High-quality Salesforce-Data-Cloud – 100% Free Practice Test Online | Salesforce-Data-Cloud Vce Test Simulator

It is browser-based; therefore no need to install it, and you can start practicing for the Salesforce Data Cloud Accredited Professional Exam (Salesforce-Data-Cloud) exam by creating the Salesforce Data Cloud Accredited Professional Exam (Salesforce-Data-Cloud) practice test. Our Salesforce Data Cloud Accredited Professional Exam (Salesforce-Data-Cloud) exam dumps give help to give you an idea about the actual Salesforce Salesforce-Data-Cloud Exam. You can attempt multiple Salesforce Data Cloud Accredited Professional Exam (Salesforce-Data-Cloud) exam questions on the software to improve your performance.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q115-Q120):

NEW QUESTION # 115

Which method should an administrator use when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK and Mobile SDK?

- A. Activation
- B. Calculated Insight
- C. Segment
- **D. Streaming Insight**

Answer: D

Explanation:

This method should be used when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK and Mobile SDK. Streaming Insight allows you to query and aggregate data from real-time streams using window functions. Reference: https://help.salesforce.com/s/articleView?id=sf.c360_a_streaming_insights.htm&type=5

NEW QUESTION # 116

An administrator wants to be able to create a multi-dimensional metric to identify unified individual lifetime value (LTV). Which sequence of DMO joins are necessary within the Calculated Insight to enable this calculation?

- A. Sales Order > Unified Individual
- B. Sales Order > Individual > Unified Individual
- C. Unified Individual > Individual > Sales Order
- **D. Unified Individual > Unified Link Individual > Sales Order**

Answer: D

Explanation:

To create a multi-dimensional metric to identify unified individual lifetime value (LTV), the administrator needs to join the following data model objects (DMOs) in the Calculated Insight:

Unified Individual: This DMO represents the unified profile of an individual, which contains attributes from multiple sources.

Unified Link Individual: This DMO represents the link between an Individual DMO and a Unified Individual DMO.

Sales Order: This DMO represents a transaction or purchase made by an individual.

The sequence of joins should start from the Unified Individual DMO, then join the Unified Link Individual DMO using the UnifiedIndividualId field, and then join the Sales Order DMO using the IndividualId field. This way, the administrator can access the sales order data for each unified individual and calculate their lifetime value.

NEW QUESTION # 117

Every day, Northern Trail Outfitters (NTO) uploads a summary of the last 24 hours of store transactions to a new file in an Amazon S3 bucket, and files older than 7 days are automatically deleted. Each file contains a timestamp in a standardized naming convention. What should a consultant consider when ingesting this data stream?

- A. Advise NTO to change their processes: this configuration is not supported
- **B. Ensure the refresh mode is set to "Upsert" and Refresh only new files" is selected**
- C. Ensure the refresh mode is set to "Full Refresh" and the filename contains a wildcard to accommodate the timestamp
- D. Ensure the refresh mode is set to "Full Refresh" and "Refresh only new files" is selected

Answer: B

Explanation:

This configuration will ensure that Data Cloud only ingests new files from the Amazon S3 bucket and updates or inserts new records into the data stream without deleting existing records.

NEW QUESTION # 118

Which two objects or fields are supported for ingestion using the Salesforce CRM connector?

- A. Standard Big Objects
- **B. Standard Objects**
- **C. Custom Objects**
- D. Custom Big Objects

Answer: B,C

Explanation:

These two objects or fields are supported for ingestion using the Salesforce CRM connector. You can select standard or custom objects from your Salesforce CRM org and map them to Data Cloud data model objects. Reference:

https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_salesforce_crm.htm&type=5

NEW QUESTION # 119

Northern Trail Outfitters uploads new customer data to an Amazon S3 Bucket on a daily basis to be ingested in Data Cloud. In what order should each process be run to ensure that freshly imported data is ready and available to use for any segment?

- A. Calculated Insight > Identity Resolution > Refresh Data Stream
- B. Identity Resolution > Calculated Insight > Refresh Data Stream
- C. Refresh Data Stream > Calculated Insight > Identity Resolution
- **D. Refresh Data Stream > Identity Resolution > Calculated Insight**

Answer: D

Explanation:

The recommended order of processes for updating data in Data Cloud is as follows:

Refresh Data Stream: This process updates the data from the source, such as Amazon S3, into Data Cloud.

Identity Resolution: This process runs the rulesets that link together multiple records of an individual into a unified profile.

Calculated Insight: This process calculates additional attributes based on existing data, such as lifetime value or churn risk.

NEW QUESTION # 120
