The after-sale customer service is an important standard to balance whether a company is better or not, so in order to make it, we provide available 24/7 online service, one-year

free update service after payment, and the promise of "No help, full refund", so please be rest assured to choose our product if you want to pass the CGSS Exam

## ACAMS Certified Global Sanctions Specialist Sample Questions (Q52-Q57):

### NEW QUESTION # 52

To what degree should human rights feature in the assessment of humanitarian implications of sanctions?

- A. Judgements on the legal obligations of people or entities involved
- B. 50% of the gross profit should be rendered for humanitarian sympathy
- C. Charitable funds for humanitarian refugee
- D. 50% of the gross profit should be rendered for humanitarian sympathy
- E. Safeguarding and upholding any rights under the sanctions regime

**Answer: A,E**

### NEW QUESTION # 53

An EU and US-based retail company sells various goods globally. What product may pose export sanctions violations for the company?

- A. Toys
- B. Cigars
- C. Art reproductions
- D. Textbooks

**Answer: B**

Explanation:

Cigars, particularly those originating from Cuba or other embargoed jurisdictions, fall under both EU and US export sanctions restrictions. Under US OFAC regulations, Cuban-origin goods-including cigars-are strictly prohibited from import, export, resale, or re-export by US persons. EU sanctions may also restrict trade with embargoed or designated jurisdictions. Textbooks, toys, and art reproductions generally do not fall under export prohibitions unless tied to dual-use concerns or specific jurisdictions, which is not indicated here. Cigars present the most direct and well-established sanctions risk.

Reference:

US OFAC Cuban Assets Control Regulations on Cuban-origin goods.

EU and US export controls covering embargoed jurisdictions and prohibited commodities.

### NEW QUESTION # 54

If an Athenian citizen was unjustly murdered in another state and that state refused to punish the murderer what was authorized under Athenian law for the victims' relatives?

- A. Seizing ten nationals of that state
- B. Holding three citizens of that state until restitution is completed
- C. Use military force to attack that State
- D. Seizing three nationals of that state
- E. Holding three citizens of that state until the assassin surrenders

**Answer: B,D,E**

### NEW QUESTION # 55

What makes UN sanctions more difficult to enact? (Select Two.)

- A. The UN uses sanctions to intervene in the domestic affairs of various states.
- B. UN sanctions are measures that can threaten international peace and security.
- C. UN sanctions are autonomous and therefore ineffective.
- D. All permanent UN Security Council members must vote in favor of sanctions.
- E. UN sanctions are multilateral and require consensus among different nations.

**Answer: D,E**

Explanation:

UN sanctions require agreement among multiple countries, making them more difficult to enact than unilateral national sanctions. The UN Security Council must reach consensus, and all five permanent members must avoid using their veto power. Any negative vote by a permanent member blocks the resolution entirely.

This requirement for global political alignment is the primary barrier to rapid sanctions adoption. UN sanctions are neither autonomous nor inherently ineffective, and they do not exist to intervene in domestic affairs but to protect international peace and security under Chapter VII of the UN Charter.

Reference:

UN Security Council voting procedures and veto rules.

Multilateral consensus requirements for adopting UNSC sanctions.

#### NEW QUESTION # 56

A financial institution's decision to adjust the degree of sensitivity of a screening tool should be based on its transaction volume and:

- A. number of staff.
- B. personnel training.
- C. management commitment.
- **D. risk assessment.**

**Answer: D**

Explanation:

Sanctions and Compliance Domains state that screening calibration must be tied directly to a financial institution's sanctions risk assessment, which evaluates products, customer base, geography, delivery channels, and transaction volume. Sensitivity adjustments must be justified by an institution's assessed sanctions exposure.

Staff levels or training do not determine screening thresholds; these are operational considerations. Management commitment supports governance but does not form the technical basis for calibration decisions.

Reference:

Screening calibration tied to sanctions risk assessments.

Threshold adjustments must reflect actual sanctions exposure and transaction characteristics.

#### NEW QUESTION # 57

.....

PrepAwayTest has one of the most comprehensive and top-notch ACAMS CGSS Exam Questions. We eliminated the filler and simplified the Certified Global Sanctions Specialist exam preparation process so you can ace the ACAMS exam on your first try. Our ACAMS CGSS Questions include real-world examples to help you learn the fundamentals of the subject not only for the ACAMS exam but also for your future job.
