

# Best Accurate Nutanix Valid NCP-CI-AWS Study Notes - NCP-CI-AWS Free Download

## How to Get Ready for the Nutanix NCP-CI-AWS Exam Quickly?

In today's challenging IT sector, earning the Nutanix NCP-CI-AWS certification helps you accelerate your career. The Nutanix Certified Professional NCP-CI-AWS certification proves your technical expertise and also bolsters your credibility in the industry. Furthermore, success in the NCP-CI-AWS certification exam differentiates you from a pool of thousands of job seekers and enhances your chances of landing well-paid jobs and promotions. However, many applicants encounter problems such as a short time and a lack of self-assessment while preparing for the Nutanix Certified Professional - Cloud Integration - AWS v6.7 NCP-CI-AWS exam. If you are also facing these challenges, don't worry and choose JustCerts, which is dedicated to providing actual and the latest NCP-CI-AWS exam questions in three formats. With the help of these real [Nutanix Dumps](#), you can get ready for the exam in a short time.

## Authentic (Valid) Details Regarding The Nutanix NCP-CI-AWS Exam Questions

- VENDOR: (Nutanix)
- EXAM CODE: (NCP-CI-AWS)
- EXAM NAME: (Nutanix Certified Professional - Cloud Integration - AWS v6.7)
- Number OF Questions: (75)
- Certification Name: (Nutanix Certified Professional)
- Exam Language: (ENGLISH)
- Promo Code For Nutanix NCP-CI-AWS Exam Questions: "SAVE25"

*Limited Time Huge Sale Offer On All Exams! 25% Extra OFF! Use Coupon Code: Save25*

Our company is a reliable and leading company in the business of NCP-CI-AWS test dumps, we are famous for the commitment. We have in this business for years, and we have a team of high efficiency. The NCP-CI-AWS test dumps are quite efficient and correct, we have the professional team for update of the NCP-CI-AWS test material, and if we have any new version, we will send it to you timely, it will help you to pass the exam successfully.

## Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li></ul>

Topic 4	<ul style="list-style-type: none"><li>• Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li></ul>

You can also accelerate your career with the Nutanix NCP-CI-AWS certification if you study with our NCP-CI-AWS actual exam questions. We are certain that with these Nutanix NCP-CI-AWS real exam questions you will easily prepare and clear the Nutanix NCP-CI-AWS test in a short time. The only goal of ActualTestsQuiz is to help you boost the Nutanix NCP-CI-AWS test preparation in a short time. To meet this objective, we offer updated and actual Nutanix Certified Professional - Cloud Integration - AWS Expert NCP-CI-AWS Exam Questions in three easy-to-use formats. These formats are Nutanix PDF Questions file, desktop Nutanix NCP-CI-AWS practice test software, and Nutanix NCP-CI-AWS web-based practice exam. All these three formats of our updated Nutanix NCP-CI-AWS exam product have valid, actual, updated, and error-free NCP-CI-AWS test questions. You can quickly get fully prepared for the test in a short time by using our NCP-CI-AWS pdf questions.

### Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q120-Q125):

#### NEW QUESTION # 120

Where would tasks related to a recovery using Multi-Cloud Snapshot Technology be monitored?

- A. Nutanix NC2 Console > Tasks > List
- **B. PC > Data Protection > Recovery Plans**
- C. PC > Data Protection > Protection Policies
- D. Nutanix Marketplace > Day Two Operations

**Answer: B**

Explanation:

Multi-Cloud Snapshot Technology (MST) allows Nutanix clusters to protect data by taking snapshots directly to cloud object storage, such as Amazon S3.

When an administrator initiates a recovery from these snapshots, the process is managed through Prism Central (PC), which serves as the orchestration layer for disaster recovery. Specifically, the execution and progress of the recovery are tracked under the Recovery Plans section within the Data Protection menu.

Recovery Plans define the order of VM power-ons, IP address changes, and script executions. By monitoring this section, administrators can verify the status of each step, ensure that the RTO (Recovery Time Objective) is being met, and troubleshoot any failures during the restoration of workloads from the cloud snapshots.

#### NEW QUESTION # 121

What is the largest single cluster size supported by Nutanix NC2 on AWS according to the latest configuration standards?

- A. 0
- **B. 1**
- C. 2
- D. 3

**Answer: B**

Explanation:

The scalability of Nutanix Cloud Clusters (NC2) on AWS is a critical architectural consideration for high-growth environments.

While earlier versions or specific regions might have different baseline limits, the maximum size for a single NC2 cluster on AWS is officially supported up to 28 nodes. This limit is designed to balance the performance benefits of the Nutanix Distributed Storage Fabric (DSF) with the underlying AWS bare-metal infrastructure and networking constraints. Expanding a cluster to this size allows for significant workload consolidation and high availability within a single management domain. Administrators must ensure that their

AWS account quotas and VPC subnet sizing are sufficient to accommodate the vCPU and IP address requirements associated with a 28-node deployment to prevent provisioning failures.

#### NEW QUESTION # 122

An organization plans to use the Cluster Protect feature to protect the cluster data. Which license will satisfy this requirement?

- A. AOS Pro or AOS Ultimate
- **B. AOS Ultimate or NCI Ultimate**
- C. NCI Pro or AOS Ultimate
- D. AOS Pro or NCI Pro

**Answer: B**

Explanation:

The Cluster Protect feature, which provides data protection and disaster recovery capabilities for Nutanix clusters, requires either the AOS Ultimate or NCI Ultimate license. These licenses include the necessary features to leverage Cluster Protect for ensuring data resilience and recovery.

Nutanix Documentation - Cluster Protection Features  
Nutanix AOS 6.7 New Features

#### NEW QUESTION # 123

An administrator planned to create a new NC2 cluster and chose the existing AWS VPC infrastructure in the workflow. The administrator needs two private subnets to complete the configuration.

- **A. For user VMs and cluster management**
- B. For private NAT and Elastic IP management
- C. For DNS and NTP management
- D. For Prism Element and Prism Central management

**Answer: A**

Explanation:

When creating a new NC2 cluster using an existing AWS VPC infrastructure, two private subnets are needed. These subnets are used as follows:

One private subnet for user VMs, which houses the virtual machines that users interact with.

Another private subnet for cluster management, which is used for internal cluster operations and management tasks, ensuring that management traffic is isolated from user traffic for security and performance reasons.

#### NEW QUESTION # 124

An administrator is tasked with providing VMs outbound internet connectivity in AWS. Which components would the administrator need to create in the VPC to achieve this?

- A. Public Subnet NAT Gateway, Public EIP, Route Table
- **B. Private Subnet NAT Gateway, Public EIP, Route Table**
- C. Private Subnet Flow Gateway, Public EIP, Route Table
- D. Public Subnet Flow Gateway, Public EIP, Route Table

**Answer: B**

Explanation:

To provide VMs with outbound internet connectivity in AWS using a private subnet, the administrator needs to create the following components in the VPC:

Private Subnet: A private subnet is required to house the VMs that need outbound internet access but do not require direct inbound access from the internet.

NAT Gateway: A NAT (Network Address Translation) Gateway is necessary to allow instances in the private subnet to connect to the internet or other AWS services while preventing the internet from initiating a connection with those instances.

Public EIP (Elastic IP Address): An EIP is associated with the NAT Gateway to provide a persistent public IP address that allows outbound internet traffic from the private subnet to be routed correctly.

Route Table: A route table is configured to route traffic from the private subnet to the NAT Gateway for outbound internet access.
