SCM 300 EXAM 1 STUDY GUIDE LATEST 2023 NEW A RATED EXAM

Supply Chain Management: The Efficient Integration of: suppliers, manufacturers, transportation organizations and other parties responsible for bringing products and services to market (doing the least amount of work for the best product)

- Achieve Goals
- Execute Efficiently
- Manage Resources

Operations Management: Design, operation, and improvement of the production systems that efficiently transform INPUTS into finished goods maximizing productivity (ie. process management, capacity planning, scheduling, waiting line management)

Procurement (purchasing): responsible for acquiring materials, equipment, products and services

- Finding supplier that offers the best value
- Negotiate terms of purchase
- Create long-term relationships with suppliers

Operations: responsible for making business processes effective and efficient

- Making highest quality product with the fewest resources possible

Logistics: responsible for developing transportation itinerary (movement and storage) to navigate smooth flow of materials

Reverse Logistics: management of products that flow upstream (toward supplier)

Global SCM: when supply chain partners span across multiple countries/continents

1st tier suppliers: provides goods and services directly to a company

2nd tier supplier: provides goods and services to a company's 1st tier supplier

SCM flows: Materials, money, and information -if these three are not continuously flowing, supply chain will fail

Business model: a company's plan for how it will purchase items, transform them, deliver them, and sell them to product profit

- Business to Consumer (B2C) - amazon, starbucks, nordstrom
- Business to Business (B2B) - boeing, consulting/marketing agencies
- Both B2B and B2C: IBM, dell, verizon
- Brick & Mortar- land-based commerce only (ex. Burger King, Circle K)
- Internet Only Retailer -net commerce only (ex. Amazon.com)
- Click & Mortar - land-based and internet (ex. Nordstrom, barnes and noble)

Supply Chain visibility: ability to see what is happening with inventory upstream (toward supplier) and downstream (toward consumer)

Profit relationship to SCM: if products are poorly manufactured or are delivered later and/or damaged it will affect a company's ability to generate revenues

ROI's relationship to SCM: supply chain managers seek to maximize ROI so that investment decreases and profit increases

Competitive priorities: cost, quality, speed, flexibility

- Cost: material, production, packaging, customer service, organizational, quality
- Quality: design, material & production, quality level delivered, consistency, service
- Time: delivery (lead time), on-time delivery
- Flexibility: product or customization flexibility (Oregano's pizza on toppings), volume flexibility (frozen pizza in volume but not toppings), mass customization
