

# Fortinet FCP\_FMG\_AD-7.6 Valid Exam Papers | Latest FCP\_FMG\_AD-7.6 Dumps Ppt

What's more, part of that Exams4sures FCP\_FMG\_AD-7.6 dumps now are free: [https://drive.google.com/open?id=1QyJx\\_Ju70iUkzYQKcTXg0EjBULWqz95E](https://drive.google.com/open?id=1QyJx_Ju70iUkzYQKcTXg0EjBULWqz95E)

The Fortinet FCP\_FMG\_AD-7.6 exam offers a great opportunity for beginner and experienced to validate their expertise in a short time period. To do this they just need to pass the FCP - FortiManager 7.6 Administrator FCP\_FMG\_AD-7.6 Certification Exam which is not an easy task. And Exams4sures offers latest FCP\_FMG\_AD-7.6 exam practice, exam pattern and practice exam online.

## Fortinet FCP\_FMG\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Troubleshooting</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.</li></ul>

## Latest FCP\_FMG\_AD-7.6 Dumps Ppt, FCP\_FMG\_AD-7.6 Test Assessment

Our FCP - FortiManager 7.6 Administrator (FCP\_FMG\_AD-7.6) PDF dumps format contains Fortinet FCP\_FMG\_AD-7.6 questions that are real and updated. You can print these FCP - FortiManager 7.6 Administrator (FCP\_FMG\_AD-7.6) questions if

you prefer an off-screen study. Otherwise, you can use this FCP\_FMG\_AD-7.6 PDF document from any location via your laptops, tablets, and smartphones. Time restrictions do not halt FCP - FortiManager 7.6 Administrator (FCP\_FMG\_AD-7.6) exam preparation as you can use FCP - FortiManager 7.6 Administrator (FCP\_FMG\_AD-7.6) exam dumps pdf whenever you have free time.

## Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q16-Q21):

### NEW QUESTION # 16

What are two expected results when both FortiManager and FortiGate are behind network address translation NAT devices? Choose two answers

- **A. FortiGate is discovered by FortiManager through the FortiGate NATed IP address.**
- B. FortiGate can announce itself to FortiManager only if the FortiManager non-NATed IP address is configured on FortiGate under central management.
- C. If the FortiGate-FortiManager communication protocol FGFM tunnel is torn down, FortiManager will try to reestablish the FGFM tunnel.
- **D. During discovery, the FortiManager NATed IP address is not set by default on FortiGate.**

**Answer: A,D**

Explanation:

The FortiManager 7.6 Administrator Study Guide is explicit for the scenario where both FortiManager and FortiGate are behind NAT . It states that FortiManager can discover FortiGate through the FortiGate NATed IP address , which makes A correct. It also explains that in this scenario, the FortiManager NATed IP address is not configured on FortiGate by default under central management , which makes B correct.

C is incorrect because FortiGate must use the FortiManager NATed IP address , not the non-NATed IP, if it needs to announce itself or reestablish the FGFM tunnel. D is also incorrect because in this NAT scenario, if the tunnel is torn down, only FortiGate attempts to reestablish the connection ; FortiManager does not automatically do so.

---

### NEW QUESTION # 17

An administrator sees that the policy package status of HQ-NGFW-1 is Never Installed. What can you conclude from this status? Choose one answer

- A. The policy package was never imported to the revision history after HQ-NGFW-1 was registered on FortiManager.
- **B. The firewall policies exist only in the HQ-NGFW-1 device-level database, and no policy package has been assigned to the firewall.**
- C. The policies have not yet been retrieved from the HQ-NGFW-1 device-level database of FortiManager.
- D. The firewall policies were created or changed in the ADOM, and they need to be installed on the managed HQ-NGFW-1 for the first time.

**Answer: B**

Explanation:

The correct conclusion is D . The FortiManager 7.6 Administrator Study Guide defines Never Installed as a state where the policy package was never created and was never imported for a managed device . That means FortiManager may already know the device itself at the device layer, but the firewall policy layer has not yet been built for that device.

The lab guide confirms this behavior directly: when you choose Import Later in the Add Device wizard, the policy package status becomes Never Installed because there is still no policy package created for the added FortiGate devices.

So this is not a revision-history issue, and it does not mean ADOM policy changes are merely waiting for first install. It means the policies still exist only on the managed device side until they are imported into a FortiManager policy package.

---

### NEW QUESTION # 18

Refer to the exhibit.

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

What are two results from the configuration shown in the exhibit? (Choose two.)

- A. The administrator must have access to the ADOM to approve changes.
- B. Ungraceful closed sessions will keep the ADOM in a locked state until the administrator session times out.
- C. The administrator can lock policy blocks and FortiManager global ADOM.
- D. The same administrator can lock more than one ADOM at the same time.

**Answer: B,C**

Explanation:

In normal workspace mode, ungraceful session closures will keep the ADOM locked until the session times out, preventing other administrators from editing.

Normal workspace mode allows administrators to lock policy blocks and the global ADOM, providing granular locking control.

#### **NEW QUESTION # 19**

Refer to the exhibit. An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

## FortiManager address object

### Edit Address - LAN

Category: Address

Name: LAN

Color:

Type: Subnet

IP/Netmask: 172.16.5.0/255.255.255.0

Interface: any

Static Route Configuration:

Comments:   
0/255

Add To Groups:

Advanced Options >

Per-Device Mapping v

<input type="checkbox"/>	Mapped Device	Details	<input type="button" value="Settings"/>
<input type="checkbox"/>	BR1-FGT-1 [root]	IP/Netmask: 10.10.10.5/255.255.255.255	
<input type="checkbox"/>	HQ-NGFW-1 [root]	IP/Netmask: 172.16.5.20/255.255.255.255	
<input type="checkbox"/>	Remote-Firewall [root]	IP/Netmask: 21.21.2.5/255.255.255.255	

3

FORTINET®

After the installation operation is performed, which IP/netmask will be installed on Remote- Firewall [VDOM1] for the LAN firewall address object?

- A. 172.16.5.0/255.255.255.0
- B. 21.21.2.5/255.255.255.255
- C. 10.10.10.5/255.255.255.255
- D. 172.16.5.20/255.255.255.255

Answer: B

Explanation:

The per-device mapping overrides the global IP/netmask setting for the firewall address object.

For the device "Remote-Firewall," the mapped IP/netmask is 21.21.2.5/255.255.255.255, so this value will be installed on Remote-Firewall [VDOM1].

### NEW QUESTION # 20

FortiGate is integrated with FortiAnalyzer and FortiManager.

When creating a firewall policy, which attribute must an administrator include to enhance functionality and enable log recording on FortiAnalyzer and FortiManager?

- A. Log ID
- B. Sequence ID
- C. Universally Unique Identifier
- D. Policy ID

**Answer: C**

Explanation:

The correct answer is C . The uploaded FortiManager 7.6 Administrator Lab Guide gives the exact extract:

"FortiManager will update the universally unique identifiers (UUID) without deleting other configurations" and "UUIDs on both FortiGate and FortiManager are critical for ensuring the unique identification, consistency, and correct management of firewall policies across multiple devices and configurations. They provide a reliable and immutable reference for policies." The same source also shows administrators enabling UUIDs in Traffic Log on FortiGate log settings, which supports the logging and policy-correlation use case with FortiAnalyzer/FortiManager.

So the attribute that improves policy identification and logging correlation is the Universally Unique Identifier , not Policy ID, Log ID, or Sequence ID.

### NEW QUESTION # 21

.....

If you don't progress and surpass yourself, you will lose many opportunities to realize your life value. Our FCP\_FMG\_AD-7.6 study training materials goal is to help users to challenge the impossible, to break the bottleneck of their own. A lot of people can't do a thing because they don't have the ability, the fact is, they don't understand the meaning of persistence, and soon give up. Our FCP\_FMG\_AD-7.6 Latest Questions will help make you a persistent person. Change needs determination, so choose our FCP\_FMG\_AD-7.6 training braindump quickly! Our FCP\_FMG\_AD-7.6 exam questions can help you pass the FCP\_FMG\_AD-7.6 exam without difficulty.
