There are 2 correct answers to this question.

Response:

- A. Transaction processing
- **B. Metadata discovery**
- C. API publishing
- **D. Data classification and tagging**

**Answer: B,D**

### **NEW QUESTION # 34**

You have created a story using a planning model and notice that a Value Driver Tree can be defined. Why do you use a Value Driver Tree?

There are 2 correct answers to this question.

Response:

- A. To track planning tasks
- **B. To view a planning simulation graphically**
- C. To lock planning data
- **D. To leverage driver-based planning**

**Answer: B,D**

### **NEW QUESTION # 35**

Which operation is implemented by the Foundation Services of SAP Business Data Cloud?

- **A. Data transformation and enrichment to generate a data product.**
- B. Generation of an analytic model by adding semantic information.
- C. Storage of raw data inside a CDS view.
- D. Execution of machine learning algorithms to generate additional insights.

**Answer: A**

Explanation:

The Foundation Services component of SAP Business Data Cloud (BDC) is responsible for orchestrating the fundamental processes of data preparation and productization. Specifically, a key operation implemented by Foundation Services is data transformation and

enrichment to generate a data product. Foundation Services takes raw data ingested from various business applications and applies necessary transformations, cleanses it, and enriches it with additional context or calculated attributes. This process is crucial for creating high-quality, consumable data products, which are curated and semantically rich datasets designed for specific business use cases. While machine learning algorithms are executed by Intelligent Applications (which consume these data products), and analytic models are built in SAP Datasphere (which is part of the BDC ecosystem), Foundation Services focuses on the foundational work of preparing and productizing the data itself, ensuring it's ready for advanced analytics and consumption.

#### **NEW QUESTION # 36**

What are the some purposes of SAP Business Data Cloud?

There are 2 correct answers to this question.

Response:

- A. To provide mainly manual data integration scenarios
- B. To act solely as a data storage solution without analytics capabilities
- C. To provide a homogeneous system landscape for data, functions, and use cases
- D. To provide foundational services for data and analytics scenarios

**Answer: C,D**

#### **NEW QUESTION # 37**

.....

Where there is life, there is hope. Never abandon yourself. You still have many opportunities to counterattack.
