

Salesforce MuleSoft-Integration-Architect-I New Braindumps Questions, Certification MuleSoft- Integration-Architect-I Exam Cost

What's more, part of that ITdumpsfree MuleSoft-Integration-Architect-I dumps now are free: <https://drive.google.com/open?id=1-qG-wpgQB8dYhzjeecDlv9jPbDO7lva>

Perhaps you still feel confused about our Salesforce Certified MuleSoft Integration Architect I test questions when you browse our webpage. There must be many details about our products you would like to know. Do not hesitate and send us an email. Gradually, the report will be better as you spend more time on our MuleSoft-Integration-Architect-I Exam Questions. As you can see, our system is so powerful and intelligent. What most important it that all knowledge has been simplified by our experts to meet all people's demands. All of our assistance is free of charge. We are happy that our small assistance can change you a lot. You don't need to feel burdened. Remember to contact us!

The ITdumpsfree guarantees their customers that if they have prepared with Salesforce Certified MuleSoft Integration Architect I (MuleSoft-Integration-Architect-I) practice test, they can pass the Salesforce Certified MuleSoft Integration Architect I (MuleSoft-Integration-Architect-I) certification easily. If the applicants fail to do it, they can claim their payment back according to the terms and conditions. Many candidates have prepared from the actual Salesforce MuleSoft-Integration-Architect-I Practice Questions and rated them as the best to study for the examination and pass it in a single try with the best score. The Salesforce MuleSoft-Integration-Architect-I practice material of ITdumpsfree came into existence after consultation with many professionals and getting their positive reviews.

Avail 100% Pass-Rate MuleSoft-Integration-Architect-I New Braindumps Questions to Pass MuleSoft-Integration-Architect-I on the First Attempt

Although we have three versions of our MuleSoft-Integration-Architect-I exam braindumps: the PDF, Software and APP online, i do think the most amazing version is the APP online. This version of our MuleSoft-Integration-Architect-I study materials can be supportive to offline exercise on the condition that you practice it without mobile data. So even trifling mistakes can be solved by using our MuleSoft-Integration-Architect-I Practice Questions, as well as all careless mistakes you may make.

Salesforce MuleSoft-Integration-Architect-I Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> Designing Integration Solutions to Meet Performance Requirements: This topic covers meeting performance and capacity goals, using streaming features, and processing large message sequences. |
| Topic 2 | <ul style="list-style-type: none"> Designing Integration Solutions to Meet Persistence Requirements: It addresses the usage of VM queues and connectors, object stores and services, and stateful components configured with object stores. |
| Topic 3 | <ul style="list-style-type: none"> Designing and Developing Mule Applications: It includes selecting application properties, using fundamental features, designing with core routers, understanding the Salesforce Connector, and leveraging core connectors. |
| Topic 4 | <ul style="list-style-type: none"> Designing Architecture Using Integration Paradigms: This topic focuses on creating high-level integration architectures using various paradigms. It includes API-led connectivity, web APIs and HTTP, event-driven APIs, and message brokers, and designing Mule application using messaging patterns and technologies. |
| Topic 5 | <ul style="list-style-type: none"> Initiating Integration Solutions on Anypoint Platform: Summarizing MuleSoft Catalyst and Catalyst Knowledge Hub, differentiating between functional and non-functional requirements, selecting features for designing and managing APIs, and choosing deployment options are its sub-topics. |
| Topic 6 | <ul style="list-style-type: none"> Designing Integration Solutions to Meet Security Requirements: This topic emphasizes securing access to the Anypoint Platform and APIs, using Anypoint Security, counteracting security vulnerabilities, and understanding audit logging capabilities. |

Salesforce Certified MuleSoft Integration Architect I Sample Questions (Q89-Q94):

NEW QUESTION # 89

A company is planning to extend its Mule APIs to the Europe region. Currently all new applications are deployed to Cloudhub in the US region following this naming convention {API name} - {environment}. for example, Orders-SAPI-dev, Orders-SAPI-prod etc. Considering there is no network restriction to block communications between API's, what strategy should be implemented in order to apply the same new API's running in the EU region of CloudHub as well to minimize latency between API's and target users and systems in Europe?

- A. Set region property to Europe (eu-de) in API manager for all the mule application Change the naming convention to {API name} - {environment} - {region} and communicate this change to the consuming applications and users
- B. Set region property to Europe (eu-de) in runtime manager for all the mule application Change the naming convention to {API name} - {environment} - {region} and communicate this change to the consuming applications and users
- C. Set region property to Europe (eu-de) in runtime manager for all the mule application No need to change the naming convention
- D. Set region property to Europe (eu-de) in API manager for all the mule application No need to change the naming convention

Answer: B

NEW QUESTION # 90

Refer to the exhibit.

An organization uses a 2-node Mule runtime cluster to host one stateless API implementation. The API is accessed over HTTPS through a load balancer that uses round-robin for load distribution.

Two additional nodes have been added to the cluster and the load balancer has been configured to recognize the new nodes with no other change to the load balancer.

What average performance change is guaranteed to happen, assuming all cluster nodes are fully operational?

- A. 100% increase in the throughput of the API
- B. 50% reduction In the number of requests being received by each node

- C. 50% reduction in the response time of the API
- D. 50% reduction In the JVM heap memory consumed by each node

Answer: B

NEW QUESTION # 91

What is a core pillar of the MuleSoft Catalyst delivery approach?

- A. Technology centralization
- B. Scope reduction
- C. Business outcomes
- D. Process thinking

Answer: C

NEW QUESTION # 92

What is an example of data confidentiality?

- A. Providing a server's private key to a client for secure decryption of data during a two-way SSL handshake
- B. De-masking a person's Social Security number while inserting it into a database
- C. Signing a file digitally and sending it using a file transfer mechanism
- D. Encrypting a file containing personally identifiable information (PII)

Answer: D

NEW QUESTION # 93

An organization is choosing between API-led connectivity and other integration approaches.

According to MuleSoft, which business benefits is associated with an API-led connectivity approach using Anypoint Platform?

- A. Greater project predictability through tight coupling of systems
- B. improved security through adoption of monolithic architectures
- C. Higher outcome repeatability through centralized development
- D. Increased developer productivity through self-service of API assets

Answer: D

NEW QUESTION # 94

.....

No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our MuleSoft-Integration-Architect-I training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. With our MuleSoft-Integration-Architect-I Study Guide, you will find that studying knowledge and making a progress is quite interesting and easy. And the most important is that you will get the best reward according to the MuleSoft-Integration-Architect-I certification.
