높은통과율C-BCBTP-2502최신시험후기시험대비공부문제

PassTIP에서는 소프트웨어버전과 PDF버전 두가지버전으로 덤프를 제공해드립니다.PDF버전은 구매사이트에서 무료샘플을 다움받아 체험가능합니다. 소프트웨어버전은실력테스트용으로 PDF버전공부후 보조용으로 사용가능합니다. SAP 인증C-BCBTP-2502덤프 무료샘플을 다운받아 체험해보세요.

SAP C-BCBTP-2502 시험요강:

주제	소개
주제 1	• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

주제 2	• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

C-BCBTP-2502합격보장 가능 공부, C-BCBTP-2502완벽한 덤프문제

SAP인증 C-BCBTP-2502 시험은 최근 제일 인기있는 인증시험입니다. IT업계에 종사하시는 분들은 자격증취득으로 자신의 가치를 업그레이드할수 있습니다. SAP인증 C-BCBTP-2502 시험은 유용한 IT자격증을 취득할수 있는 시험중의 한과목입니다. PassTIP에서 제공해드리는SAP인증 C-BCBTP-2502 덤프는 여러분들이 한방에 시험에서 통과하도록 도와드립니다. 덤프를 공부하는 과정은 IT지식을 더 많이 배워가는 과정입니다. 시험대비뿐만아니라 많은 지식을 배워드릴수 있는 덤프를PassTIP에서 제공해드립니다. PassTIP덤프는 선택하시면 성공을 선택한것입니다.

최신 SAP Certified Associate C-BCBTP-2502 무료샘플문제 (Q18-Q23):

질문 # 18
Which of the following are key features of SAP BTP's Integration Suite? (Choose two).

- A. Manual data processing with no automation.
- B. Built-in API management for secure data exchange.
- C. Restricted integration to SAP-only services.
- D. Prebuilt connectors for SAP and third-party applications.

정답： B,D

설명:
The SAP Integration Suite is designed to handle the complexities of a hybrid and heterogeneous IT landscape.
One of its most significant features is the availability of thousands of prebuilt connectors and integration flows for both SAP and third-party applications (such as Salesforce, ServiceNow, and various government portals). These "accelerators" significantly reduce the time and cost associated with integration projects, as developers do not have to build connections from scratch. This allows businesses to achieve a faster "time-to- value" when expanding their digital ecosystem.
Another critical feature is built-in API management. As enterprises move toward microservices and cloud- native applications, the number of APIs (Application Programming Interfaces) increases exponentially. SAP Integration Suite provides a centralized layer to govern, secure, and monitor these APIs. This ensures that data exchange between systems is not only efficient but also highly secure, protecting the enterprise from unauthorized access or data breaches. By combining prebuilt content with robust API governance, SAP BTP enables organizations to create a "composable enterprise" where different systems can be easily connected and reconfigured to meet changing business needs, moving away from the rigid, manual processes of the past.

질문 # 19
What is the primary function of SAP Business Process Intelligence?

- A. To analyze and optimize business processes using AI-driven insights.
- B. To replace existing workflow automation tools.
- C. To manage API security and integrations.
- D. To store customer transactional data.

정답： A

설명:
Before an organization can automate or improve its operations, it must first understand how its processes are actually running. The primary function of SAP Business Process Intelligence (largely centered around the SAP Signavio suite) is to analyze and optimize business processes using AI-driven insights. It provides
"Process Mining" capabilities that scan the data logs of the SAP Business Suite to reveal the "real" path a business process takes,

often uncovering hidden bottlenecks, manual workarounds, and deviations from the standard procedure.
By positioning Business Process Intelligence as a starting point for digital transformation, SAP BTP allows organizations to make data-backed decisions about where to automate. For example, the tool might discover that a specific regional office takes twice as long to process purchase orders compared to the global average.
Using AI, it can identify the root cause-such as a lack of automation or incorrect master data-and recommend specific BTP services (like SAP Build) to fix the issue. This creates a cycle of continuous improvement, where processes are constantly monitored, analyzed, and optimized, ensuring that the SAP Business Suite operates at peak efficiency and remains aligned with the company's strategic goals.

질문 # 20
Which SAP BTP service supports real-time financial data analysis for banking and finance industries?

- A. SAP HANA Cloud
- B. SAP Conversational AI
- C. SAP Fieldglass
- D. SAP Business Network

정답：A

설명：
For the banking and finance industries, the ability to process and analyze data in real-time is not just an advantage-it is a regulatory and operational necessity. SAP HANA Cloud is the foundational BTP service that supports this requirement. Due to its advanced in-memory computing architecture, HANA Cloud allows financial institutions to perform complex risk assessments, liquidity monitoring, and fraud detection on live transactional data.
In the context of the SAP Business Suite for Finance, HANA Cloud eliminates the latency associated with traditional data warehousing. Financial analysts can run "what-if" simulations and "instant closes" directly on the production data set. This real-time capability is essential for managing market volatility and meeting stringent reporting deadlines. Furthermore, HANA Cloud's multi-model processing allows it to handle not just standard relational data, but also spatial and graph data, which are increasingly used in modern financial services for relationship mapping and anti-money laundering (AML) initiatives. By positioning HANA Cloud as the central data engine, SAP BTP provides the high-performance infrastructure needed to power the next generation of digital banking services.

질문 # 21
Which of the following capabilities does SAP AI Core provide?

- A. Hardware infrastructure for AI development.
- B. Transactional data management for ERP systems.
- C. Predictive analytics and machine learning model deployment.
- D. Strictly rule-based automation without AI capabilities.

정답：C

설명：
SAP AI Core is a vital service within the "Intelligent Technologies" pillar of SAP BTP, designed to handle the heavy lifting of artificial intelligence at an enterprise scale. Its primary capability is providing a standardized, highly scalable runtime for predictive analytics and machine learning (ML) model deployment. In the modern SAP Business Suite, "intelligence" is no longer just a buzzword; it is a functional requirement. SAP AI Core allows businesses to take raw data from their systems, train sophisticated models, and then deploy those models into production environments where they can serve real-time predictions.
This service is unique because it supports the full lifecycle of an AI model, including execution and monitoring. It allows developers to integrate AI features into their applications while maintaining "AI Ethics" and transparency, which are critical for enterprise compliance. Unlike standard transactional databases that focus on record-keeping, SAP AI Core focuses on "inference"-using data to generate new insights and automate complex decisions. By positioning SAP AI Core as the engine for intelligence, SAP BTP ensures that organizations can move beyond basic automation toward advanced, self-learning processes that improve over time, such as predictive maintenance in manufacturing or intelligent lead scoring in sales.

질문 # 22
Which SAP BTP solution can be used to streamline handling of blocked sales orders?

- A. SAP Analytics Cloud
- B. SAP Datasphere
- C. SAP Integration Suite
- D. SAP Build Process Automation

정답：D

설명：
Blocked sales orders often represent a significant bottleneck in the "Order-to-Cash" process, usually requiring manual intervention from credit managers or sales administrators. SAP Build Process Automation is the ideal BTP solution to streamline this task. It combines the capabilities of workflow management and Robotic Process Automation (RPA) to automate the evaluation and release (or escalation) of these orders based on predefined business rules and real-time data from SAP S/4HANA.
By positioning SAP Build Process Automation as the solution, businesses can implement "exception-based" management. Instead of a human reviewing every blocked order, the BTP service can automatically release orders that meet certain low-risk criteria or route high-value/high-risk blocks to the appropriate manager's mobile device for instant approval. This significantly reduces the "Day Sales Outstanding" (DSO) and improves customer satisfaction by accelerating fulfillment. This approach highlights the value of SAP BTP as an extension layer for the SAP Business Suite; it allows for the optimization of core ERP processes without the need for complex, custom ABAP development, maintaining a "clean core" while achieving high levels of operational efficiency.

질문 # 23
.....

C-BCBTP-2502는SAP의 인증시험입니다.C-BCBTP-2502인증시험을 패스하면SAP인증과 한 발작 더 내디딘 것입니다. 때문에C-BCBTP-2502시험의 인기는 날마다 더해갑니다.C-BCBTP-2502시험에 응시하는 분들도 날마다 더 많아지고 있습니다. 하지만C-BCBTP-2502시험의 통과 율은 아주 낮습니다.C-BCBTP-2502인증시험준비중인 여러분은 어떤 자료를 준비하였나요?
