ATLASSIAN ACP-120 Online Test, ACP-120 Prüfungsfrage

Es ist ganz normal, vor der Prüfung Angst zu haben, besonders vor der schwierig Prüfung wie ATlassian ACP-120. Wir wissen, dass allein mit der Ermutigung können Ihnen nicht selbstbewusst machen. Deshalb bieten wir die praktische Prüfungssoftware, um Ihnen zu helfen, ATlassian ACP-120 zu bestehen. Sie können zuerst die Demo der ATlassian ACP-120 gratis probieren. Wir glauben, dass Sie bestimmt unsere Bemühungen und Professionellsein von der Demo empfinden!

ATLASSIAN Jira Cloud Administrator ACP-120 Prüfungsfragen mit Lösungen (Q64-Q69):

64. Frage

A team in your company requests a new Jira project that fulfills the following requirements:

- * Ability to work on issues in weekly iterations
- * Allows the project administrators to create their own fields

The project should fulfill these requirements right after creation without the need to enable additional features.

Which project should you create?

- A. Company-managed project with Scrum template
- B. Team-managed project with Kanban template
- C. A company-managed project with Kanban template
- D. Team-managed project with Scrum template

Antwort: A

65. Frage

An automation rule is configured as shown:

- * When: Rule is triggered on All comments
- * If: Initiator is in Developers
- * Then: Transition the issue to DEVELOPMENT

If: Initiator is in Reviewers

* Then: Transition the issue to REVIEW You are only in the Reviewers project role. What happens when you comment on an issue?

- A. The issue transitions to DEVELOPMENT.
- B. The rule does not execute.
- C. The rule executes but does not perform any actions.
- **D. The issue transitions to REVIEW.**

Antwort: D

Begründung:

The automation rule is triggered when any comment is added to an issue and checks the initiator's project role to determine the action. Since you are only in the Reviewers project role, commenting on an issue will trigger the rule, and the issue will transition to REVIEW based on the rule's logic.

* Explanation of the Correct Answer (Option B):

* The rule is triggered by All comments, meaning any comment on an issue activates the rule.

* The rule has two If conditions:

* If the initiator (the user who commented) is in the Developers project role, the issue transitions to DEVELOPMENT.

* If the initiator is in the Reviewers project role, the issue transitions to REVIEW.

* Since you are only in the Reviewers project role, the second If condition is met when you comment, and the Then action transitions the issue to REVIEW.

* Exact Extract from Documentation:

Configure automation rules

Automation rules consist of triggers, conditions, and actions.

* Trigger: Defines when the rule runs (e.g., Comment Added).

* Condition: Checks criteria like user roles (e.g., Initiator is in Reviewers).

* Action: Performs tasks like transitioning an issue. Conditions are evaluated sequentially, and the corresponding action is executed if the condition is met. If multiple conditions apply, each matching condition's action is executed unless restricted by rule logic. Note: The initiator is the user who triggers the rule (e.g., the commenter). (Source: Atlassian Support Documentation, "Automate your Jira Cloud instance")

* Why This Fits: As a member of the Reviewers project role, your comment satisfies the If:

Initiator is in Reviewers condition, triggering the Transition the issue to REVIEW action, making Option B the correct answer.

* Why Other Options Are Incorrect:

* The rule does not execute (Option A):

* The rule is triggered by All comments, so any comment, including yours, will execute the rule. The issue is not whether the rule executes but what action it performs.

* Extract from Documentation:

A Comment Added trigger activates the rule whenever a comment is added to an issue, regardless of the user's role.

(Source: Atlassian Support Documentation, "Jira automation triggers")

* The rule executes but does not perform any actions (Option C):

* The rule executes and performs the Transition the issue to REVIEW action because you are in the Reviewers project role, which satisfies the second If condition. The rule will not skip actions if a condition is met.

* Extract from Documentation:

If a condition in an automation rule is met, the associated action is executed unless restricted by additional logic.

(Source: Atlassian Support Documentation, "Automate your Jira Cloud instance")

* The issue transitions to DEVELOPMENT (Option D):

* The DEVELOPMENT transition is only triggered if the initiator is in the Developers project role. Since you are only in the Reviewers role, this condition is not met, and the issue will not transition to DEVELOPMENT.

* Extract from Documentation:

Conditions like Initiator is in [Role] check the user's project role membership. Only the actions for matching conditions are executed. (Source: Atlassian Support Documentation, "Jira automation conditions")

* Additional Notes:

* The rule assumes the DEVELOPMENT and REVIEW statuses exist in the project's workflow and that transitions to these statuses are valid from the issue's current status.

* If you were in both Developers and Reviewers roles, both actions could execute sequentially, but the question specifies you are only in Reviewers, so only the REVIEW transition applies.

66. Frage

Your Jira cloud instance has hundreds of projects which are used only by the development team at your organization.

All projects share a single permission scheme New business requirements state:

* Customer support staff at your organization need to view all issues in all projects

* They also need to share filters with other users

* They should not be granted too much access

Identify the appropriate way to configure customer support staff in Jira (Choose one)

- A. With an approved domain
- B. As a new project role
- C. As a security level
- **D. As a new group**
- E. With the Trusted role

Antwort: D

67. Frage

A dashboard displays an Issue Statistics gadget as shown.

The dashboard owner wants to change the order of the statuses shown in the gadget to appear as follows.

1. To Do
2. In Progress
3. Ready For QA
4. Blocked
5. Rejected
6. Done

Which action will permanently arrange the statuses into the required order?

- A. Reorder the statuses on the Status administration page.
- **B. Add numbers to the status names to allow them to be sorted in numerical order.**
- C. Change the Sort Direction option in the gadget to Ascending.
- D. Change the gadget Sort By field to Total.
- E. Change the category of the statuses.

Antwort: B

68. Frage

Three team members have left the company and their issues need to be re-assigned to various - users.

All of their issues are in the Marketing project which uses the Default Notification Scheme. The scheme has never been updated.

How do you inform the new assignees about their re-assigned issues?

- A. Perform a single bulk operation to mention all new assignees in a comment.
- B. Use the Send email feature to inform the individual new assignees.
- C. Perform bulk operations to re-assign the issues and notify the new assignees.
- **D. Add an announcement banner to each new assignee's dashboard.**
- E. Add an announcement banner to the marketing project to inform team members.

Antwort: D
