This is because it can really help students to save a lot of time, and ensure that everyone pass the exam successfully.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate’s ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Latest C_ACDET_2506 Exam Objectives & Valid C_ACDET_2506 Exam

Test

Our company abides by the industry norm all the time. By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest C_ACDET_2506 exam torrent we are dependable just like our C_ACDET_2506 test prep. They can satisfy your knowledge-thirsty minds. And our C_ACDET_2506 quiz torrent is quality guaranteed. By devoting ourselves to providing high-quality practice materials to our customers all these years we can guarantee all content is of the essential part to practice and remember. To sum up, our latest C_ACDET_2506 Exam Torrent are perfect paragon in this industry full of elucidating content for exam candidates of various degree to use. Our results of latest C_ACDET_2506 exam torrent are startlingly amazing, which is more than 98 percent of exam candidates achieved their goal successfully.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q56-Q61):

NEW QUESTION # 56

What is the key role of the SAP Deployment Lead assigned to the project?

- A. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations
- B. To advise the customer and partner in solution configurations
- C. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- D. To Test and Validate the solution prior to go-live

Answer: A

NEW QUESTION # 57

A customer requests a dynamic list from CSV. Which field type supports that?

- A. Single-Select Enum
- B. Hyperlink
- C. Computed Field
- D. Flex Master Data-based field

Answer: D

Explanation:

The Flex Master Data (FMD)-based field type supports dynamic lists sourced from CSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.

Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.

Hyperlink fields store URLs, unrelated to selection lists.

FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

NEW QUESTION # 58

During the configuration of a new custom field, after it's been saved but before the field has been published, you realize that you set the wrong field type. What is the next step you should take to resolve the issue?

- A. Delete the field and create a new field with the same name and the intended field type
- B. Clear and recreate the field with the same field name and the intended field type
- C. Mark the field as Hidden, and create a new field with a slightly different name and the intended field type
- D. Change the field type by selecting the intended type in the dropdown and Save

Answer: A

Explanation:

Once a custom field has been saved, its field type cannot be changed—even if the field has not yet been published. The correct approach is to delete the incorrect field and create a new one with the intended type, optionally using the same name to maintain

naming consistency. Clearing or hiding the field does not solve the issue, and the system does not allow type changes via the UI once saved. This approach is standard in SAP Ariba field management to avoid data integrity issues.

NEW QUESTION # 59

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Inline Help
- **B. Deployment Description**
- C. Onboard Resource Center
- D. Partner Statement of Work

Answer: B

NEW QUESTION # 60

Which syntax is used for writing custom Validity Conditions?

- **A. Scheme**
- B. Python
- C. XML
- D. Regular expression

Answer: A

NEW QUESTION # 61
