First-Grade Salesforce ADX-211: Exam Administer, Extend, and Automate Salesforce Study Guide - Pass-Sure CramPDF ADX-211 Actual Dump

To avoid this situation, we recommend you ADX-211 real dumps. This product contains everything you need to crack the ADX-211 certification exam on the first attempt. By choosing CramPDF's updated dumps, you don't have to worry about appearing in the Administer, Extend, and Automate Salesforce (ADX-211) certification exam. CramPDF Salesforce ADX-211 Dumps are enough to get you through the Administer, Extend, and Automate Salesforce (ADX-211) actual exam on the first try.

Salesforce Administer, Extend, and Automate Salesforce Sample Questions (Q101-Q106):

NEW QUESTION # 101

The administrator at Cloud Kicks is evaluating the capabilities of Schema Builder to create custom objects and custom fields. The administrator likes the user interface of the Schema Builder, as opposed to the new object and field wizards, but also notices some limitations.

What needs to be configured from the object manager instead of Schema Builder?

- A. Enable field history tracking
- B. Add custom fields to the page layout.

- C. Allow Reports and Activities
- D. Make available for Customer Postal.

Answer: A

Explanation:

Field history tracking is a feature that allows you to monitor changes to certain fields on an object and display them in a history related list. Field history tracking can help you audit data quality, compliance, or business processes. Field history tracking cannot be configured from Schema Builder, but it can be configured from Object Manager. In Object Manager, you can select an object and enable field history tracking from its settings page. Then, you can choose up to 20 fields per object to track and add the history related list to the page layout. Reference: https://help.salesforce.com/s/articleView?id=sf.tracking_field_history.htm&type=5
https://help.salesforce.com/s/articleView?id=sf.schema_builder_overview.htm&type=5

NEW QUESTION # 102

The Sales Manager at Universal Containers would like a dashboard to view each of the sales representative's opportunities, accounts, and related cases. What is a recommended solution?

- A. Create an individual dashboard for each sales representative with opportunity, account, and case components.
- B. Create a dashboard and add filters for users, opportunities, accounts, and cases.
- C. Create a dynamic dashboard and add filters for opportunities, accounts and cases.
- D. Create a dynamic dashboard and insure the sales manager has the "View My Team's Dashboard" permission.

Answer: D

NEW QUESTION # 103

Sales management wants a small subset of users with different profiles and roles to be able to view all data for compliance purposes. How can an administrator meet this requirement?

- A. Enable the View All Data permission for the roles of the subset of users.
- B. Assign delegated administrator to the subset of users to View All Data.
- C. Create a new profile and role for the subset of users with the View All Data permission.
- D. Create a permission set with the View All Data permission for the subset of users.

Answer: D

NEW QUESTION # 104

DreamHouse Realty (DR) wants to ensure that its data is protected. There have been several recent attempts to phish employees. What should DR do to help ensure that the user that is logged in is the right user when the running user is trying to view reports and dashboards?

- A. Require a high assurance session when exporting or printing reports and dashboards.
- B. Set up an authentication provider for reports and dashboards.
- C. Require a Username, Password, and Security Token when logging in.
- D. Require MFA when users need to view and export dashboards and reports.

Answer: A

NEW QUESTION # 105

The sales team at Cloud Kicks is noticing that sales reps are misusing the new Screen Flow tool for data entry, since they are viewed the initial screen after clicking finish.

What should the administrator do to fix this?

- A. Create a new flow to redirect the user when the other flow finishes.
- B. Update the flow with a local redirect action.
- C. Use a lightning action to redirect the user
- D. Add a trigger to redirect the user to a new page.

Answer: C

Explanation:

A lightning action is a type of quick action that can invoke a Lightning component, a Visualforce page, or a URL. The administrator can use a lightning action to redirect the user to a different page after they finish the screen flow. This way, the user will not see the initial screen again and will not misuse the flow tool.
