NEW QUESTION # 104

Which of the following is a benefit of "being and doing agile"?

- A. Using agile techniques
- B. Focusing on completing tasks
- C. Following processes
- **D. Increasing user satisfaction**

Answer: D

Explanation:

A key benefit of being and doing agile is increasing user satisfaction by delivering value early and continuously, adapting to feedback, and ensuring the product meets real user needs. Agile approaches emphasize collaboration with customers and iterative delivery, which enhances satisfaction compared to traditional, rigid methods.

While following processes (A) and using agile techniques (B) are means to an end, they do not directly guarantee benefits. Focusing solely on tasks (D) risks losing sight of value delivery.

User satisfaction is a central measure of agile success and reflects the effective application of agile principles.
