

350-501 Exam Tutorials–Latest updated Sample Questions Answers Provider for 350-501: Implementing and Operating Cisco Service Provider Network Core Technologies

2026 Latest FreeDumps 350-501 PDF Dumps and 350-501 Exam Engine Free Share: <https://drive.google.com/open?id=1JoMvAB2rqqiFkiSv0jFfpWLLSi89Upqt>

The importance of learning is well known, and everyone is struggling for their ideals, working like a busy bee. We keep learning and making progress so that we can live the life we want. Our 350-501 practice test materials help users to pass qualifying examination to obtain a 350-501 qualification certificate are a way to pursue a better life. If you are a person who is looking forward to a good future and is demanding of yourself, then join the army of learning to pass the 350-501 Exam. Choosing our 350-501 test question will definitely bring you many unexpected results!

The Implementing and Operating Cisco Service Provider Network Core Technologies is a comprehensive exam that covers a wide range of topics such as network architecture, routing, MPLS, VPN services, and network automation. 350-501 Exam is designed to assess the abilities of networking professionals in network implementation and troubleshooting.

Sample 350-501 Questions Answers & Reliable 350-501 Exam Questions

I just want to share with you that here is a valid 350-501 exam cram file with 100% pass rate and amazing customer service. If you are not sure about your exam, choosing our 350-501 exam cram file will be a good choice for candidates. We sell products by word of mouth. We are famous for our high pass-rate 350-501 Exam Cram. If you try to use our study materials one time, you will know how easy to pass exam with our 350-501 exam cram file. Our business policy is "products win by quality, service win by satisfaction".

Cisco 350-501 Exam is ideal for professionals who want to enhance their knowledge and skills in service provider network technologies. Implementing and Operating Cisco Service Provider Network Core Technologies certification can help individuals enhance their career prospects and open up new opportunities in the service provider industry.

Cisco 350-501 exam is a comprehensive certification test that covers a range of topics related to service provider networks. It is designed to test the knowledge and skills required to implement and operate these networks, as well as troubleshoot network issues. Obtaining this certification can help network engineers specialize in service provider technologies and advance their careers in this area.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q306-Q311):

NEW QUESTION # 306

Drag and drop the OSPF area types from the left onto the correct statements on the right

backbone	required area that allows interarea communication
not-so-stubby	area that can learn interarea routes and the default route
stub	area that can learn only the default route and routes within its own area
totally stubby	area that can serve as a redistribution point for external routes to enter the OSPF domain

Answer:

Explanation:

backbone	backbone
not-so-stubby	stub
stub	totally stubby
totally stubby	not-so-stubby

NEW QUESTION # 307

```
Notification host: 192.168.101.1 udp-port: 162 type: trap
community1 security model: v1
```

Refer to the exhibit. Over the last few months, ISP A has doubled its user base. The IT Director asked the engineering team to monitor memory consumption and buffer statistics on all P and PE devices in the MPLS core. Most devices have CPU usage of 70% or more, so the solution must be targeted and secure. Which two commands must the engineering team implement on P and PE devices to meet these requirements? (Choose two.)

- A. snmp-server enable snmp-traps community1 bufferpeak
- B. snmp-server host 192.168.101.1 version 3 auth community1 memory
- C. snmp-server enable traps memory bufferpeak
- D. snmp-server host 192.168.101.1 version 2c community1 memory
- E. snmp-server host 192.168.101.1 version 1 community1 auth memory

Answer: B,C

Explanation:

To monitor memory consumption and buffer statistics securely on P and PE devices in an MPLS core, especially considering the high CPU usage, the engineering team should implement SNMP version 3 for its security features. Therefore, option A is correct as it specifies SNMP version 3 with authentication. Option B is also correct as it enables traps for memory buffer peak, which is essential for monitoring memory thresholds and ensuring quick response to potential issues.

NEW QUESTION # 308

Refer to the exhibit:

```

route-policy ciscotest
  if destination in acl10 then
    pass
  else
    set local-preference 300
  endif
end-policy

```

A network engineer is implementing a BGP routing policy. Which effect of this configuration is true?

- A. If traffic matches acl10, it is allowed and its local-preference is set to 300
- B. All traffic that matches acl10 is allowed without any change to its local-preference
- C. All traffic that matches acl10 is dropped without any change to its local-preference
- D. All traffic is assigned a local-preference of 300 regardless of its destination

Answer: B

NEW QUESTION # 309

Refer to the exhibit.

```

RP/0/RP0/CPU0:router(config)# router bgp 65534
RP/0/RP0/CPU0:router(config-bgp)# neighbor 192.168.223.7
RP/0/RP0/CPU0:router(config-bgp-nbr)# remote-as 65507
RP/0/RP0/CPU0:router(config-bgp-nbr)#

```

An engineer is securing a customer's network. Which command completes this configuration and the engineer must use to prevent a DoS attack?

- A. neighbor ttl-security
- B. ttl-security
- C. ebgp-multihop
- D. neighbor ebgp-multihop

Answer: B

NEW QUESTION # 310

Refer to the exhibit:

```

router bgp 1
network 192.168.1.2 mask 255.255.255.255
neighbor 192.168.1.1 remote-as 64512
neighbor 192.168.1.1 update-source Loopback0
neighbor 192.168.1.1 send-label

```

Which statement about the neighbor statements for 192.168.1.1 is true?

- A. The router must have TDP configured for the send-label command to operate
- **B. The router sends BGP labels for its prefixes to this peer**
- C. The neighbor router receives at least four labels from this router
- D. The router sends only a label for the prefix for LoopbackO.

Answer: B

NEW QUESTION # 311
