Role of Red Hat Certified Engineer (EX200) Exam

Red Hat Certified Engineer (EX200) confirms the mindset, skills, and tasks needed to successfully provide consulting and implementation services across a broad range of Red Hat products and technologies for enterprise computing environments. Closest LPI certification. Red Hat Certified Engineer (EX200) confirms the possession of in-depth knowledge of the specific skills required for system administration, network administration, storage administration, and server management on Red Hat Enterprise Linux 6 systems. Processes, tools, and utilities related to enterprise computing. Proven expertise in designing complex enterprise-class Linux systems.

Red Hat Certified Engineer (EX200) confirms the ability to provide advanced technical guidance for reimplementations of existing complex Red Hat Enterprise Linux 6 systems. Regularly engaged in providing technical support for an enterprise-class Red Hat Enterprise Linux system. Focus on system administration, network administration, storage administration, and server management which are also covered in our **Red Hat EX200 Dumps**. Recommended for candidates who want to stay current with the latest products and technologies in the Red Hat portfolio. Professionalism, integrity, and commitment to professional standards.

Preparation for EX200 exam

The most helpful type of preparation is following training courses like those disclosed below:

- **RH124 Red Hat System Administration I Course**

This is the first of two system administration courses needed to start managing Red Hat Enterprise Linux servers. It lasts for 5 days during which you will learn core skills, such as physical storage and file systems managing, software components and services installing and configuring, running processes management and monitoring, and others. The course will also provide you with in-depth coverage of areas like establishing network connections and controlling firewall restrictions, administering users and groups, troubleshooting, and remote management with SSH and the Web Console. It will cost \$3600 or 12 Training Units to enroll.

- **RH134 Red Hat System Administration II**

This is the second part of the RHCSA training track for IT professionals and logically follows the contents of Red Hat System Administration I (RH124). This is a valuable resource for anyone interested in developing better skills in storage configuration and management, management of security features such as SELinux, installation and deployment of Red Hat® Enterprise Linux®, basic system tuning, command-line automation and productivity, control of recurring system tasks, management of the boot process, and troubleshooting.

This course is designed for Windows system administrators and network administrators desiring to boost their skills. The ideal audience also includes Linux system administrators whose duties involve using established standards and procedures for configuring, installing, maintaining, and upgrading Linux systems.

- **RH199 RHCSA Rapid Track course**

The RHCSA Rapid Track course (RH199) combines Red Hat System Administration I (RH124) and Red Hat System Administration II (RH134), teaching the objectives in a fast and efficient way. This program relates to Red Hat® Enterprise Linux® and is designed for experienced Linux system administrators. The course proves a convenient way of preparing for the EX200 Exam as it is focused on all the necessary topics, such as the configuration of network services, process management, tuning, server administration, package management, and troubleshooting, among the rest.

RedHat Red Hat Certified System Administrator - RHCSA Sample Questions (Q49-Q54):

NEW QUESTION # 49

SIMULATION

Make on /archive directory that only the user owner and group owner member can fully access.

Answer:

Explanation:

See explanation below.

Explanation/Reference:

Explanation:

```
chmod 770 /archive
```

Verify using : ls -ld /archive Preview should be like:

```
drwxrwx--- 2 root sysuser 4096 Mar 16 18:08 /archive
```

To change the permission on directory we use the chmod command. According to the question that only the owner user (root) and group member (sysuser) can fully access the directory so: `chmod 770 /archive`

NEW QUESTION # 50

Create a Shared Directory.

Create a shared directory /home/admins, make it has the following characteristics:

/home/admins belongs to group adminuser

This directory can be read and written by members of group adminuser Any files created in /home/ admin, group automatically set as adminuser.

Answer:

Explanation:

see explanation below.

Explanation

```
mkdir /home/admins
```

```
chgrp -R adminuser /home/admins
```

```
chmodg+w /home/admins
```

```
chmodg+s /home/admins
```

NEW QUESTION # 51

The system ldap.example.com provides an LDAP authentication service.

Your system should bind to this service as follows:

The base DN for the authentication service is dc=domain1, dc=example, dc=com LDAP is used to provide both account information and authentication information. The connection should be encrypted using the certificate at http://host.domain1.example.com/pub/domain1.crt When properly configured, ldapuserX should be able to log into your system, but will not have a home directory until you have completed the autofs requirement. Username: ldapuser1 Password: password

Answer:

Explanation:

```
system-config-authentication LDAP user DN=dc=domain1,dc=example,dc=com Server= host.domain1.example.com
Certificate= http://host.domain1.example.com/pub/domain1.crt (enter url carefully, there maybe // or ..) LDAP password OK
starting sssd su -ldapuser1 Display Bash prompt #exit
```

NEW QUESTION # 52

There is a local logical volumes in your system, named with shrink and belong to VGSRV volume group, mount to the /shrink directory. The definition of size is 320 MB.

Requirement:

Reduce the logical volume to 220 MB without any loss of data. The size is allowed between 200-260 MB after reducing.

Answer:

Explanation:

see explanation below.

Explanation

```
cd;umount /shrink
e2fsck -f /dev/mapper/vgsrv-shrink
resize2fs /dev/mapper/vgsrv-shrink 220M
lvreduce -L 220M /dev/mapper/vgsrv-shrink
mount -a
```

NEW QUESTION # 53

CORRECT TEXT

Create a volume group, and set 16M as a extends. And divided a volume group containing 50 extends on volume group lv, make it as ext4 file system, and mounted automatically under /mnt/data.

Answer:

Explanation:

```
# pvcreate /dev/sda7 /dev/sda8
# vgcreate -s 16M vg1 /dev/sda7 /dev/sda8
# lvcreate -l 50 -n lvm02
# mkfs.ext4 /dev/vg1/lvm02
# blkid /dev/vg1/lv1
# vim/etc/fstab
# mkdir -p /mnt/data
UUID=xxxxxxx /mnt/data ext4 defaults 0 0
# vim/etc/fstab
# mount -a
# mount
(Verify)
```

NEW QUESTION # 54

.....

The companies do not want to lose them and they offer a good package to convince the candidate to become a part of their
