

220-1201 Valid Test Bootcamp, 220-1201 Valid Study Guide

The first goal of our company is to help all people to pass the 220-1201 exam and get the related certification in the shortest time. Through years of concentrated efforts of our excellent experts and professors, our company has compiled the best helpful and useful 220-1201 test training materials to meet all people's demands, and in addition, we can assure to everyone that our study materials have a higher quality than other study materials in the global market, at the same time, these people will be easier to be admitted to the human resources supervisor. The 220-1201 learn prep from our company has helped thousands of people to pass the exam and get the related certification, and then these people have enjoyed a better job and a better life. It has been generally accepted that the 220-1201 study questions are of significance for a lot of people to pass the exam and get the related certification.

Career grooming with 220-1201 exams are your right. Rather, it has become necessary in the most challenging scenario of enterprises. Like most of the professionals, you might find it tough and beyond your limits. Here comes the role of ActualTestsIT 220-1201 Dumps to encourage you and make it possible for you to step ahead with confidence. The growing network of our clientele proves that our dumps work wonders and help you gain a definite success in your 220-1201 certification exams.

220-1201 Valid Study Guide & 220-1201 Relevant Questions

Might it be said that you are enthused about drifting through the CompTIA A+ Certification Exam Core 1 on the chief endeavor? Then, you are at the ideal locale for CompTIA 220-1201 exam. CompTIA 220-1201 Dumps gives you the most recent review

material that has been figured out for you to pass the CompTIA 220-1201 on the key endeavor. ActualTestsIT is moving these days and is essential to finding a tremendous compensation calling. Different promising beginners stand around inactively and cash due to including an invalid prep material for the CompTIA 220-1201 exam.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q144-Q149):

NEW QUESTION # 144

A local bank is designing its new infrastructure blueprint. Which of the following RAID types offers double parity?

- A. RAID 0
- B. RAID 1
- **C. RAID 6**
- D. RAID 5

Answer: C

Explanation:

RAID 6 uses double parity, allowing the array to tolerate the failure of up to two disks simultaneously while maintaining data integrity.

NEW QUESTION # 145

A network operations analyst receives an automated alert regarding a server with an array. The analyst walks over to the server and sees a blinking orange light at the hard disk bay. The server is configured for RAID 1. Which of the following should the analyst do to resolve this issue?

- A. Update RAID card firmware.
- **B. Replace the hard disk and rebuild the array.**
- C. Change the array to RAID 0.
- D. Undo the array and create a new one.

Answer: B

Explanation:

A blinking orange light typically indicates a failed hard drive in the RAID array. In RAID 1 (mirroring), you can replace the failed drive and rebuild the array without data loss.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.4 - RAID configuration and troubleshooting:

"In the event of a hard drive failure in RAID 1, replace the failed disk and allow the array to rebuild using the remaining mirrored disk." Verified Source:

CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 3: RAID and Storage CompTIA Exam Objectives 220-1101, Domain 3.4

NEW QUESTION # 146

A technician is troubleshooting a computer that has random BSOD alerts and intermittently freezes during normal use. Performance degrades as the day goes on. No new software or hardware changes have been implemented. Freezing occurs under performance-intensive operations. Which of the following hardware components is most likely at fault?

- A. Video card
- B. TPM
- C. HDD
- **D. RAM module**

Answer: D

Explanation:

Comprehensive and Detailed Step-by-Step

Random BSODs (Blue Screen of Death), intermittent freezing, and degraded performance under load are common symptoms of failing or faulty RAM (Random Access Memory). Here's the reasoning:

RAM Module (Correct Answer):

Faulty or failing RAM can cause random BSODs due to memory errors when the system attempts to read or write to corrupted

memory locations.

Intermittent freezing, especially under performance-intensive operations, can occur because the CPU relies heavily on RAM for active processing tasks.

Over time, heat generated during usage can exacerbate RAM instability, leading to progressively worse performance throughout the day.

Solution: The technician should run a memory diagnostic tool, such as Windows Memory Diagnostic or MemTest86, to confirm if the RAM is at fault.

Incorrect Options:

A . Video Card: A faulty video card can cause graphical glitches, screen artifacts, or crashes, but it is unlikely to cause system-wide performance degradation and random freezing under normal operations unless the issue is specific to GPU-intensive tasks (e.g., gaming or video rendering).

B . HDD: A failing hard drive can cause system slowdowns and freezing, but it typically produces other symptoms such as read/write errors, boot failures, or clicking sounds. HDD issues do not usually cause BSODs unless critical system files are corrupted.

D . TPM (Trusted Platform Module): A TPM is a hardware-based security module used for encryption and secure authentication. It does not affect performance or cause BSODs or freezing under normal operation.

Key Takeaway:

The symptoms described (random BSODs, intermittent freezing, and degraded performance under load) are most likely caused by faulty or failing RAM. Memory diagnostic tools should be used to confirm the issue.

NEW QUESTION # 147

A human resources department uses a network shared with other departments to produce a variety of printed resources for legal retention. The human resources department only wants its members to have access to these materials. Which of the following should the technician implement?

- A. Security groups
- B. Time-of-day access
- C. Audit logs
- D. Print server

Answer: A

Explanation:

Security groups are used to manage access permissions to network resources, ensuring only authorized HR department members can access the shared materials.

Why Not B (Audit logs): Audit logs monitor activity but do not restrict access.

Why Not C (Time-of-day access): Time-of-day access limits when users can access resources but doesn't specify user permissions.

Why Not D (Print server): A print server manages print jobs but does not control file access.

CompTIA A+ Exam Reference: Core 2 (220-1102), Section 2.5, access control and permissions.

NEW QUESTION # 148

Which of the following is the most likely cause?

- A. DNS servers are manually set.
- B. DHCP is enabled.
- C. NetBIOS is enabled.
- D. The subnet mask is incorrect.

Answer: A

Explanation:

The key detail in the ipconfig output is that the system is receiving an IP address, subnet mask, default gateway, and DHCP server information via DHCP, but the DNS servers shown are 8.8.8.8 and 8.8.4.4, which are Google's public DNS servers. In most corporate networks, DNS is provided internally by the DHCP server—usually the same device assigning the IP address. When DNS values are different from DHCP-provided defaults, it indicates manual DNS configuration.

CompTIA A+ emphasizes that mismatched DNS settings can cause browsing issues, name-resolution delays, or an inability to access internal resources. DNS is critical because it translates domain names into IP addresses; if manually configured, the device bypasses the organization's DNS server and may not resolve internal hostnames.

The subnet mask is correct for a Class B private network subdivided using /24 (255.255.255.0). NetBIOS being enabled is

common and not a cause of connectivity issues here. DHCP being enabled is normal and functioning correctly, as shown by the proper IP lease obtained.

Thus, the anomalous and most likely problematic configuration is manually configured DNS, making Option D correct.

NEW QUESTION # 149
