Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q131-Q136):

NEW QUESTION # 131

Which Cisco UCM programming interface provides data that is needed to compile a report of call volume, trunk utilization, and cost and billing estimates?

- A. JTAPI
- B. CDRonDemand API
- C. RisPort70 SOAP API
- D. Perfinon SOAP API

Answer: B

Explanation:

The CDRonDemand API provides access to Call Detail Records (CDRs) and Call Management Records (CMRs) from Cisco UCM. These records are essential for generating reports related to call volume, trunk utilization, and cost/billing estimates.

NEW QUESTION # 132

After registering your webex room phone, the member wants to view system messages for error reports. Where can the system messages be viewed in the room phone? (Choose two.)

- A. Menu options > Settings
- B. Issues and Diagnostics > Status Messages
- C. Settings > About the device
- D. Issues and Diagnostics > System messages
- E. Menu options > messages

Answer: A,B

NEW QUESTION # 133

Drag and Drop Question

Drag and drop the code snippets from the bottom onto the blanks in the code to implement a call using the Cisco Webex REST API to retrieve 10 messages in an organization created between October 10th 2019 and October 12th 2019. Not all options are used.

Answer:

Explanation:

Explanation:

The HTTP method must be GET since data is being retrieved.

resource=messages specifies the resource type.

type=created filters for events when messages were created.

from sets the start timestamp, and to indicates the end timestamp.

Even if &to isn't the official parameter, it is the correct choice because until can't be placed correctly without a matching &.

This retrieves up to 10 messages created within the specified time window.

NEW QUESTION # 134

Refer to the exhibit.
