ISC CAP Practice Test Questions, ISC CAP Exam Practice Test Questions

The (ISC)2 Certified Authorized Professional certification is aimed at information security practitioners. These are the individuals who support the management of security risk in the pursuit of information system authorization. They do this to support the operations and mission of an organization according to the regulatory and legal requirements. The certificate covers a broad range of topics, which are included in the (ISC)2 CAP CBK (Body of Knowledge). The candidates must pass one qualifying exam to obtain this certification.

Taking Your Exam and Study Tips

You can schedule your CAP certification exam by creating your Pearson VUE account. Make sure that you can find the closest test center. Also, the following are some of the study tips that you can use while preparing for the CAP test:

- Take advantage of the most up-to-date information security risk practice tests and access information systems materials in addition to online security control webinars.
- Take a glance at the information security risk management prep exam questions to see what relevant insights you can gather.
- Take assistance from IT authorization and risk management professionals who have already received the CAP designation.
- Participate in CAP-focused online programs and best practices in authorization information systems to improve your confidence in taking the official exam.
- Get practical experience that can be applied to your work.

The SecOps Group Certified AppSec Practitioner Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Sammy is correct, because she is the project manager.
- **B. Sammy is correct, because organizations can create risk scores for each objective of the project.**
- C. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- D. Harry is correct, because the risk probability and impact considers all objectives of the project.

Answer: B

NEW QUESTION # 38

You work as a project manager for BlueWell Inc. There has been a delay in your project work that is adversely affecting the project schedule.
