AZ-120 Certification Exam Cost - Reliable AZ-120 Exam Cram

To make sure your situation of passing the certificate efficiently, our AZ-120 practice materials are compiled by first-rank experts. So the proficiency of our team is unquestionable. They help you review and stay on track without wasting your precious time on

useless things. They handpicked what the AZ-120 Study Guide usually tested in exam recent years and devoted their knowledge accumulated into these AZ-120 actual tests.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q10-Q15):

NEW QUESTION # 10

You have an on-premises SAP environment.

Backups are performed by using tape backups. There are 50 TB of backups.

A Windows file server has BMP images of checks used by SAP Finance. There are 9 TB of images.

You need to recommend a method to migrate the images and the tape backups to Azure. The solution must maintain continuous replication of the images.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 11

You need to provide the Azure administrator with the values to complete the Azure Resource Manager template.

Which values should you provide for diskCount, StorageAccountType, and domainName? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: 4

Scenario: the Azure Resource Manager template that will be used to provision the production application servers.

Ensure that each production application server has four 1-TB data disks.

Box 2: Standard_LRS

Scenario: Minimize costs whenever possible.

Box 3: contoso.onmicrosoft.com

The network contains an on-premises Active Directory domain named ad.contoso.com.

The Initial domain: The default domain (onmicrosoft.com) in the Azure AD Tenant. For example, contoso.onmicrosoft.com.

NEW QUESTION # 12

Your on-premises network contains an Active Directory domain.

You are deploying a new SAP environment on Azure.

You need to configure SAP Single Sign-On to ensure that users can authenticate to SAP GUI and SAP WebGUI.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Create an Azure Key Vault service endpoint.

2 - Configure secure network communication (SNC) by using SNCWIZARD.

3 - Change and deploy the logon file.

NEW QUESTION # 13

You plan to deploy an SAP environment on Azure that will use Azure Availability Zones. Which load balancing solution supports the deployment?

- A. Azure Application Gateway v1 SKU
- **B. Azure Standard Load Balancer**
- C. Azure Basic Load Balancer

Answer: B

Explanation:

Explanation

When you deploy Azure VMs across Availability Zones and establish failover solutions within the same Azure region, some restrictions apply:

* You can't use an Azure Basic Load Balancer to create failover cluster solutions based on Windows Server Failover Clustering or Linux Pacemaker. Instead, you need to use the Azure Standard Load Balancer SKU.

NEW QUESTION # 14

You have a large and complex SAP environment on Azure.

You are designing a training landscape that will be used 10 times a year.

You need to recommend a solution to create the training landscape. The solution must meet the following requirements:

- * Minimize the effort to build the training landscape.
- * Minimize costs.

In which order should you recommend the actions be performed for the first training session? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Build

Snapshot

Custom Image

Deliver Training

Shutdown
