And our price is absolutely reasonable and suitable for each of the candidates who participating in the IT certification exams.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 3	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP C_ACDET_2506 Test Dumps Demo Offer You The Best Valid Study Materials to pass SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite exam

There are three different versions of our C_ACDET_2506 exam questions to meet customers' needs you can choose the version that is suitable for you to study. If you buy our C_ACDET_2506 test torrent, you will have the opportunity to make good use of your scattered time to learn. If you choose our C_ACDET_2506 study torrent, you can make the most of your free time. So using our C_ACDET_2506 Exam Prep will help customers make good use of their fragmentation time to study and improve their efficiency of learning. It will be easier for you to pass your C_ACDET_2506 exam and get your certification in a short time.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which of the following master data types requires manual migration from Test to Production in a Greenfield migration?

- A. Translations
- B. Clause Library
- C. Relations and relation entries
- **D. Enumerations**

Answer: D

Explanation:

In SAP Ariba Greenfield deployments, Enumerations (picklist value lists) require manual migration because they are not included in Intelligent Configuration Manager (ICM) bundles. Enumerations must be manually exported from Test and imported into Production to ensure correct picklist values for fields that depend on them.

Other master data types like Clause Library and Relations can be migrated using standard migration tools or processes. Translations are handled via AML & Translations Upload.

Ensuring enumerations are migrated correctly is critical because missing or inconsistent enumerations can cause field validation errors and disrupt system usage.

NEW QUESTION # 31

Which of the following languages is used to define defaults on fields within SAP Ariba?

- A. ABAP
- B. JavaScript
- C. Python
- **D. Ariba expression language**

Answer: D

Explanation:

SAP Ariba uses its proprietary Ariba expression language, based on OGNL (Object-Graph Navigation Language), to define default value expressions on fields. This language supports logical conditions, comparisons, and public Java method calls to create dynamic defaulting logic. ABAP, Python, and JavaScript are not supported languages for field default expressions in SAP Ariba. This

expression language provides a concise and powerful way to tailor defaults based on context.

NEW QUESTION # 32

When you create a custom field, how do you define where the field is added?

- A. The field is added to a class, identified by the record ID
- B. Each field can be linked to multiple screens, identified via UI GroupClass ID
- C. The field is added to a project header, identified by the templateClass ID
- D. The field is added to a class, identified by a class name

Answer: D

Explanation:

In SAP Ariba, custom fields are associated with a specific class identified by its class name, such as ContractWorkspace or ProcureLineItem. This class-level association determines where the field is available within the application. When added to a parent class, the field inherits to all its subclasses, affecting all relevant data objects. The field is not linked via UI group IDs, project templates, or record IDs, which relate to different configuration aspects. This class-based design supports consistent data models and inheritance in SAP Ariba's architecture.

NEW QUESTION # 33

What system is provided by SAP Free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Application Lifecycle Management
- B. SAP Cloud Project Studio
- C. SAP for Me
- D. SAP Ariba Enablement Workbook

Answer: D

NEW QUESTION # 34

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Deployment Description
- B. Partner Statement of Work
- C. Onboard Resource Center
- D. Inline Help

Answer: A

NEW QUESTION # 35

.....
