Best Oracle 1z0-1057-25 Dumps [2026] With Real Exam Questions

The objective of 1z0-1057-25 is to assist candidates in preparing for the Oracle Project Management Cloud 2025 Implementation Professional (1z0-1057-25) certification test by equipping them with the actual Oracle 1z0-1057-25 questions PDF and 1z0-1057-25 practice exams to attempt the prepare for your 1z0-1057-25 Exam successfully. The Oracle Project Management Cloud 2025 Implementation Professional (1z0-1057-25) practice material comes in three formats, desktop 1z0-1057-25 practice test software, web-based 1z0-1057-25 practice exam, and 1z0-1057-25 Dumps PDF that cover all exam topics.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which three file-based data imports are available for use in Oracle Project Portfolio Management Cloud?

- A. Project Budgets
- B. Capital Rate Schedule
- C. Project Billing Events
- D. Project Templates
- E. Project Tasks

Answer: A,C,E

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oefpp/toc.htm>

NEW QUESTION # 12

You create a contract with two contract lines: Line 1 and Line 2. You create separate bill plans: A for contract Line 1 and B contract for Line 2, with a different bill set number (11 for Bill Plan A and 22 for Bill Plan B).

Then Bill Plan A is allocated against Project X - Task 10, and Bill Plan B is allocated against Project Y - Task 30.

Based on the preceding setup, you are generating invoices. Identify two correct statements about invoice generation in this scenario. (Choose two.)

- A. Bill set number drives the grouping of transactions.
- B. Two invoices are created using the same contract.
- C. Invoice generation does not depend on bill plan. The invoices are created based on the contract line.
- D. Both the contract lines create only a single invoice because they are using the same contract.

Answer: A,B

Explanation:

Ref: https://docs.oracle.com/cd/E51367_01/projectop_gs/OAPJB/F1087456AN1006D.htm What's a bill set?

Transactions originating from different bill plans with the same bill set number on a contract are included on the same invoice. If a contract has multiple bill plans and each have different values for the bill set, Oracle Fusion Project Billing creates a separate invoice for each bill plan

NEW QUESTION # 13

Which two are the workflows in Project Financial Management? (Choose two.)

- A. Burden Cost Recalculation
- B. Expenditure Item Adjustment
- C. Capital Interest Calculation
- D. Project Status Change
- E. Asset Line Generation

Answer: B,D

Explanation:

The workflows in Project Financial Management are business processes that automate the approval and notification tasks for various

project transactions and events. Two of the workflows in Project Financial Management are:

* Project Status Change: This workflow manages the approval and notification tasks for changing the status of a project or task from one value to another. For example, when a project or task is submitted for approval, this workflow routes the request to the appropriate approvers and notifies them of the action required.

* Expenditure Item Adjustment: This workflow manages the approval and notification tasks for adjusting expenditure items that have been charged to a project or task. For example, when an expenditure item is adjusted by a project manager or a cost accountant, this workflow routes the adjustment to the appropriate approvers and notifies them of the action required. Capital Interest Calculation, Burden Cost Recalculation, and Asset Line Generation are not workflows in Project Financial Management, but processes that perform various calculations and transactions for project costs and assets. NEW QUESTION # 14

Your organization has been using project class categories and codes for reporting purposes and is set up at the project level. You recently defined a new project type, Capital-Contract, and created new class categories named Build, Operate, and Transfer (BOT) and Build, Transfer, and Maintain (BTM), with class codes of Yes

/No. But on creation of a project, you are unable to associate these class categories and codes.

Identify two setups that are mandatory for these class categories and codes to be displayed. (Choose two.)

- A. Class codes should be associated with a related set code.
- B. Class codes should be assigned to project unit.
- C. Class categories should be assigned to business unit.
- D. Class categories should be assigned to project type.

Answer: A,D

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-foundation-configuration-manage-project-types.html#OAPFM360164> Topic - Associating Project Types and Class Categories: Examples Project classifications group your projects according to categories and codes that you define. When you associate project classifications with project types, the classification is available for selection on projects with that project type.

Use any of the following methods to associate class categories with project types:

* Add a classification to the project type definition

For each classification that you associate with the project type, you can enable the Assign to All Projects option to automatically add the classification to the project definition for all new projects with the project type. When this option is enabled, all projects with this project type must be assigned a class code for the class category.

* Add a project type to the class category definition

* Enable the Assign to all Project Types option on the class category definition

NEW QUESTION # 15

You are now the project manager of a newly created implementation project. Which two items are not part of managing an implementation project?

- A. Select the offering you want to implement.
- B. Assign tasks to various users who are responsible for managing setup data.
- C. Enable optional functional areas and features by opting in.
- D. Monitor the progress of completing setup tasks.
- E. Generate a list of setup tasks.

Answer: A,C

Explanation:

Selecting the offering you want to implement and enabling optional functional areas and features by opting in are not part of managing an implementation project. These are part of configuring an implementation project, which is done before managing an implementation project. Configuring an implementation project allows you to define the scope and features of your implementation based on your business needs. Managing an implementation project involves assigning tasks to various users who are responsible for managing setup data, monitoring the progress of completing setup tasks, and generating a list of setup tasks. These are part of executing an implementation project, which is done after configuring an implementation project. Executing an implementation project allows you to perform the setup tasks and validate the setup data for your implementation. Reference:
