It includes the roles of investment dealers and financial intermediaries, capital market functions, financial instruments, and the complete Canadian regulatory environment with its regulatory bodies, principles of regulation, client remediation options, and ethical standards for financial services professionals.

CSI Canadian Securities Course Exam2 Sample Questions (Q75-Q80):

NEW QUESTION # 75

For institutional trading, when does the investor need to provide trade-matching elements?

- A. After the dealer issues a trade execution notice.
- B. With the initial order.
- C. One the custodian confirms the trade.
- D. Once the trade clears.

Answer: A

Explanation:

Trade-matching is a critical process in institutional trading, ensuring that details of a trade (e.g., price, quantity, and settlement terms)

align among the involved parties, including the investor, dealer, and custodian.

In Canada, institutional trade matching must occur within a specific timeline, and the investor is responsible for providing trade-matching elements after the trade execution notice is issued by the dealer.

Step-by-Step Explanation:

* What is Trade Matching? Trade matching involves the comparison of trade details between the buyer and seller (and their intermediaries) to confirm accuracy and reduce settlement risks.

* When Does the Investor Provide Trade-Matching Elements?

* After the dealer executes the trade, the dealer issues a trade execution notice to the investor.

* The investor must then provide the necessary trade-matching details, such as account information, settlement instructions, and any other required confirmations.

* This process ensures that the trade can move seamlessly through to settlement.

* Why Not Other Options?

* Option B (Once the custodian confirms the trade): Incorrect. The custodian's role is typically involved in the final settlement process and not in providing trade-matching details.

* Option C (With the initial order): Incorrect. Trade-matching details are provided after the trade is executed, not at the time the order is placed.

* Option D (Once the trade clears): Incorrect. Trade matching occurs before the trade clears to ensure settlement.

References to Canadian Securities Course Exam 2 Study Materials:

* Volume 2, Chapter 27 - Institutional Clearing and Settlement

* Highlights the process of institutional trade matching, the roles of the investor, dealer, and custodian, and the required timelines.

* Volume 2, Chapter 27 - The Sell Side and the Buy Side of the Market

* Explains trade execution and the responsibilities of institutional clients and their intermediaries in completing trades.

* Option A (After the dealer issues a trade execution notice): Correct.

* Other options are incorrect based on the standard processes for institutional trade matching in Canada.

NEW QUESTION # 76

Which fiscal policy measure was designed to encourage individuals to save?

- A. Dividend tax credit.
- B. Capital gain inclusion rate.
- C. Tax Free Savings Account.
- D. First Home Savings Account.

Answer: C

Explanation:

The Tax-Free Savings Account (TFSA) is a fiscal policy measure introduced by the Canadian government to encourage individuals to save. Unlike other savings mechanisms, the TFSA provides a unique tax advantage:

any income earned within the account, whether from interest, dividends, or capital gains, is completely tax-free. This structure incentivizes saving by maximizing the growth potential of the funds invested without the burden of tax erosion.

* Nature of the TFSA

* Introduced in 2009, the TFSA allows Canadians aged 18 or older to contribute a specific annual limit (indexed to inflation) to the account. Contributions are made with after-tax dollars, meaning withdrawals, including investment income, are not taxed.

* Comparison to Other Measures in the Options:

* First Home Savings Account (FHSA): This is a targeted saving vehicle to assist first-time homebuyers and is more restrictive in its purpose.

* Capital Gain Inclusion Rate: Although it reduces taxable income by allowing only a portion of capital gains to be taxed, it doesn't offer the complete tax-exempt growth and withdrawal benefits of a TFSA.

* Dividend Tax Credit: This offsets taxes on eligible dividends but is designed to encourage investment in Canadian corporations rather than promote individual saving per se.

* Economic Impact: By encouraging Canadians to save, the TFSA bolsters household financial security and indirectly supports the broader economy by increasing available investment capital.

* Volume 2, Chapter 24: Canadian Taxation - Section on Tax-Free Savings Accounts.

* Volume 2, Chapter 13: Macroeconomic Analysis - Fiscal Policy Measures.

NEW QUESTION # 77

The XYZL mutual fund distributes realized capital gains of \$1.50. What is the effect of this distribution?

- A. The mutual fund will have to declare taxable income of \$0.75 per share.
- **B. Each investor will have to report taxable income of \$1.50 per share.**
- C. The net asset value per share will drop \$1.50 as a result of the distribution.
- D. Investors will reduce the adjusted cost base of their holdings in the fund.

Answer: B

NEW QUESTION # 78

What is unique to responsible investment?

- **A. A combination of a values and valuation-based approach to investing**
- B. It bases investment decisions exclusively on environmental factors.
- C. ESG factors are standardized across the investment no industry.
- D. It is unavailable with certain asset classes like segregated funds

Answer: A

Explanation:

Responsible investing (RI) incorporates environmental, social, and governance (ESG) factors into investment decisions. This approach combines values-based investing (aligning investments with personal or institutional ethics) and valuation-based investing (analyzing ESG factors to assess potential risks and returns).

* A. It is unavailable with certain asset classes like segregated funds: RI is increasingly available across various asset classes, including segregated funds.

* B. ESG factors are standardized across the investment industry: ESG standards vary and are not uniformly applied.

* D. It bases investment decisions exclusively on environmental factors: RI considers environmental, social, and governance factors, not just environmental concerns.

NEW QUESTION # 79

What are examples of primary investment objectives?

- A. Marketability and growth of capital.
- B. Tax minimization and safety of principal.
- C. Marketability and tax minimization.
- **D. Growth and preservation of capital**

Answer: D

Explanation:

Investment objectives are critical components of a financial plan, guiding both the client and the advisor in creating strategies to achieve desired financial outcomes. These objectives generally fall into primary categories that reflect the investor's goals, risk tolerance, and time horizon.

* Growth of Capital: This objective focuses on increasing the principal value of the investment over time.

It is particularly important for investors with long-term goals, such as retirement or funding a child's education. Growth-oriented investments typically include equities, equity mutual funds, and growth-oriented ETFs.

* Preservation of Capital: This objective ensures that the invested principal remains safe from loss, emphasizing lower-risk investments like government bonds, GICs (Guaranteed Investment Certificates), or money market instruments. Investors prioritizing this objective often have a low tolerance for risk and a shorter time horizon.

Growth and Preservation of Capital Relevance to Financial Planning: By combining growth with preservation, the portfolio aims to strike a balance between generating returns and maintaining the invested capital. This dual objective is well-suited for individuals in different life stages:

* Young Investors: Tend to emphasize growth more, leveraging their long time horizons.

* Older Investors: Place greater emphasis on preservation as they near or enter retirement, prioritizing capital safety to fund living expenses.

Why A is Correct: Option A explicitly combines both these objectives, aligning with a widely recognized approach to investing that balances risk and reward depending on the investor's profile and needs.
