The contents of H12-891_V1.0 test questions are compiled strictly according to the content of the exam. The purpose of our preparation of our study materials is to allow the students to pass the exam smoothly. H12-891_V1.0 test questions are not only targeted but also very comprehensive. Although experts simplify the contents of the textbook to a great extent in order to make it easier for students to learn, there is no doubt that H12-891_V1.0 Exam Guide must include all the contents that the examination may involve. We also hired a dedicated staff to constantly update H12-891_V1.0 exam torrent. With H12-891_V1.0 exam guide, you do not need to spend money on buying any other materials. During your preparation, H12-891_V1.0 exam torrent will accompany you to the end.

Huawei HCIE-Datcom V1.0 Sample Questions (Q221-Q226):

NEW QUESTION # 221

In OSPF, an ABR translates all Type 7 LSAs in a Not-So-Stubby Area (NSSA) into Type 5 LSAs.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Comprehensive and Detailed In-Depth

In OSPF, a Not-So-Stubby Area (NSSA) is a type of area that allows for the injection of external routes (like a standard area) while maintaining some stub area characteristics.

Type 7 LSAs (NSSA External LSAs) are generated by ASBRs within an NSSA.

An ABR at the NSSA boundary translates these Type 7 LSAs into Type 5 LSAs to propagate them into the rest of the OSPF domain.

This translation is necessary because Type 5 LSAs are the standard method for advertising external routes in OSPF.

Therefore, the statement is TRUE.
