Valid AD0-E725 Dumps Demo, AD0-E725 Real Question

It requires a comprehensive understanding of the required skills and test topics. To help candidates pass the AD0-E725 exam, BraindumpStudy has hired qualified experts to compile such Adobe AD0-E725 Exam Dumps that will be essential for your successful preparation in a short time. Our experts have designed such Adobe Commerce Developer Expert (AD0-E725) practice test material that eliminates your chances of failing the Adobe Commerce Developer Expert (AD0-E725) exam.

Adobe Commerce Developer Expert Sample Questions (Q42-Q47):

NEW QUESTION # 42

An Adobe Commerce Cloud Developer is tasked with investigating slow page loads and intermittent errors reported by a client after a recent deployment to their Pro Production environment.

Which action should the Developer use to quickly access and analyze the necessary data?

- A. Connect via SSH into each production node to review system and application logs independently for a more accurate representation of issues being logged.
- B. Access Cloud Console to review environment messages and deployment logs that took place during the previous deployment to production.
- C. Go to New Relic Log Management to access aggregated log data, allowing the analysis of application, infrastructure, CDN, and WAF errors.

Answer: C

NEW QUESTION # 43

A Developer using API Mesh is assigned to optimize the integration of several third-party APIs with Adobe Commerce. Part of this task is to address performance issues such as the n+1 problem.

In this scenario, which option should the Developer implement?

- A. Use API Mesh batching to combine multiple API requests into a single query.
- B. Use API Mesh as a middleware for aggregating data from APIs back into Adobe Commerce.
- C. Use API Mesh to replace the existing APIs with direct GraphQL queries.

Answer: A

NEW QUESTION # 44

A client receives an alert stating that storage on their production environment is nearly full. They are using Pro architecture and are concerned about storage capacity. A Developer is asked to increase the disk size.

How should this problem be solved?

- A. Extend their Adobe license.
- B. Open a ticket with Adobe support.
- C. Modify the magento.app.yaml file.

Answer: B

Explanation:

In Adobe Commerce Cloud Pro environments, disk allocation is provisioned at the infrastructure level and cannot be changed directly by developers. Increasing disk size requires assistance from Adobe's Cloud Ops team via a support ticket.

A (license extension) is unrelated to storage.

B (magento.app.yaml) configures services and resources but cannot increase allocated disk space.

C is correct: Adobe support ticket is required.

Reference:

Adobe Commerce Cloud DevDocs - Request support for Pro environments

NEW QUESTION # 45

A multi-source merchant asks an Adobe Commerce Developer to prioritize inventory source selection based on shipping address and minimal delivery cost.

How should the Developer implement this task functionality?

- A. Register new Source Selection Algorithms (SSA) via di.xml and implement SourceSelectionInterface.
- B. Use Source Priority Algorithm and utilize GetSourceSelectionAlgorithmList.
- C. Configure Distance Priority Algorithm and implement PlaceReservationsForSalesEventInterface.

Answer: A

Explanation:

To customize how inventory sources are prioritized, developers must create a new Source Selection Algorithm (SSA). This is done by registering a new SSA in di.xml and implementing SourceSelectionInterface. This allows developers to define rules such as shipping address proximity or delivery cost.

B is partially correct: Distance Priority Algorithm exists, but implementing PlaceReservationsForSalesEventInterface is not the right way to customize selection logic.

C Source Priority Algorithm is fixed (based on predefined priority), not custom.

Reference:

Adobe Commerce DevDocs - Inventory Source Selection Algorithm

Official Documentation Extracts:

"To customize source selection behavior, implement a custom Source Selection Algorithm (SSA). The algorithm must implement SourceSelectionInterface and be registered via dependency injection (di.xml)."- Adobe Commerce DevDocs: Custom Source Selection Algorithm

"Adobe Commerce provides default SSAs: Source Priority Algorithm and Distance Priority Algorithm

Custom SSAs can be created to satisfy specific business requirements such as delivery costs."- Adobe Commerce Inventory Management Guide

NEW QUESTION # 46

A client recently started using the new Adobe Live Search functionality. They report an issue with content from the website, such as CMS blocks, not returning with the search result.

A Developer is asked to investigate because the client wants this content to be part of the data pool of Live Search.

How should the Developer respond to the client?

- A. Advise the client to enable content for Live Search from admin panel.
- B. Share documentation regarding the limitations of Live Search.
- C. Extend the class Magento\LiveSearchAdapter\Model\Attribute\Metadata.

Answer: B

NEW QUESTION # 47

.....

These are expertly designed Adobe AD0-E725 mock tests, under the supervision of thousands of professionals. A 24/7 customer service is available for assistance in case of any sort of pinch. It shows results at the end of every Adobe AD0-E725 mock test attempt so you don't repeat mistakes in the next try. To confirm the license of the product, you need an active internet connection.
