## ACD201 Test Dumps Free | ACD201 Materials

Our company is glad to provide customers with authoritative study platform. Our ACD201 quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our ACD201 Quiz prep, you will have the chance to enjoy the authoritative study platform provided by our company. We believe our latest ACD201 exam torrent will be the best choice for you.

## Appian Senior Developer Sample Questions (Q56-Q61):

### NEW QUESTION # 56

Your client wants their customers to be able to schedule appointments directly from their website without going to an Appian user environment.

You need to build an embedded interface to be added to your client's web page. The style of the embedded interface should be consistent with the host web page.

Which three custom styling options can be configured in the Themes section of embedded interfaces? (Choose three.)

- A. Asymmetrical layout
- B. Two or three column layout
- C. Web font stylesheet URL
- D. Page background color
- E. Font Family

**Answer: C,D,E**

Explanation:

Page background color - You can customize the background color to match the host webpage's theme.

Font family - You can set the font family to ensure the embedded interface aligns with the client's branding.

Web font stylesheet URL - This allows the use of custom web fonts, further aligning the style with the host site.

### NEW QUESTION # 57

A view is created with the primary table PERSON and is joined using a left join with the APPOINTMENT table on the column "PERSON\_ID". There is a one-to-many relationship between the PERSON and APPOINTMENT tables.

A Custom Data Type (CDT) and a data store entity have been created based on this view, with the primary key being "PERSON\_ID".

Review the data presented in the PERSON and APPOINTMENT tables:

Which two statements are true when the following query entity is executed? (Choose two.)

- A. Appian makes one more query to the database (other than the actual query to fetch the data) to get the totalCount based on the applied filters.
- B. Appian makes one more query to the database (other than the actual query to fetch the data) to get the totalCount based on the applied filters and paging info.
- C. result totalCount is 1
- D. result totalCount is 3

**Answer: A,C**

Explanation:

Appian makes an additional query to the database (other than the main query for data) to retrieve the totalCount when fetchTotalCount: true() is used.

The result totalCount is 1, as there is only one person (PERSON\_ID 1101) being filtered, even though there are multiple "New" appointments for that person; with a CDT based on PERSON\_ID as the primary key, only one row is counted per person.

### NEW QUESTION # 58

You're designing a process used to notify multiple users of marketing campaigns. These campaigns occur infrequently, but are sent out to the hundreds of customers that are stored in your app.

How should you best design your process model to send the emails whilst using a common email process model (CMN\_SendEmail), to be most performant?

The outputs of this node are not required for the main process.

- A. Set "CMN-SendEmail" as a synchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- B. Set "CMN\_SendEmail" as a "Start Process" process node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- C. Set "CMN\_SendEmail" as an asynchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.

**Answer: B**

Explanation:

Using "Start Process" as the node type and enabling "Automatically run multiple instances of this node" for all users on the mailing list launches each email as a separate, lightweight process, maximizing performance and scalability, especially since the main process does not require the outputs.

#### NEW QUESTION # 59

One of your expressions uses too much memory and has poor performance.

Which two steps should you perform to improve its memory efficiency and performance?

- A. Limit the number of rule inputs to the expression to "less than 10".
- B. Avoid writing test cases to expressions
- C. Avoid dynamically generating components.
- D. Don't use deeply nested looping functions

**Answer: C,D**

#### NEW QUESTION # 60

Users are experiencing slow load times when retrieving customer records with many transactions.

After using performance monitoring tools, you discover that the following interface definition is responsible for the majority of page load time:

□ Additionally, both queries (rule!APP\_GetTransactionsWithFilters and rule!

APP\_GetTransactionTypeWithFilters) take approximately 25 milliseconds each to execute when you test them using the expression editor.

Which action would result in the greatest reduction in the load time for this interface component?

- A. Avoid fetching the total count when getting transactions.
- B. Use a synced record for Transactions to improve the query response time for the query performed on line 6.
- C. Prefetch transaction types and use the displayvalue() function to display the Transaction Type for each transaction.

**Answer: C**

Explanation:

Prefetching all transaction types once (instead of running a separate query for each row in the grid) and then using the displayvalue() function to display the corresponding transaction type name for each transaction will significantly reduce the number of queries executed. This eliminates the N+1 query problem and will greatly improve the interface load time.

#### NEW QUESTION # 61

.....

Our ACD201 practice test material aligns with the content of the actual Appian ACD201 certification exam. Before making a purchase, you can test the features of our ACD201 Exam Questions with a free demo. By utilizing updated ACD201 Questions, you can easily pass the ACD201 exam on your first attempt. Exam4Tests has developed its ACD201 exam study material based on feedback from thousands of professionals worldwide.
