Exact extracts supporting this:

Commitment to data protection, privacy, security, and ethics: "SAP's AI Ethics efforts are guided by a multi-stakeholder approach and a strong governance framework, coordinated by the AI Ethics Office. The approach is based on SAP's Global AI Ethics Policy and development standards for responsible AI innovation... Principles include proportionality and do not harm, safety and security, fairness and non-discrimination, sustainability, right to privacy and data protection, human oversight and determination, transparency and explainability, responsibility and accountability, awareness and literacy, and multistakeholder and adaptive governance and collaboration."sap.com "SAP prioritizes data privacy and security, ensuring customer data remains safeguarded within its ecosystem Customer data is not shared with third-party large language model (LLM) providers for training their models."sap.com Affirming the guiding principles of the UNESCO Recommendation on the Ethics of AI: "Our guiding principles are based on UNESCO's Recommendation on the Ethics of Artificial Intelligence."sap.com "...affirming the 10 guiding principles of the UNESCO Recommendation on the Ethics of Artificial Intelligence. "Risk Classification & Assessment Process Flowchart."sap.com "...the establishment of our AI use case 'Risk Classification & Assessment Process' within our AI Ethics Handbook."learning.sap.com Other options are incorrect because:

Option B: While SAP leverages business data responsibly and has understanding through grounding AI in customer data, it does not claim "unique access" as data usage is governed by customer agreements and opt-outs, emphasizing shared rather than exclusive access.

Option D: SAP has collaborations with AI providers like Cohere, Microsoft, and others, but these are described as strategic partnerships rather than "unparalleled," with focus on ecosystem integration rather than being a primary trust factor in ethics contexts. Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the official SAP AI Ethics Handbook and related product pages, as well as the SAP Learning course "Discovering SAP Business AI," which highlights responsible AI practices in positioning SAP Business AI within the SAP Business Suite.
