Pass4Leader is a wonderful study platform that can transform your effective diligence in to your best rewards. By years of diligent work, our experts have collected the frequent-tested knowledge into our JN0-460 exam materials for your reference. So our practice materials are triumph of their endeavor. By resorting to our JN0-460 Exam Materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our JN0-460 practice materials, and the passing rate is 98-100 percent.

## Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Campus EVPN-VXLAN:</b> This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Provisioning or Deployment:</b> This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Management or Operations:</b> This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Fundamentals:</b> This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.</li> </ul>

## JN0-460 Exam Fee - Valid JN0-460 Guide Files

Are you worried about how to pass the terrible Juniper JN0-460 exam? Do not worry, With Pass4Leader's Juniper JN0-460 exam training materials in hand, any IT certification exam will become very easy. Pass4Leader's Juniper JN0-460 Exam Training materials is a pioneer in the Juniper JN0-460 exam certification preparation.

## Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q57-Q62):

### NEW QUESTION # 57

Route distinguishers and route targets in EVPN are used for:

- A. Identifying Ethernet segments only
- B. Decreasing network performance
- C. Simplifying network configurations
- **D. Differentiating between routes in overlapping IP spaces and defining VPN membership**

**Answer: D**

### NEW QUESTION # 58

What information would be streamed through webhooks? (Choose two.)

- **A. SLE metrics of clients**
- **B. alerts**
- C. audit logs
- D. location coordinates of RFID tags

**Answer: A,B**

Explanation:

Mistwebhooksprovide real-time integration with external systems by streamingalertsandSLE (client) metrics. They allow automation tools to react immediately to network health or performance changes.

#### NEW QUESTION # 59

You have just connected a new cloud ready EX series switch to your network. While you are waiting for the switch to boot up, you claim the switch to your organization. You have waited ten minutes for it to boot up and connect to the Mist cloud, however you notice that the Cloud LED is blinking yellow in and has a three blinks pattern.

In this scenario, which statement is correct about the LED color and blink pattern?

- **A. The switch has not successfully connected to the Mist cloud.**
- B. The switch has successfully connected to the Mist cloud, however it cloud not find your organization.
- C. The ZTP bootstrap process has been completed.
- D. The switch has successfully connected to the Mist cloud

**Answer: A**

#### NEW QUESTION # 60

What are two insights that Mist Wired can provide for third party devices? (Choose two)

- A. Security Compliance
- B. Firmware Compliance
- **C. Inactive Wired VLANs**
- **D. Power Compliance**

**Answer: C,D**

#### NEW QUESTION # 61

In a Juniper Mistcampus fabric deploymentusingEVPN-VXLAN, which component performs the VXLAN encapsulation and de-encapsulation functions?

- **A. VTEP**
- B. GBP tag
- C. EVPN route reflector
- D. VLAN

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

InEVPN-VXLANarchitectures, theVXLAN Tunnel Endpoint (VTEP)is the logical interface responsible for encapsulating and de-encapsulating Layer 2 Ethernet frames into VXLAN packets.

Each participating switch - typically the access or distribution node - hosts aVTEPthat maps local VLANs to VXLAN Network Identifiers (VNIs).

When a packet leaves a local VLAN, the VTEP encapsulates it in a VXLAN header and routes it through the underlay IP fabric.

When received at the destination VTEP, the frame is de-encapsulated and delivered to the appropriate local VLAN.

"VTEPs in an EVPN-VXLAN campus fabric perform MAC-to-VNI mapping and encapsulate/decapsulate traffic between virtualized network segments, allowing seamless Layer 2 and Layer 3 connectivity across an IP underlay." References:
