Professional-Cloud-Database-Engineer Valid Exam Online - Pass4sure Professional-Cloud-Database-Engineer Dumps Pdf

For the challenging Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam, they make an effort to locate reputable and recent Treasury with Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) practice questions. The high anxiety and demanding workload the candidate must face being qualified for the Treasury with Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) certification are more difficult than only passing the Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q16-Q21):

NEW QUESTION # 16
You are managing a Cloud SQL for PostgreSQL instance in Google Cloud. You need to test the high availability of your Cloud SQL instance by performing a failover. You want to use the cloud command.
What should you do?

- A. Use gcloud sql instances promote-replica <PrimaryInstanceName>.
- B. Use gcloud sql instances failover <PrimaryInstanceName>.
- C. Use gcloud sql instances promote-replica <ReplicaInstanceName>.
- D. Use gcloud sql instances failover <ReplicaInstanceName>.

Answer: C

NEW QUESTION # 17

You are managing a Cloud SQL for PostgreSQL instance in Google Cloud. You have a primary instance in region 1 and a read replica in region 2. After a failure of region 1, you need to make the Cloud SQL instance available again. You want to minimize data loss and follow Google-recommended practices. What should you do?

- A. Restore the Cloud SQL instance from the automatic backups in region 3.
- B. Check your instance operational log for the automatic failover status. Look for time, type, and status of the operations. If the failover operation is successful, no action is necessary. Otherwise, manually perform gcloud sql instances failover .
- C. Restore the Cloud SQL instance from the automatic backups in another zone in region 1.
- D. Check "Lag Bytes" in the monitoring dashboard for the primary instance in the read replica instance. Check the replication status using pg_catalog.pg_last_wal_receive_lsn(). Then, fail over to region 2 by promoting the read replica instance.

Answer: D

Explanation:
https://cloud.google.com/sql/docs/postgres/replication/cross-region-replicas#disaster_recovery

NEW QUESTION # 18

You are a DBA of Cloud SQL for PostgreSQL. You want the applications to have password-less authentication for read and write access to the database. Which authentication mechanism should you use?

- A. Use PostgreSQL database's built-in authentication.
- B. Use Identity and Access Management (IAM) authentication.
- C. Use Cloud SQL federated queries.
- D. Use Managed Active Directory authentication.

Answer: B

Explanation:
https://cloud.google.com/sql/docs/postgres/authentication

NEW QUESTION # 19

You are migrating a telehealth care company's on-premises data center to Google Cloud. The migration plan specifies:
PostgreSQL databases must be migrated to a multi-region backup configuration with cross-region replicas to allow restore and failover in multiple scenarios.
MySQL databases handle personally identifiable information (PII) and require data residency compliance at the regional level.
You want to set up the environment with minimal administrative effort. What should you do?

- A. Set up different projects for PostgreSQL and MySQL databases, and apply organizational policy constraints at a project level.
- B. Set up different organizations for each database type, and apply policy constraints at the organization level.
- C. Set up Cloud Logging and Cloud Monitoring with Cloud Functions to send an alert every time a new database instance is created, and manually validate the region.
- D. Set up Pub/Sub to ingest data from Cloud Logging, send an alert every time a new database instance is created, and manually validate the region.

Answer: B

NEW QUESTION # 20

Your organization has a busy transactional Cloud SQL for MySQL instance. Your analytics team needs access to the data so they can build monthly sales reports. You need to provide data access to the analytics team without adversely affecting performance. What should you do?

- A. Create a read replica of the database, enable the cloudsql.iam_authentication flag on the replica, and grant read access to required tables to the analytics team.
- B. Create a read replica of the database, provide the database IP address, username, and password to the analytics team, and grant read access to required tables to the team.
- C. Provide the database IP address, username, and password of the primary database instance to the analytics, team, and grant read access to required tables to the team.
- D. Enable the cloudsql.iam_authentication flag on the primary database instance, and grant read access to required tables to the analytics team.

Answer: A

Explanation:
"Read replicas do not have the cloudsql.iam_authentication flag enabled automatically when it is enabled on the primary instance."
https://cloud.google.com/sql/docs/postgres/replication/create-replica#configure_iam_replicas

NEW QUESTION # 21

......

If a person fails despite proper Google Cloud Certified - Professional Cloud Database Engineer Professional-Cloud-Database-Engineer test preparation and using Professional-Cloud-Database-Engineer practice exam material, Pass4suresVCE provides a money-back guarantee. If a person fails despite proper Google Cloud Certified - Professional Cloud Database Engineer Professional-Cloud-Database-Engineer test preparation and using Professional-Cloud-Database-Engineer practice exam material, Pass4suresVCE provides a money-back guarantee. Pass4suresVCE offers three months of free updates if the Google Cloud Certified - Professional Cloud Database Engineer exam content changes after the purchase of Google Cloud Certified - Professional Cloud Database Engineer valid dumps. Pass4suresVCE wants to save your time and money, so the authentic and accurate Google Cloud Certified - Professional Cloud Database Engineer Professional-Cloud-Database-Engineer Exam Questions help candidates to pass their Professional-Cloud-Database-Engineer certification test on their very first attempt.
