So our PK0-005 Certification tool is the boutique among the same

kinds of the PK0-005 study materials. Our assiduous pursuit for high quality of our products creates our top-ranking PK0-005 test guide and constantly increasing sales volume.

CompTIA Project+ Certification Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40
During the project execution phase, Ann, a project manager, received an email from the project sponsor asking for an additional work package to be added to the project scope due to new legislation.
INSTRUCTIONS
Review the email with the latest updates sent by the project sponsor and respond in the following order:
1. Select the best tool for tracking the server migration progress.
2. Select the new critical path.
3. Select the correct number of engineers required for the server migration phase.
If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Select the Appropriate Tool:

Select the new critical path.
Option A
Option B
Option C

Answer:

Explanation:

NEW QUESTION # 41
Which of the following would be considered operational security?

- A. Multifactor authentication
- B. Facility access
- C. Background screening
- D. Mobile device compliance

Answer: B

Explanation:
Operational security (OPSEC) is a process that prevents sensitive information from getting into the wrong hands by viewing operations from the perspective of an adversary1. Facility access is a form of OPSEC that controls who can enter and exit a physical location where sensitive data or equipment is stored or processed.
Facility access can include measures such as locks, alarms, badges, biometrics, guards, and cameras. The other options are not correct because:
Mobile device compliance is a policy that ensures that mobile devices used by employees or contractors meet certain security standards and requirements, such as encryption, password protection, antivirus, and remote wipe. Mobile device compliance is not a form of OPSEC, but rather a form of data security or device management.
Background screening is a process that checks the criminal, financial, and employment history of a potential employee or contractor before hiring them. Background screening is not a form of OPSEC, but rather a form of human resource management or risk mitigation.
Multifactor authentication is a method that requires users to provide two or more pieces of evidence to verify their identity before accessing a system or service, such as a password, a code, a token, or a biometric.
Multifactor authentication is not a form of OPSEC, but rather a form of access control or identity management. References =

NEW QUESTION # 42
SIMULATION

During the project execution phase, Ann, a project manager, received an email from the project sponsor asking for an additional work package to be added to the project scope due to new legislation.
INSTRUCTIONS
Review the email with the latest updates sent by the project sponsor and respond in the following order:
1. Select the best tool for tracking the server migration progress.
2. Select the new critical path.
3. Select the correct number of engineers required for the server migration phase.
If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.
Select the Appropriate Tool:

Select the new critical path.
Option A
Option B
Option C

Answer:

Explanation:
See the solution below in explanation
Explanation:

NEW QUESTION # 43
A new project has been assigned to a project manager. In order to move forward with the project charter, which of the following should the project manager work with to define the success criteria for the initiative?

- A. Program manager
- B. Scrum master
- C. Lead architect
- D. Project sponsor

Answer: D

Explanation:
The project sponsor typically defines the success criteria and overall goals of the project. This alignment ensures the project meets organizational objectives, as outlined in CompTIA Project+ guidance on roles and responsibilities.

NEW QUESTION # 44
During a brainstorming session, a project team is elaborating on what caused the unexpected crash of the website that the team was developing. Given the following:
Which of the following was the initial cause of the issue?

- A. Inadequate instructions
- B. Inadequate memory
- C. Lack of infrastructure
- D. Incorrect configuration

Answer: D

Explanation:
Incorrect configuration was the initial cause of the issue that caused the unexpected crash of the website that the team was developing. The diagram given is an example of a fishbone diagram or a cause-and-effect diagram that shows the possible causes of a problem or effect. The diagram has four main categories: people, process, technology, and environment. Each category has subcategories that list specific factors that may contribute to the problem or effect. The diagram shows that incorrect configuration under technology was marked as an initial cause of website crash.

NEW QUESTION # 45

......
