As the saying goes, success and opportunity are only given to those people who are well-prepared! If you really long to own the 156-587 Certification, it is necessary for you to act now. We are willing to help you gain the 156-587 certification.

CheckPoint 156-587 Exam Syllabus Topics:

Topic	Details
Topic 1	• Advanced Client-to-Site VPN Troubleshooting: This section of the exam measures the skills of CheckPoint System Administrators and focuses on troubleshooting client-to-site VPN issues.
Topic 2	• Advanced Gateway Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and addresses troubleshooting techniques specific to gateways. It includes methods for diagnosing connectivity issues and optimizing gateway performance.

Topic 3	• Advanced Site-to-Site VPN Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and covers troubleshooting site-to-site VPN connections.
Topic 4	• Advanced Management Server Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and focuses on troubleshooting management servers. It emphasizes understanding server architecture and diagnosing problems related to server performance and connectivity.
Topic 5	• Introduction to Advanced Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and covers the foundational concepts of advanced troubleshooting techniques. It introduces candidates to various methodologies and approaches used to identify and resolve complex issues in network environments.

CheckPoint Check Point Certified Troubleshooting Expert - R81.20 Sample Questions (Q64-Q69):

NEW QUESTION # 64
What cli command is run on the GW to verify communication to the Identity Collector?

- A. fwd connected
- B. pdp connections idc
- C. pep connections idc
- D. show idc connections

Answer: B

NEW QUESTION # 65
The Check Point Watch Daemon (CPWD) monitors critical Check Point processes, terminating them or restarting them as needed to maintain consistent, stable operating conditions. When checking the status/output of CPWD you are able to see some columns like APP, PID, STAT, START, etc. What is the column "STAT" used for?

- A. Shows the status of the monitored process
- B. Shows the Watch Dog name of the monitored process
- C. Shows how many times the Watch Dog started the monitored process
- D. Shows what monitoring method Watch Dog is using to track the process

Answer: A

Explanation:
The STAT column in the output of the cpwd_admin list command shows the status of the monitored process. The possible values are E for established, meaning that the process is running, or T for terminated, meaning that the process is not running. The STAT column is useful for quickly checking if any critical process has crashed or failed to start. If the value is T, the process should be restarted and the reason for the termination should be investigated. The STAT column does not show the Watch Dog name, the number of times the process was started, or the monitoring method of the Watch Dog.

NEW QUESTION # 66
In Mobile Access VPN. clientless access is done using a web browser. The primary communication path for these browser based connections is a process that allows numerous processes to utilize port
443 and redirects traffic to a designated port of the respective process Which daemon handles this?

- A. Multi-portal Daemon (MPD)
- B. Mobile Access Daemon (MAD)
- C. HTTPS Inspection Daemon (HID)
- D. Connectra VPN Daemon (cvpnd)

Answer: A

Explanation:

The Multi-portal Daemon (mpdaemon) is responsible for handling the clientless access connections in Mobile Access VPN. It listens on port 443 and redirects the traffic to the appropriate port of the process that handles the specific connection type, such as cvpnd for SSL Network Extender, MAD for Mobile Access Portal, or HID for HTTPS Inspection. The mpdaemon also performs authentication and authorization for the clientless access connections. References: Check Point Processes and Daemons1, Mobile Access Blade Administration Guide

NEW QUESTION # 67

Where do you enable log indexing on the SMS?

- A. SMS object under "General Properties"
- B. SMS object under "Logs"
- C. SMS object under "Other"
- D. SMS object under "Advanced"

Answer: B

NEW QUESTION # 68

Check Point provides tools & commands to help you to identify issues about products and applications. Which Check Point command can help you to display status and statistics information for various Check Point products and applications?

- A. fwstat
- B. CPview
- C. CPstat
- D. CPstat is not a valid command. The correct command is cpstat, which is case-sensitive.
- E. cpstat

Answer: E

Explanation:

The correct Check Point command to display status and statistics information for various Check Point products and applications is cpstat. This command provides a dynamic real-time view of the system, showing the information such as the number of connections, packets, drops, CPU usage, memory usage, disk space, license status, and blade status. The cpstat command can be customized by using various options and flags to specify the product, the interval, the fields, and the format of the output. For example, to display the status and statistics of the firewall module every 5 seconds, the command would be:

cpstat fw -f all -i 5

The other commands are incorrect because:

A: CPview is a Check Point tool that displays information about the system performance, such as the CPU, memory, disk, network, and firewall. It does not show information about other products and applications, such as VPN, Identity Awareness, Anti-Virus, etc.

C: fwstat is not a valid command. The correct command is fw ctl pstat, which displays information about the firewall kernel, such as the number of connections, packets, drops, memory, and synchronization. It does not show information about other products and applications, such as VPN, Identity Awareness, Anti-Virus, etc.

Reference:

cpstat - Check Point Software

CPView Utility

fw ctl pstat - Check Point Software

(CCTE) - Check Point Software

NEW QUESTION # 69
