Reliable CheckPoint 156-836 Test Syllabus & 156-836 Test Collection

There are many merits of our product on many aspects and we can guarantee the quality of our 156-836 practice engine. Firstly, our experienced expert team compile them elaborately based on the real exam. Secondly, both the language and the content of our 156-836 study materials are simple. The content emphasizes the focus and seizes the key to use refined 156-836 Questions and answers to let the learners master the most important information by using the least practic. Three, we provide varied functions to help the learners learn our study materials and prepare for the exam.

The CheckPoint 156-836 exam comprises 90 multiple-choice questions that evaluate the candidate's knowledge and skills in various areas of Maestro technologies. 156-836 Exam Duration is 120 minutes, and the passing score is 70%. 156-836 exam can be taken in English only, and the registration fee is $300.

CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q25-Q30):

NEW QUESTION # 25
The drop_monitor command is useful for

- A. Showing the system temperature in real-time for multiple components, such as CPU, fan, and SSDs.
- B. Monitoring Check Point code drops
- C. Viewing all drops by Check Point code or the Gaia OS, such as RX-DRP, RX-ERR, and Gaia OS drops.
- D. Viewing all interface drops such as RX-ERR, RX-DRP, and RX-OVR

Answer: C

Explanation:
Explanation
The drop_monitor command is a tool that monitors and displays the packets that are dropped by the Check Point code or the Gaia OS on the orchestrator and the appliances. It can help troubleshoot network issues and optimize performance. The command shows the drop reason, source, destination, protocol, and port of the dropped packets, as well as the interface and the module that dropped them.

NEW QUESTION # 26
What type of license is required for an MHO?

- A. The MHO does not require a license.
- B. A license is needed for each attached SGM.
- C. The MHO requires a VSX license.
- D. The MHO requires a NGTP license.

Answer: A

Explanation:
Explanation
The MHO (Maestro Hyperscale Orchestrator) does not require a license by itself, but each SGM (Security Group Module) that is attached to the MHO needs a license. The license type depends on the features and blades that are enabled on the SGM. For example, if the SGM is running VSX, it needs a VSX license.

NEW QUESTION # 27
For the MHO-175, which ports are Management ports?

- A. Ports 27 - 47 are Management ports.
- B. Ports 1 - 4 are Management ports.
- C. Ports 5 - 26 are Management ports.
- D. Ports 49 - 55 are Management ports.

Answer: B

Explanation:
According to the Port Mapping for the Check Point Maestro HyperScale Orchestrator MHO-175 document1, ports 1 - 4 are Management ports that are used to connect the MHO to the customer's management infrastructure, such as SmartConsole or SmartDomain Manager. Ports 5 - 26 are Uplink ports that are used to connect the MHO to the customer's network infrastructure, such as switches, routers, or firewalls. Ports 27 -
47 are Downlink ports that are used to connect the MHO to the Security Group Modules (SGMs) in the Security Group. Ports 49 -
55 are Backplane ports that are used to connect the MHO to another MHO in a Dual Orchestrator environment.

NEW QUESTION # 29
Possibilities for a failure in a single SGM of a Security Group include.

- A. An administrator imported a hotfix into the CPUSE repository of a single SGM.
- B. A change was made with clish instead of gClish, causing the SGM to handle traffic differently than the other SGMs.
- C. SecureXL is not enabled on the SGM.
- D. There are too many active SGMs in the SG.

Answer: A

Explanation:
One of the possible causes of a failure in a single SGM of a Security Group is that an administrator imported a hotfix into the CPUSE repository of a single SGM, instead of using the orchestrator to distribute the hotfix to all the SGMs in the Security Group. This can create a mismatch in the software versions and configurations of the SGMs, and lead to unexpected behavior and errors.
