Our UiPath UiPath-TAEPv1 free demo provides you with the free renewal in one year so that you can keep track of the latest

points happening in the world. As the questions of our UiPath UiPath-TAEPv1 Exam Dumps are involved with heated issues and customers who prepare for the UiPath UiPath-TAEPv1 exams must haven't enough time to keep trace of UiPath-TAEPv1 exams all day long.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q14-Q19):

NEW QUESTION # 14

What are the mock testing conditions in UiPath?

- A. * There can be multiple mock files for a workflow
 - * Nested mocks are available
 - * Mock.json file contains configuration settings for mock files
 - * Changes made in the source workflow file are not applied to the mock file when the project is saved
- B. * There can be only one mock file for a workflow
 - * Nested mocks are not available
 - * Mock.json file contains configuration settings for mock files
 - * Changes made in the source workflow file are applied to the mock file when the project is saved
- C. * There can be only one mock file for a workflow
 - * Nested mocks are available
 - * Mock.json file does not contain configuration settings for mock files
 - * Changes made in the source workflow file are not applied to the mock file when the project is saved
- D. * There can be multiple mock files for a workflow
 - * Nested mocks are not available
 - * Mock.json file contains configuration settings for mock files
 - * Changes made in the source workflow file are applied to the mock file when the project is saved

Answer: A

Explanation:

In UiPath, mock testing conditions include:

NEW QUESTION # 15

What happens if a Test Execution is re-executed?

- A. New test execution results are generated, independent from the previous ones.
- B. A log with only the previous execution is kept.
- C. The old execution results are deleted and replaced with the new results.
- D. A log with all the previous executions is kept.

Answer: A

Explanation:

When a Test Execution is re-executed in UiPath, it generates new test execution results that are independent of previous ones. This allows for historical tracking and comparison between multiple runs.

NEW QUESTION # 16

Which component of the UiPath Test Suite communicates directly with CI/CD pipelines?

- A. UiPath Studio
- B. UiPath Test Manager
- C. **UiPath Orchestrator**
- D. UiPath Action Center

Answer: C

Explanation:

UiPath Orchestrator is the component that communicates directly with CI/CD pipelines. It manages the execution of test cases and workflows triggered from CI/CD tools, enabling automated and continuous testing as part of the deployment process.

NEW QUESTION # 17

How are test cases added dynamically to a Test Set based on labels in UiPath Test Manager?

- A. Test Cases with any of the selected labels are assigned to the Test Set.
- B. Only the manual and automated labels are used to assign Test Cases to the Test Set.
- C. Test Cases with all of the selected labels are assigned to the Test Set.
- D. Test Cases with a specified number of the selected labels are assigned to the Test Set.

Answer: A

Explanation:

In UiPath Test Manager, when using labels to dynamically assign test cases to a Test Set, any test case that matches any of the selected labels will be added. This enables flexible grouping based on shared characteristics.

NEW QUESTION # 18

According to best practices, how should the renaming, moving, or deleting of test cases in the project be handled?

- A. The renaming, moving or deleting of test cases can be handled either inside or outside Studio, there is no preferred way.
- B. Test cases should be renamed or moved outside of Studio and then re-imported.
- C. Do not rename move or delete the test cases outside of Studio.
- D. Test cases can be renamed, moved or deleted outside of Studio.

Answer: C

Explanation:

According to best practices, test cases should not be renamed, moved, or deleted outside of UiPath Studio. Making such changes externally can lead to discrepancies in the project structure and potentially break links or references within the testing framework. Performing these actions within Studio ensures that all changes are properly tracked and synchronized across the test suite.

NEW QUESTION # 19

.....
