## IIA IIA-CIA-Part3 Questions Latest IIA-CIA-Part3 Dumps PDF [2026]

Once installed IIA-CIA-Part3 practice exam software onto your computer, you can get started as it does not require an internet connection to run. The IIA-CIA-Part3 practice exam software is essential for your IIA IIA-CIA-Part3 exam preparation as it gives you hands-on experience before the actual IIA-CIA-Part3 Certification Exam. This kind of exam preparation ensures that a well-prepared and more confident candidate enters the examination arena.

## IIA Business Knowledge for Internal Auditing Sample Questions (Q223-Q228):

### NEW QUESTION # 223

A benefit of using computer-aided software engineering (CASE) technology is that it can ensure that:

- A. No obsolete data fields occur in files.
- B. Users become committed to new systems.
- C. All programs are optimized for efficiency.
- **D. Data integrity rules are applied consistently.**

**Answer: D**

Explanation:

CASE is an automated technology (at least in part) for developing and maintaining software and managing projects. A benefit of using CASE technology is that it can ensure that data integrity rules, including those for validation and access, are applied consistently across all files.

### NEW QUESTION # 224

A corporation had profit for the year of US \$101,504 and a simple capital structure consisting of the following ordinary shares outstanding:

Months Outstanding	Number of Shares
January - February	24,000
March - June	29,400
July - November	36,000
December	35,040
Total	<u>124,440</u>

What was the corporation's basic earnings per share rounded to the nearest cent?

- A. US \$2.90
- **B. US \$3.20**
- C. US \$3.26
- D. US \$3.45

**Answer: B**

Explanation:

BEPS equals profit or loss attributable to ordinary equity holders divided by the weighted-average number of ordinary shares outstanding. The latter is calculated as follows:

24,000	×	(2 + 12)	=	4,000
29,400	×	(4 + 12)	=	9,800
36,000	×	(5 + 12)	=	15,000
35,040	×	(1 + 12)	=	2,920
			=	<u>31,720</u>

Accordingly, BEPS is US \$3.20 (\$101,504 profit ÷ 31,720 shares).

### NEW QUESTION # 225

Which of the following is an example of an application control?

- A. Automated password change requirements.
- **B. Formatted data fields.**
- C. User testing of system changes.
- D. System data backup process.

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Application controls are specific to software applications and help ensure data integrity and accuracy within systems.

Option A (Automated password change requirements) - A system security control, not specific to a single application.

Option B (System data backup) - A general IT control, not an application control.

Option C (User testing of system changes) - Part of software development controls, not an application-level control.

Formatted data fields ensure that users enter information in the correct format, preventing errors and improving data accuracy.

Since formatted data fields are an application-specific control, Option D is correct.

### NEW QUESTION # 226

The encryption technique that requires two keys, a public key that is available to anyone for encrypting messages and a private key that is known only to the recipient for decrypting messages, is:

- **A. Rivest, Shamir, and Adelman (RSA).**

- B. Data encryption standard DES).
- C. A cypher lock.
- D. Modulator-demodulator.

**Answer: A**

Explanation:

RSA is an encryption standard licensed to hardware and software vendors. Public-key encryption requires management of fewer keys for a given client-server environment than does private-key encryption. However, compared with DES, RSA entails more complex computations and therefore has a higher processing overhead. RSA requires two keys: The public key for encrypting messages is widely known. but the private key for decrypting messages is kept secret by the recipient.

#### NEW QUESTION # 227

A distribution channel moves goods from producers to customers. Suppose a channel has four producers, each serving the same four customers, and no middlemen. If a distributor is introduced, the number of contacts among producers, customers, and the distributor) in the channel will:

- A. Increase from 8 to 16.
- B. Decrease from 8 to 4.
- C. Be unaffected.
- D. Decrease from 16 to 8.

**Answer: D**

Explanation:

The number of contacts without a distributor is 16 (four producers four customers). The number with a distributor is 8 (four producers +four customers). Thus, the effort required of producers and consumers is reduced by the distributor, thereby increasing marketing efficiency.

#### NEW QUESTION # 228

.....

We constantly improve and update our IIA-CIA-Part3 study materials and infuse new blood into them according to the development needs of the times and the change of the trend in the industry. We try our best to teach the learners all of the related knowledge about the test IIA-CIA-Part3 Certification in the most simple, efficient and intuitive way. We pay our experts high remuneration to let them play their biggest roles in producing our IIA-CIA-Part3 study materials.
