium Files

Do you want to spend half of time and efforts to pass 300-620 certification exam? Then you can choose Real4test. With efforts for years, the passing rate of 300-620 exam training, which is implemented by the Real4test website worldwide, is the highest of all. With Real4test website you can download 300-620 free demo and answers to know how high is the accuracy rate of 300-620 test certification training materials, and to determine your selection.

## Certification Path for Implementing Cisco Application Centric Infrastructure (300-620 DCACI)

To fully benefit from this exam, you should have the following knowledge and skills:

- Familiarity with Cisco Ethernet switching products
- Familiarity with virtualization fundamentals
- Understanding of networking protocols, routing, and switching
- Understanding of Cisco data center architecture

The following Cisco courses may help you meet these prerequisites:

- Implementing and Administering Cisco Solutions (CCNA) v1.0
- Understanding Cisco Data Center Foundations (DCFNDU) v1.0

**The 300-620 Exam evaluates the candidates' understanding of Cisco switches running in the ACI mode and includes the topics, such as ACI fabric, ACI management ACI anywhere, etc. Thus, you should be fluent in configuring, implementing, and managing Cisco switches in the ACI mode to get through this test. All in all, the exam syllabus consists of 6 knowledge areas specified by the vendor. All of these domains will contribute a certain percentage to the overall number of questions, which represent the following:**

- **Integrations (15%):** To be able to answer the questions from this area, a potential candidate has to learn about the implementation of the VMware vCenter DVS integration and service graph (unmanaged and managed). Your understanding of resolution immediacy in VMM is what should be part of your knowledge base as well;
- **ACI Fabric Infrastructure (20%):** This topic covers the information of ACI hardware, topology, fabric discovery, and object model. It is important to be able to implement the ACI policies and ACI logical constructs as well as use event record, audit log, and faults;
- **ACI Management (20%):** This is one of the biggest modules of the exam that covers the implementation of configuration backup, in-band and out-of-band, as well as RBAC and AAA. You need to know how to configure an upgrade and use snmp services and syslog.

### Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q305-Q310):

#### NEW QUESTION # 305

An engineer configured Layer 2 extension from the ACI fabric and changed the Layer 2 unknown unicast policy from Flood to Hardware Proxy. How does this change affect the flooding of the L2 unknown unicast traffic?

- A. It is forwarded to one of the APICs to perform as a proxy.
- **B. It is forwarded to one of the spines to perform as a spine proxy.**
- C. It is dropped by the leaf when the destination endpoint is not present in the endpoint table.
- D. It is flooded within the whole fabric.

**Answer: B**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/2-x/L2\\_config/b\\_Cisco\\_APIC\\_Layer\\_2\\_Configuration\\_Guide/b\\_Cisco\\_APIC\\_Layer\\_2\\_Configuration\\_Guide\\_chapter\\_010.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/2-x/L2_config/b_Cisco_APIC_Layer_2_Configuration_Guide/b_Cisco_APIC_Layer_2_Configuration_Guide_chapter_010.html)

#### NEW QUESTION # 306

An application team tells the Cisco ACI network administrator that it wants to monitor the statistics of the unicast and BUM traffic that are seen in a certain EPG. Which statement describes the collection statistics?

- A. EPG statistics can be collected only for VMM domains. If a physical domain exists, statistics are not collected.
- B. Cisco ACI does not capture statistics at the EPG level. Only statistics that pass through ACI contracts can be monitored.

- C. The collection of statistics is enabled on the EPG level by enabling the statistics for unicast and BUM traffic.
- D. All EPGs in the Cisco ACI tenant object must be enabled for statistics to be collected.

**Answer: C**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/Operating\\_ACI/guide/b\\_Cisco\\_Operating\\_ACI/b\\_Cisco\\_Operating\\_ACI\\_chapter\\_01011.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/Operating_ACI/guide/b_Cisco_Operating_ACI/b_Cisco_Operating_ACI_chapter_01011.html)

### EPG Level Statistics

The application owner would like to be able to monitor network-related information for their application, such as the aggregate amount of traffic to a specific tier. As an example, we will monitor the amount of traffic to the web tier of a given application. In this example, the default monitoring policies are appropriate, and they are simply extracting them from the system to be consumed externally. This information is useful in scenarios such as a new release being pushed, and to make sure that no traffic anomalies are created after the push.

### NEW QUESTION # 307

An engineer must configure a Layer 3 connection to the WAN router. The hosts in production VRF must access WAN subnets. The engineer associates EPGs in the production VRF with the external routed domain. Which action completes the task?

- A. Configure the Export Route Control Subnet scope for the external EPG.
- B. Configure the External Subnets for the External EPG scope for the external EPG.
- C. Configure the Import Route Control Subnet scope for the external EPG.
- D. Configure the Shared Route Control Subnet scope for the external EPG.

**Answer: A**

Explanation:

To complete the task of configuring a Layer 3 connection to the WAN router and allowing hosts in the production VRF to access WAN subnets, the engineer should configure the Export Route Control Subnet scope for the external EPG. This setting allows the subnets associated with the external EPG to be advertised to external routers, enabling connectivity to the WAN.

### NEW QUESTION # 308

A Cisco ACI fabric is integrated with VMware VDS. The fabric must apply a security policy to check the integrity of traffic out of the network adapter. Which action must be taken to drop the packet when the ESXi host discovers a mismatch between the actual source MAC address transmitted by the guest operating system and the effective MAC address of the virtual machine adapter?

- A. Accept forged transmits.
- B. Accept MAC changes.
- C. Reject MAC changes.
- D. Reject forged transmits.

**Answer: D**

### NEW QUESTION # 309

Refer to the exhibit A Cisco ACI fabric is using out-of-band management connectivity.

The APIC must access a routable host with an IP address of 192.168.11.2.

Which action accomplishes this goal?

properties

Name: Rostan-oob-mgmt-01

ALL ALL\_IN\_POD range

Node Blocks:

From	To
1	1
101	101
102	102
201	201

Nodes Within The Policy:	ID	Name	Out-of-Band Management IP	Out-of-Band Management Gateway	In-Band Management IP	In-Band Management Gateway
	1	apic 1	172.16.31.85 fe80::200:ff:fe0:0	172.16.31.254/24	192.168.11.1 fc00::1
