New F5CAB5 Test Cram - F5CAB5 Question Explanations

This professionally designed desktop practice exam software is customizable, which helps you to adjust timings and questions of the mock tests. This feature of Windows-based BIG-IP Administration Support and Troubleshooting software helps you improve time-management abilities and weak areas of the test preparation. We regularly upgrade this F5 F5CAB5 Practice Exam software after receiving valuable feedback from experts worldwide.

F5 BIG-IP Administration Support and Troubleshooting Sample Questions (Q39-Q44):

NEW QUESTION # 39

Refer to the exhibit. A user with IP address 192.168.162.70 is unable to connect to an HTTP application. What is a possible cause within the Virtual Server configuration?

- A. The Service Port is configured as 0 *All Ports
- B. The Destination Address is configured as 192.168.162.80
- C. The Virtual Server is configured as a Standard Type
- **D. The Source Address is configured as 10.128.10.0/24**

Answer: D

Explanation:

The failure to connect is caused by a restrictive Source Address filter configured on the Virtual Server.

Source Address Filtering: In the BIG-IP system, the Source Address field on a Virtual Server acts as an implicit Access Control List (ACL). Only traffic originating from a client IP address that matches the specified network range will be accepted and processed by the Virtual Server.

Analyzing the Exhibit: The provided configuration for vs_http shows the Source Address is set to 10.128.10.0/24. This means the Virtual Server will only accept connections from the subnet ranging from 10.128.10.1 to 10.128.10.254.

Identifying the Conflict: The user trying to connect has the IP address 192.168.162.70. Since 192.168.162.70 does not fall within the allowed 10.128.10.0/24 range, the BIG-IP system will not match this traffic to the Virtual

Server, effectively blocking the connection attempt.

NEW QUESTION # 40

A BIG-IP Administrator disabled a virtual server with a pool that has a working health monitor. How does the status icon look for this virtual server?

- A. Red square
- B. Red circle
- C. Black square
- D. Black circle

Answer: D

Explanation:

BIG-IP status icons provide immediate visual feedback regarding the state of an object based on its availability and enabled/disabled status.

Color (Black): The color black indicates that an object has been manually Disabled by an administrator.

Shape (Circle): The circular shape indicates that the object is Available (i.e., its health monitors are passing).

Scenario Result: Since the virtual server is manually disabled (Black) but its associated pool has a working health monitor that is currently passing (Circle), the resulting icon is a Black Circle.

NEW QUESTION # 41

What information is required for a BIG-IP Administrator to open an F5 Support ticket?

- A. Serial number of the device, qkview, packet capture files, license file, ucs file
- B. Serial number of the device, problem description, contact info
- C. Serial number of the device, qkview, problem description, contact info
- D. Serial number of the device, ucs file, license file, log files

Answer: C

Explanation:

To ensure a support case is processed and routed efficiently, F5 specifies a mandatory set of baseline information.

Serial Number: Required to verify the support contract and entitlement level for the hardware or virtual edition.

QKView: This is described as the "first and most important thing to have when opening a case". It provides the F5 Support Engineer with the necessary diagnostic data to understand the system's current state and resource utilization.

Problem Description: A precise description of the issue, including symptoms, when the problem started, and the business impact, is critical for routing the case to the correct technical team.

Contact Info: Accurate contact information for the individual who will be working on the ticket with F5.

NEW QUESTION # 42

A BIG-IP Administrator suspects that one of the BIG-IP device power supplies is experiencing power outages. Which log file should the BIG-IP Administrator check to verify the suspicion?

- A. /var/log/ltn
- B. /var/log/daemon.log
- C. /var/log/kern.log
- D. /var/log/audit

Answer: A

Explanation:

On a BIG-IP system, hardware-related alerts, including those for power supply units (PSUs), fans, and chassis components, are primarily logged in the Local Traffic Manager (LTM) log file.

Log Location: The file path is /var/log/ltn

PSU Alert Messages: When a power supply fails, experiences an outage, or is unplugged, the chmand (Chassis Manager) or system_check processes log specific error codes to this file. For example, you may see messages like 010d0006:0: Chassis power supply <X> has experienced an issue or VINPUT=bad.

Troubleshooting: Administrators can use the command `grep -i "power supply" /var/log/lm` to quickly filter for PSU-related events.

NEW QUESTION # 43

Which tool helps inspect SSL handshake issues?

- A. `openssl_client`
- B. ping
- C. dig
- D. top

Answer: A

Explanation:

This tool tests SSL/TLS connections and reveals handshake problems.

NEW QUESTION # 44

.....

Another challenge is staying on top of the ever-changing exam content. F5 F5CAB5 is constantly evolving, and it can be difficult to know what to expect on test day. Our F5 F5CAB5 practice tests and PDF are updated regularly to reflect the latest F5 F5CAB5 Exam Format and content, so you can be confident that you are studying the most up-to-date F5CAB5 exam information.

New F5CAB5 Test Cram: <https://www.actualtorrent.com/F5CAB5-questions-answers.html>

And we provide a series of the core content of F5CAB5 exam dumps files and convenience for many of the examinees participating in the qualification certification exams except the pass rate of 100%, Countless F5CAB5 BIG-IP Administration Support and Troubleshooting exam candidates have already passed their F5CAB5 certification exam and they all got help from top-notch F5CAB5 pdf questions and practice tests, F5-CA F5CAB5 exam requires a long-time preparation and consistency during the study for remarkable scores.

This book is not affiliated with or sponsored by Mojang Synergies/Notch F5CAB5 Development AB, There are diamonds in them thar hills' but to find investment grade diamonds it pays to have experienced guides.
