Nowadays, our learning methods become more and more convenient. Advances in technology allow us to learn freely on mobile devices. However, we understand that some candidates are still more accustomed to the paper, so our Information-Technology-Management study materials provide customers with a variety of versions to facilitate your learning process: the PDF, Software and APP online. These three versions of our Information-Technology-Management Practice Engine can provide you study on all conditions. Come and buy our Information-Technology-Management exam guide!

To pass the WGU Information-Technology-Management certification exam, you need to master complicated subjects related to WGU Information Technology Management QGC1. PassTestking verified WGU Information-Technology-Management pdf questions can help you prepare for this exam by covering every topic in the exam and giving you the opportunity to practice for the actual exam. Download PassTestking WGU Information-Technology-Management PDF Questions today and get ready to demonstrate your expertise in solving complex WGU real-life problems.

Information-Technology-Management: WGU Information Technology Management QGC1 – 100% free

As is known to us, a suitable learning plan is very important for all people. For the sake of more competitive, it is very necessary for you to make a learning plan. We believe that our Information-Technology-Management actual exam will help you make a good learning plan. You can have a model test in limited time by our Information-Technology-Management Study Materials, if you finish the model test, our system will generate a report according to your performance. You can know what knowledge points you do not master. By the report from our Information-Technology-Management study questions. Then it will be very easy for you to pass the Information-Technology-Management exam.

WGU Information Technology Management QGC1 Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which method of encryption enables secure communication using a shared secret key?

- A. Secure hashing
- **B. Symmetrical encryption**
- C. Asymmetrical encryption
- D. Data masking

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Symmetrical (symmetric) encryption uses a single shared secret key for both encryption and decryption of data. Both the sender and the receiver must have access to the same key, and the security of the communication depends on keeping that key confidential.

Key points about symmetric encryption:

One key for both directions: The same key encrypts plaintext and decrypts ciphertext.

Fast and efficient: Often used for encrypting large amounts of data (e.g., AES).

Commonly used in secure channels after an initial key exchange has occurred.

Why the other options are incorrect:

A . Asymmetrical encryption - Uses a public key for encryption and a private key for decryption. It does not rely on a single shared secret key; rather, it uses a key pair.

B . Secure hashing - A hash function transforms data into a fixed-size value; it is one-way and does not support decryption. Hashing is not an encryption method for secure two-way communication.

C . Data masking - Obscures data (e.g., hiding digits of a credit card number) for privacy in non-production use or display; it is not an encryption method for secure communication.

Therefore, the correct answer is D. Symmetrical encryption, because it specifically involves secure communication using a shared secret key known to both parties.

NEW QUESTION # 40

What is a method for confirming users' identities?

- A. Authorization
- **B. Authentication**
- C. Information secrecy
- D. Public key encryption

Answer: B

NEW QUESTION # 41

In which way is decision-making different from vision in leadership?

- A. Decision-making explores broad goals for long-term impact.

- B. Decision-making addresses current priorities and actions.
- C. Decision-making facilitates collaboration across departments.
- D. Decision-making outlines a strategic framework for innovation.

Answer: B

Explanation:

In leadership, vision is about setting a broad, long-term direction, while decision-making focuses on current priorities and specific actions needed to address immediate organizational needs. Vision provides the framework, and decision-making implements practical steps within that framework.

Option B: Incorrect-collaboration may result from decisions, but this is not the key difference from vision.

Option C: Incorrect-exploring broad goals is part of vision, not decision-making.

Option D: Incorrect-outlining strategic frameworks is part of vision, not decision-making.

Thus, the key distinction is that decision-making addresses current priorities and actions.

WGU Information Technology Management - Leadership and Decision-Making, section on Vision vs. Decisions.

NEW QUESTION # 42

What is the definition of the accountability vs. ownership paradox?

- A. An evaluation of where a business is headed, what it wants to achieve, and how it will support its objectives
- B. A situation in which the CEO is concerned they might be overlooking a digital disrupter that competitors have surely discovered
- C. The ability to use a uniquely enterprise view to create business process change
- D. A situation in which a company's CIO is responsible for the outcomes of technology implementations but does not have the power to change ' business processes

Answer: D

NEW QUESTION # 43

Which software carries out a set of operations on behalf of a user with a degree of independence and employs knowledge of the user's goals?

- A. Autonomous agent
- B. Information of Everything
- C. Ambient digital experience
- D. Virtual assistant

Answer: A

Explanation:

* Understanding Autonomous Agents:

* An autonomous agent is a software entity capable of performing tasks on behalf of a user independently.

* It employs knowledge of the user's goals and adapts to achieve them.

* Examples of Autonomous Agents:

* Examples include shopping bots, automated trading systems, and decision-making software.

* Why Other Options Are Incorrect:

* Option A (Information of Everything):Refers to interconnected data but not software entities.

* Option B (Virtual assistant):Virtual assistants interact with users but are not fully autonomous.

* Option D (Ambient digital experience):Refers to seamless digital interaction, not task automation.
